John Wiley & Sons

This book is an
indispensable "cutting

edge" book for students
and researchers of
journalism studies seeking
a text that illustrates and
applies a range of
linguistic and discourse-
analytic approaches to
the analysis of journalism.
While the form, function

and politics of the
language of journalism
have attracted scholars
from a wide range of
academic disciplines, too
often this analysis has
reduced the work of
journalists to text-
characteristics alone. In

contrast, this collection is united by the principle that journalistic discourse is always socially situated and the result of a series of processes – produced by journalists in accordance with particular production techniques and in specific institutional settings – and as such, analysis requires more than the methods offered by linguists. The contributors to this book draw on a range of the most prominent theoretical and methodological approaches to media

discourse – including Conversation Analysis, Critical Discourse Analysis, the APPRAISAL framework, Multi-modal Analysis and Rhetoric – in making sense of the language of newspapers (national, local and minority press), television and online journalism. Written in an engaging style by distinguished academic authorities, this book provides a state-of-the-art review of the subject. This book was published as a special issue of *Journalism Studies*.

Newspaper Journalism
SAGE
The Routledge Handbook of Critical Discourse Studies provides a state-of-the-art overview of the important and rapidly developing field of Critical Discourse Studies (CDS). Forty-one chapters from leading international scholars cover the central theories, concepts, contexts and applications of CDS and how they have developed, encompassing: approaches analytical methods interdisciplinarity social

divisions and power domains and media. Including methodologies to assist those undertaking their own critical research of discourse, this Handbook is key reading for all those engaged in the study and research of Critical Discourse Analysis within English Language and Linguistics, Communication, Media Studies and related areas. *A Practical Introduction to Power in Language* Analysing NewspapersAn Approach from Critical Discourse Analysis

The continual growth in the significance of mass-mediated communication makes it essential that we are able to reflect upon and critically appreciate the semiotic processes that are involved in their impact upon social and cultural life. This edited collection showcases a range of diverse approaches to the analysis of various forms of mediated communications, including varying degrees of attention to their associated textual, discursive and social

practices. Individual contributions are devoted to exploring, in analytical depth, multiple dimensions of each of the following media: newspaper articles, magazines (both historical advertising and contemporary editorial discourse), television (both situation comedy and "reality" TV programmes), books (covers and content in two genres), political leaflets, and a flight simulation computer game. The collection will be an important resource

for scholars and students within disciplines including communication studies, sociology, media studies, cultural studies, discourse studies, and journalism studies. This book was published as a special issue of *Social Semiotics*.

The Bloomsbury Companion to Discourse Analysis

Springer Nature

This substantially revised second edition of *The Routledge Handbook of Research Methods in the Study of Religion* remains the only comprehensive

survey in English of methods and methodology in the discipline. Designed for non-specialists and upper undergraduate-/graduate-level students, it discusses the range of methods currently available to stimulate interest in unfamiliar methods and enable students and scholars to evaluate methodological issues in research. The Handbook comprises 39 chapters - 21 of which are new, and the rest revised for this edition. A total of 56 contributors from 10

countries cover a broad range of topics divided into three clear parts: • Methodology • Methods • Techniques The first section addresses general methodological issues: including comparison, research design, research ethics, intersectionality, and theorizing/analysis. The second addresses specific methods: including advanced computational methods, autoethnography, computational text analysis, digital ethnography, discourse analysis, experiments,

field research, grounded theory, interviewing, reading images, surveys, and videography. The final section addresses specific techniques: including coding, focus groups, photo elicitation, and survey experiments. Each chapter covers practical issues and challenges, theoretical bases, and their use in the study of religion/s, illustrated by case studies. The Routledge Handbook of Research Methods in the Study of Religion is essential reading for students and

researchers in the study of religion/s, as well as for those in related disciplines.

Analysing Representations of Social Media in European News Media Discourse
Cambridge Scholars Publishing

The second edition of the highly successful Handbook of Discourse Analysis has been expanded and thoroughly updated to reflect the very latest research to have developed since the original publication, including new theoretical

paradigms and discourse-analytic models, in an authoritative two-volume set. Twenty new chapters highlight emerging trends and the latest areas of research. Contributions reflect the range, depth, and richness of current research in the field. Chapters are written by internationally-recognized leaders in their respective fields, constituting a Who's Who of Discourse Analysis. A vital resource for scholars and students in discourse studies as well as for researchers in related fields who seek

authoritative overviews of discourse analytic issues, theories, and methods
Case Studies of Household Appliance Advertisements from 1981 to 1996 John Benjamins Publishing Company
 What does language tell us about society? This book explains how qualitative methods are used to analyse discourse across the social sciences. Drawing on a range of examples, from political speeches to internet chat, it solves the practical problems of research design and application.

This is a key resource for all social scientists.
New Perspectives on Immigration Discourse Routledge
 Originally published as *The Continuum Companion to Discourse Analysis*, this book is designed to be the essential one-volume resource for advanced students and academics. This companion offers a comprehensive and accessible reference resource to research in contemporary discourse studies. In 21 chapters written by leading figures

in the field, the volume provides readers with an authoritative overview of key terms, methods and current research topics and directions. It offers both a survey of current research and gives more practical guidance for advanced study in the area. The volume covers all the most important issues, concepts, movements and approaches in the field and features a glossary of key terms in the area of discourse analysis. It is the complete resource for postgraduate students

and researchers working within discourse studies, applied linguistics, TESOL and the social sciences.

The Handbook of Discourse Analysis Taylor & Francis

Analysing Newspapers An Approach from Critical Discourse

Bloomsbury Publishing

Using Geographical Text Analysis to Understand Discourse Emerald Group Publishing

This fully revised and updated second edition provides an accessible introduction to the

research methods for studying media, communication and culture. In particular, the new edition considers how globalisation and digitalisation have changed the contexts, practices and content of media and the way that it is researched.

Discourse Studies

Routledge

Regional Parallelism and Corruption Scandals in Nigeria is a ground-breaking book that offers fresh perspectives on the character and role of the African media in covering

corruption scandals. It explores whether reports regarding corruption stem from the efforts of journalists who employ investigative journalism, or if it is a mere coincidence promoted by the activities of anti-corruption agencies. To that end, the book develops a media systems theory for Africa based on the coverage of corruption scandals in the Nigerian press. This new theoretical paradigm, defined as regional parallelism, argues that African countries are

nations within nations, and that therefore any comparative study of the media system should recognize this understanding. The book combines both interviews with journalists as well as qualitative content analysis of newspapers to determine the patterns and issues that influence the reporting of corruption. It also looks at corruption within the media itself, taking into account factors such as regionalism and ethnicity within the practice of journalism.

Media Research Methods
Ediciones Universidad de Salamanca
Totalitarianism has been an object of extensive communicative research since its heyday: already in the late 1930s, such major cultural figures as George Orwell or Hannah Arendt were busy describing the visual and verbal languages of Stalinism and Nazism. After the war, many fashionable trends in social sciences and humanities (ranging from Begriffsgeschichte and Ego-Documentology to

Critical Linguistics and Critical Discourse Analysis) were called upon to continue this media-centered trend in the face of increasing political determination of the burgeoning field. Nevertheless, the integration of historical, sociological and linguistic knowledge about totalitarian society on a firm factual ground remains the thing of the future. This book is the first step in this direction. By using history and theory of communication as an integrative

methodological device, it reaches out to those properties of totalitarian society which appear to be beyond the grasp of specific disciplines. Furthermore, this functional approach allows to extend the analysis of communicative practices commonly associated with fascist Italy, Nazi Germany and Soviet Union, to other locations (France, United States of America and Great Britain in the 1930s) or historical contexts (post-Soviet developments in Russia or

Kyrgyzstan). This, in turn, leads to the reevaluation of the very term »totalitarian«: no longer an ideological label or a stock attribute of historical narration, it gets a life of its own, defining a specific constellation of hierarchies, codes and networks within a given society.

Representations, Ideologies, Policies

Springer

This book offers both an understanding of newspaper reporting and a means for readers to develop their own critical

analysis. Using a wealth of contemporary case studies, students are taught how the language of journalism works, providing students with an accessible and user-friendly guide to analyzing newspapers around the globe.

Exploring the Social World in Canadian Contexts

Springer Science & Business Media

This book examines how Chinese-language newspapers across greater China report on severe mental illness, and why they do so in the

ways they do, given that reporting in local newspapers can strongly influence how Chinese readers view the illness. By assessing how the reporting in three leading broadsheet newspapers from mainland China, Hong Kong, and Taiwan constructs the illness, the book considers how the distinct social and political histories of the three culturally Chinese communities shape the reporting, and whether it bears out or contests the intense stigma against the illness that prevails

locally. The findings can usefully encourage and inform attempts to humanise, include, and empower those with a severe mental illness across greater China and the global Chinese diaspora. Employing a well-tested, transparent discourse analytic approach, the book also includes numerous Chinese-English bilingual news report extracts to illustrate its claims. As such, *Reporting Mental Illness in China* will be of interest to sinologists, discourse analysts,

mental health professionals and public health authorities across the globe, especially in places where there are large Chinese-speaking populations.

Description, Variation and Context Canadian Scholars' Press

This book deals with the construction of the 'other' in European media at a time when the recently expanded EU is facing new political, economic and social challenges. The aim of the book is to document the diverse discursive forms of

othering, ranging from differentiation to discrimination, that are directed against various 'other Europeans' in both institutionalized media and such non-elite semi-public contexts as discussion forums and citizen blogs. Drawing on data from British, Polish, French, Czech, Italian, Hungarian, Spanish and Estonian contexts, the individual papers investigate how various social groupings - regions, nations, ethnicities, communities, cultures - are discursively

constructed as 'outsiders' rather than 'insiders', as 'them' rather than 'us'. While most of the papers are grounded in linguistics and critical discourse studies, the book will also appeal to numerous other social scientists interested in the interface between language, media and social issues. Doing and Undoing Europe Macmillan International Higher Education The Routledge Companion to Media and Human Rights offers a comprehensive and

contemporary survey of the key themes, approaches and debates in the field of media and human rights. The Companion is the first collection to bring together two distinct ways of thinking about human rights and media, including scholarship that examines media as a human right alongside that which looks at media coverage of human rights issues. This international collection of 49 newly written pieces thus provides a unique overview of current

research in the field, while also providing historical context to help students and scholars appreciate how such developments depart from past practices. The volume examines the universal principals of freedom of expression, legal instruments, the right to know, media as a human right, and the role of media organisations and journalistic work. It is organised thematically in five parts: Communication, Expression and Human Rights Media Performance

and Human Rights: Political Processes Media Performance and Human Rights: News and Journalism Digital Activism, Witnessing and Human Rights Media Representation of Human Rights: Cultural, Social and Political. Individual essays cover an array of topics, including mass-surveillance, LGBT advocacy, press law, freedom of information and children's rights in the digital age. With contributions from both leading scholars and emerging scholars, the

Companion offers an interdisciplinary and multidisciplinary approach to media and human rights allowing for international comparisons and varying perspectives. The Routledge Companion to Media and Human Rights provides a comprehensive introduction to the current field useful for both students and researchers, and defines the agenda for future research. *The Palgrave Handbook of Infertility in History* Routledge
Are newspapers faced

with an existential threat or are they changing to meet the challenges of a digital world? With the newspaper's role in a state of fundamental redefinition, Newspaper Journalism offers a timely and up to the minute analysis of newspapers today, in the context of their historical importance to society. Drawing on their extensive experience in academia and also across local, national, mainstream and alternative newspapers, Cole and Harcup write clearly and engagingly

from both industry and scholarly perspectives, and contend that, far from dying, newspapers are doing what they have always done: adapting to a changing environment. This text is essential reading for all students of the press, with comprehensive and critical coverage of the most important debates in the study of newspaper journalism - from ethics and investigative journalism to political economy and the future of the industry. Given the shifting boundaries and

central importance of newspapers, it will be of interest to all students of journalism and the media. Praise for the Journalism Studies: Key Texts series: 'It is easy to describe a good textbook for a specific journalistic format... The ideal book has to satisfy a list of requirements that are also bullet-pointed in journalism assignment outlines. A text has to: synthesize the existing body of knowledge; explain concepts clearly; have a logical order of topics; and provide

enough information and directions to pursue further study. One may also hope it would include real life examples and be lucid, vivid and a pleasure to read. Hard to find? Not anymore. The new SAGE series Journalism Studies: Key Texts satisfies the main requirements on the list. Carefully planned and meticulously edited by Martin Conboy, David Finkelstein and Bob Franklin, the textbook series is a welcome contribution to the literature of journalism studies... All three books

follow the same structural template: an overview of historical development; explication of the political and economic frameworks within particular types of journalism; a review of contemporary practices; social demographics; a comparative analysis of practices around the world; a summary of main conceptual approaches; an indication of future directions; recommendations for further reading. This strong organization resembles a template for a course outline. This is

intentional because the series is aimed both at students and their practice-based lecturers, who often come straight from industry and need time to adjust to the academic environment... [The series] achieves its aim to bridge the sometimes too evident dissonance between journalism theory and practice... They successfully situate discussions about journalism in social and historical contexts. We see the faces of individual journalists, the

circumstances of news production, the relationship with owners, the battle between the public service and the profit nature of news, the relevance of journalism work. The detailed account of the conditions under which newspaper, radio and alternative journalism is produced and performed make the Journalism Studies: Key Texts series mandatory reading for both journalism students and their lecturers' - Verica Rupar, Journalism Studies *An Approach to*

Newspaper Performance Analysis Routledge
The push for evidence-based practice has increased the demand for high-quality occupational science and occupational therapy research from conceptualisation of the study through to publication. This invaluable collection explores how to produce rigorous qualitative research by presenting and discussing a range of methodologies and methods that can be used in the fields of occupational science and

therapy. Each chapter, written by an experienced researcher in the relevant methodology, includes examples of research, foundational knowledge and therapeutic applications. Including new and cutting-edge methodologies, the book covers: Qualitative Descriptive Grounded Theory Phenomenology Narrative Ethnography Action Research Case Study Critical Discourse Analysis Visual Methodologies Metasynthesis Appreciative Inquiry

Critical Theory and Philosophy Designed for occupational science and occupational therapy researchers, this book develops the reader's ability to produce and critique high quality qualitative research that is epistemologically sound and rigorous.

Eight Approaches for the Social Sciences

Routledge

Discourse Interpretation: Approaches and Applications provides new insights into the complex area of discourse interpretation in a wide

range of discourse types and genres. The authors adopt a variety of approaches to the representation and interpretation of meaning in discourse to share the understanding that discourse interpretation is a dynamic construct constantly open to reinterpretation in the light of the intentions and purposes of in particular social, historical and situational contexts. The chapters of the book comprise essays by linguists working in the fields of (critical)

discourse analysis, pragmatics, stylistics and sociolinguistics which address methodological issues in discourse interpretation (Part I) and explore various aspects of representation and interpretation of meaning in different genres of spoken and written discourse, namely conversational, academic, media, political and fictional discourse (Part II). This volume, which combines theoretical insights with empirical investigations, contributes to a better understanding

of the interpretative process and will be of interest to a wide range of researchers, scholars and students of English.

The SAGE Handbook of Qualitative Research

Design Springer

This book explores the problem-oriented interdisciplinary research movement comprised of Critical Discourse Analysis (CDA) and Critical Discourse Studies (CDS) for scholars, teachers, and students from many backgrounds. Beginning with a Preface by renowned CDA/CDS

scholar Ruth Wodak, it introduces CDA/CDS through examples of what its research looks like, delineates various precursors to CDA/CDS and important foundational concepts and theories, and traces its development from its early years until it became established. After the relationship between CDA and CDS is discussed, seven commonly cited approaches to CDA/CDS are outlined, including their connections and differences, their origins

and development, major and associated scholars, research focus(es), and central concepts and distinguishing features. After a summary of critiques of CDA/CDS and responses by CDA/CDS scholars, the book provides an overview of its salient connections to other interdisciplinary areas of scholarship such as critical applied linguistics, education, anthropology/ethnography, sociolinguistics, gender studies, queer linguistics, pragmatics and

ecolinguistics. The final chapter describes how scholars use their knowledge of CDA/CDS to make a difference in the world.

A Multidisciplinary

Introduction Routledge
Written by an international team of leading scholars, this groundbreaking reference work explores the nature of language change and diffusion, and paves the way for future research in

this rapidly expanding interdisciplinary field. Features 35 newly-written essays from internationally acclaimed experts that reflect the growth and vitality of the burgeoning area of historical sociolinguistics. Examines how sociolinguistic theoretical models, methods, findings, and expertise can be used to reconstruct a language's past in order to explain linguistic changes and

developments. Bridges the gap between the past and the present in linguistic studies. Structured thematically into sections exploring: origins and theoretical assumptions; methods for the sociolinguistic study of the history of languages; linguistic and extra-linguistic variables; historical dialectology, language contact and diffusion; and attitudes to language.
