## MAXIM REID

Fundamental Principles of International Relations Longman

Ab 2015 (1915, 1815...) erlebt die moderne Zivilisation jeweils eine Orientierungskrise: eine Zeit höchster geistiger und kultureller Produktivität, aber menschlich, gesellschaftlich und politisch belastend, mit einem stereotypen, strukturierten Verlauf von begrenzter Dauer. Diese Phase ist Teil eines zyklischen Wandels der modernen Zivilisation, in den auch die Wirtschaft eingebunden ist. Damit finden die großen Wirtschaftszyklen (Kondratieff-Zyklen) erstmals eine schlüssige Erklärung. Der Essay enthält umfassende prognostische Aussagen und Zeittafeln zu den bevorstehenden dramatischen Wendungen unseres Zeitalters.

Classics of International Relations introduces, contextualises and assesses 24 of the most important works on international relations of the last 100 years. Providing an indispensable guide for all students of IR theory, from advanced undergraduates to academic specialists, it asks why

are these works considered classics? Is their status deserved? Will it endure? It takes as its starting point Norman Angell's best-selling *The Great Illusion* (1909) and concludes with Daniel Deudney's award winning *Bounding Power* (2006). The volume does not ignore established classics such as Morgenthau's *Politics Among Nations* and Waltz's *Theory of International Politics*, but seeks to expand the 'IR canon' beyond its core realist and liberal texts. It thus considers emerging classics such as Linklater's critical sociology of moral boundaries, Men and Citizens in the *Theory of International Relations*, and Enloe's pioneering gender analysis, *Bananas, Beaches and Bases*. It also innovatively considers certain 'alternative format' classics such as Kubrick's satire on the nuclear arms race, *Dr Strangelove*, and Errol Morris's powerful documentary on war and US foreign policy, *The Fog of War*. With an international cast of contributors, many of them leading authorities on their subject, *Classics of International Relations* will become a standard reference for all those wishing to make sense of a rapidly developing and diversifying field. *Classics of International Relations* is designed to become a standard reference text for advanced undergraduates, post-graduates and lecturers in the field of IR.

This clear and concise text introduces the theoretical frameworks that form the foundation of international relations. Using levels of analysis as the primary unifying force, Kaufman also assesses what traditional approaches can't explain about the contemporary international system. The study of international relations has changed rapidly in recent years. Firstly as a consequence of major political and economic change – the end of the cold war and the fall of communism, the resurgence of nationalism, terrorism and forms of fundamentalism, globalization – and secondly, linked with these developments, because of the vitality of the discipline, with ongoing debates on the fundamental paradigms for the understanding of international relations and the emergence of the perspectives of feminism, postmodernism, constructivism and critical theory. The Routledge *Encyclopedia of International Relations and Global Politics* provides a unique reference source for students and academics covering all aspects of global international relations and the contemporary discipline across IR's major subject divisions of diplomacy, military affairs,

international political economy, and theory. Written by a distinguished group of international scholars, the Encyclopedia is largely comprised of substantial entries of more than 1,000 words, with fifty major entries of 5,000 words on core contemporary topics. Each entry is fully cross-referenced and followed by a listing of complementary entries and a short bibliography for further reading. The whole is comprehensively indexed. There is no other resource of its kind and the Encyclopedia of International Relations and Global Politics will be an extremely valuable addition to all libraries supporting teaching and research in the social sciences.

Contains 15 graduate-level essays which aim to identify and assess the processes by which a birth cohort is distributed in the stratification system, given its position of origin in that system. Editor Kerckhoff (sociology, Duke U.) provides an introduction situating the studies in the volume in the context of previous stratification research over several generations. No index. What we send out into the universe comes back to us, magnified. Although the power of intention - the energy of positive thoughts - is widely accepted as an influential force in transforming lives, the exponential power of group intention has never been explored, until now. In *The Power of Eight*, Lynne McTaggart, an expert on the science of spirituality, reveals her remarkable findings from ten years of experiments about how group intention can heal our lives - and change the world for the better. When individuals in a group focus their intention together on a single target, a powerful collective dynamic emerges that can heal longstanding conditions, mend fractured relationships, lower violence and even rekindle life purpose. But the greatest untold truth of all is that group intention has a mirror effect, not only affecting the recipient but also reflecting back on the senders. Drawing on hundreds of case studies, the latest brain research, and dozens of McTaggart's own university studies, *The Power of Eight* provides solid evidence showing that there is such a thing as a collective consciousness. Now you can learn to use it and unleash the power you hold inside of you to heal your own life, with help from this riveting, highly accessible new book.

*Outlines and Highlights for International Relations* by Joshua S Goldstein U of Minnesota Press

With the end of the Cold War has come an upsurge in humanitarian interventions-military campaigns aimed at ending mass atrocities. These wars of rescue, waged in the name of ostensibly universal norms of human rights and legal principles, rest on the premise that a genuine "international community" has begun to emerge and has reached consensus on a procedure for eradicating mass killings. Rajan Menon argues that, in fact, humanitarian intervention remains deeply divisive as a concept and as a policy, and is flawed besides. The advocates of humanitarian intervention have produced a mountain of writings to support their claim that human rights precepts now exert an unprecedented influence on states' foreign policies and that we can therefore anticipate a comprehensive solution to mass atrocities. In *The Conceit of Humanitarian Intervention*, Menon shows that this belief, while noble, is naïve. States continue to act principally based on what they regard at any given time as their national interests. Delivering strangers from oppression ranks low on their list of priorities. Indeed, even democratic states routinely embrace governments that trample the human rights values on which the humanitarian intervention enterprise rests. States' ethical commitment to waging war to end atrocities remains episodic and erratic-more rhetorical than real. And when these missions are undertaken, the strategies and means used invariably produce perverse, even dangerous results. This, in no small measure, stems from the hubris of leaders-and the acolytes of humanitarian intervention-who have come to believe that they possess the wisdom and wherewithal to bestow freedom and stability upon societies about which they know little.

A clear and succinct overview of the contemporary realities of the international system Fully updated and revised, the second edition of *International Relations: A Concise Introduction* offers a clear and succinct overview of the forces that govern our world. Outlining key theories, traditional

approaches, and controversies old and new, Michael Nicholson also importantly addresses the relationship and incongruities between abstract theories of International Relations and contemporary realities of the international system in an increasingly globalized post-Cold War world. As international players-from vast and immensely diverse conglomerate corporations to the UN, and a host of other non-state actors-increasingly influence the world agenda, the question begs itself whether states and their interactions should still comprise the exclusive, or even primary, focus of any study of international relations. Accordingly, Nicholson provides an overview of such pressing concerns as global warming, the growing disparities between rich and poor, the resurgence of ethnic and nationalist conflict, and the health of the environment, and how these affect international relations. He further examines the moral problems inherent in any discussion of international relations, including questions of international law, terrorism and freedom fighters, and human rights. Crucial to any introduction to the field, the book serves up a brief history of the last century, focusing on the legacies of imperialism and the accelerating pace of globalization. *United States and Africa Relations, 1400s to the Present* Taylor & Francis

This book examines China's national security strategy by looking at the three major elements—foreign policy, energy security, and naval power—all interactive and major influences on China's future and its relations with the United States. A decade and a half into the twenty-first century, Beijing requires reliable access to energy resources, the navy to defend that access, and foreign policies to navigate safely toward its goals. Most importantly, the People's Liberation Army-Navy (PLAN) must be able to safeguard China's regional maritime interests, especially the sovereignty disputes involving Taiwan and the Yellow, East China, and South China Seas. Many Chinese naval officers and analysts think the United States is determined to contain China and prevent it from achieving the dominant historical position to which it is entitled. This view has been strengthened by Washington's shift to Asia, transfer of naval units to the Pacific, and the March 2015 Maritime Strategy released by the U.S. Navy, Marine Corps, and Coast Guard. China's relationship with the United States is vital to both countries and to the world. The relationship is based on both common and divergent interests in economics, military operations, and political goals and methods. China's international trading economy and ambition for a world-class navy require effective foreign diplomacy and participation in global affairs. This policy trifecta in large part defines China's posture to the world. Beijing is approximately halfway toward its mid-century goal of deploying a navy capable of defending China's perceived maritime interests. China's priorities follow President Xi Jinping's definition of national security as "comprehensive, encompassing politics, the military, the economy, technology, the environment and culture." What this means for future Chinese foreign policy choices, as naval modernization and energy security concerns enable different courses of action, lies at the center of this book's conclusions.

"The most important political book of the year."—Gregg Easterbrook, author of *The Progress Paradox* Everyone knows: wars are getting worse, more civilians are dying, and peacemaking achieves nothing, right? Wrong. Despite all the bad-news headlines, peacekeeping is working. Fewer wars are starting, more are ending, and those that remain are smaller and more localized. But peace doesn't just happen; it needs to be put into effect. Moreover, understanding the global decline in armed conflict is crucial as America shifts to an era of lower military budgets and operations. Preeminent scholar of international relations, Joshua Goldstein, definitively illustrates how decades of effort by humanitarian aid agencies, popular movements—and especially the United Nations—have made a measureable difference in reducing violence in our times. Goldstein shows how we can continue building on these inspiring achievements to keep winning the war on war. This updated and revised edition includes more information on a post-9-11 world, and is a perfect compendium for those wishing to learn more about the United States' armed conflicts in Iraq and Afghanistan.

A comprehensive history of the relationship between Africa and the United States Toyin Falola and Raphael Njoku reexamine the history of the relationship between Africa and the United States from

the dawn of the trans-Atlantic slave trade to the present. Their broad, interdisciplinary book follows the relationship's evolution, tracking African American emancipation, the rise of African diasporas in the Americas, the Back-to-Africa movement, the founding of Sierra Leone and Liberia, the presence of American missionaries in Africa, the development of blues and jazz music, the presidency of Barack Obama, and more.

**International Relations, Brief Edition** Routledge

This introductory text balances the importance of international security with international political economy. Professor Goldstein's presentation of alternative theories, including feminism and postmodernism early in the text helps students approach international relations by utilizing a variety of viewpoints. *International Relations* also shows how a new North-South gap has replaced the old East-West cleavage of the Cold War. In examining the influences on international relations, the author goes beyond the three customary levels of analysis (individual, domestic, and state) and adds a fourth global dimension to study the importance of the United Nations, the environment, global communication, and culture in world affairs. This second edition has been thoroughly updated to include the conflict in Bosnia, the development of peace in the Middle East, and economic integration in Europe. This new edition also offers color maps of the world's major regions for the reader's convenience.

Focusing on China's relations with the Middle East and North Africa (MENA), this Companion provides essential analysis of a complex region which threatens to become the battleground for rival powers in the future. The *Routledge Companion to China and the Middle East and North Africa* brings together China scholars from around the world, including from China, the MENA region, the United States, Asia, and Europe. The contributors, experts in their respective areas—which range from politics, military and nuclear power to economics, energy, and tourism—use different methodologies to understand China's policies in the MENA. Topics analyzed include Chinese investment in infrastructure, the COVID-19 pandemic and the Belt and Road Initiative. Divided into three Parts, the book addresses China's multidimensional presence in the MENA and its impact on the region while also explicating the MENA's relations with its traditional Western allies. Bilateral relations and people-to-people interactions are also explored and provide in-depth context to the areas of cooperation that are part of China's dealings with its partners in the region. Combining contemporary analysis with accessible prose, the book will be of interest to students, scholars, and policy-makers active in international relations, security studies, and economics, as well to general audiences interested in the MENA region.

This book examines the emergent conviction that UN robust peacekeeping works better than UN traditional peacekeeping in reducing civilian killings within contemporary post-cold war violent civil wars. In an unprecedented study, Nsia-Peptra has systematically and empirically documented the relationship between robust peacekeeping and civilian killings in violent civil wars using both statistical and case study models. His research, engagingly expounded upon in *UN Robust Peacekeeping*, indicates that robust peacekeeping works better than traditional peacekeeping in lowering civilian killings by spoilers in violent civil wars. His book also presents the concept of a formidable barrier model of robust peacekeeping success using the game theoretical model. It makes policy recommendations to enhance the UN's capacity to protect civilians from human rights violations, including a unified, coherent doctrinal definition for robust peacekeeping, an operational doctrine on the use of force, and improved UN intelligence capacity. Nsia-Peptra also suggests employing the GA 1950 Uniting for Peace Resolution as well as robust mandates, common training doctrine, pre-deployment training, improved UN intelligence capacity, major power participation, implementation of R2P and US objective global leadership.
