As the team investigates, they discover

Forensics specialist Nita Tomlinson will need a faith deeper than she can imagine as she struggles with the past and a family that she can no longer ignore. #3 Blood Lines Commander Will Coburn's NCIS team is investigating the carjacking and assault of a young Marine and his wife. All evidence points to Bobby Lee Gant, son of the notorious

Meanwhile, in west Texas, Shel's father, Tyrel McHenry, struggles with his own demons as buried secrets from a war long since fought come to light. The path he chooses will

 This volume chronicles the maturation of the South Korean auto industry and its native automakers, from the 1997 Asian Crisis to 2019. After examining the context for domestic vehicle production in South Korea, the author presents multiple case studies for all five Korean automakers:

General Motors Korea/Daewoo Motors, Kia, Hyundai, Ssangyong and Renault Samsung. This includes coverage of Hyundai-Kia's foreign plants in North America, Europe, India, China, and Emerging Asia. The book closes by assessing the five-to-ten-year future outlooks for Korean automakers at home and abroad. This important work will prove informative to scholars of

business, management, automotive history, international development, Asian studies, and public administration .

 Synonyme de sophistication, de haute technologie et de prix élevés, l'innovation cherche aujourd'hui ses ruptures dans des formes de valorisation de l'offre délaissées par la concurrence et l'accès à de

nouveaux clients. L'épopée de la Logan constitue un archétype de ces nouvelles trajectoires de l'innovation et dessine de nouvelles frontières pour l'industrie. Pourquoi et comment une entreprise comme Renault s'est-elle lancée dans cette aventure ? Comment a-t-elle surmonté les surprises et les obstacles qui l'ont jalonnée pour devenir l'une des success story les plus spectaculaires de ce début du XXI<sup>e</sup> siècle ? Quelles sont les suites possibles d'un succès qui déstabilise le modèle de développement traditionnel des entreprises industrielles européennes ? Au terme d'une enquête approfondie dans les coulisses de Renault et Dacia, les trois auteurs, économistes et gestionnaires spécialistes de l'industrie automobile, apportent des réponses à ces questions. Ils analysent la réalisation de ce projet, sous l'angle de la conception du produit, du développement industriel et de son déploiement commercial. Au travers d'entretiens exclusifs avec la plupart des acteurs de ce projet, en particulier, les trois dirigeants qui ont joué un rôle clé dans l'histoire du projet Logan, Louis Schweitzer, Jean-Marie Hurtiger et Gérard Detourbet, découvrez les

secrets de cette success story. Illustré de nombreux graphiques et de documents inédits, l'ouvrage montre comment la stratégie Logan a émergé et s'est développée dans l'entreprise, comment elle a su percevoir les tendances des marchés émergents, relever des défis de conception jugés impossibles (réaliser une « vraie » voiture rentable à 5000€), construire et déployer des

systèmes industriels et commerciaux, dotant l'entreprise d'une dimension internationale inédite jusqu'à là. Dans le contexte actuel, cet ouvrage apporte, bien au-delà de l'industrie automobile, des réponses à tous ceux qui s'interrogent sur la déstabilisation actuelle des équilibres économiques mondiaux et le rôle qu'y jouent les processus d'innovation des

entreprises. *Which Way Next?* Dunod For more than thirty-seven years, millions of consumers have turned to Edmunds buyer's guide for their shopping needs. Plunkett Research, Ltd. Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and

thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines

each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian

brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American

model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM. **L'impreditore quaternario.
