Ausgewählte Arbeiten zur Zahlentheorie
und zur Geometrie Springer Science &
Business Media

This is an open access book. Uncovering
the Languages, Sciences, and Teaching
profession Practice during the Covid-19
Pandemic.

*Alte und neue ungelöste Probleme in der
Zahlentheorie und Geometrie der Ebene*
FinanzBuch Verlag

This is an open access book. It has been
two years since the COVID-19 pandemic
swept across the world. This has more or
less left a mark of memories and trauma
for more or fewer people. This pandemic
reminds people around the world that
there are things that can happen without
people knowing it. People start to worry
and pessimistically see the uncertainty

that lies in the future. To deal with this, a
strategy is needed through educational
innovation and social science to answer
and face the challenges of uncertainty in
the future. Breakthroughs in education
and social science are the most strategic
ways to build and enhance human
capacity to solve problems, environmental
and social problems. The spirit of
innovation, rising from an economic
downturn, the use of technology is
obtained through the role of educational

institutions. This can be interpreted that innovation in education and social science produces superior humans, who have good behavior, and wise humans. So that in the face of uncertainty in the post-pandemic period, humans have strategies and become more prepared. To find out more about strategies for dealing with and responding to future uncertainties after the pandemic through educational innovations and social science, it is necessary to conduct research or studies that discuss these matters and be published widely. To support this, Universitas PGRI Yogyakarta held an international conference and Call for Papers The 1st UPY International Conference on Education and Social Science (UPINCESS) "Strategies to Deal with Uncertainty through Education and Social Science Innovation" on June 15, 2022.

Ludwig Schläfli (1814 bis 1895) Springer-Verlag

'How to Create High Quality Teaching and Learning in Digital Era: Teachers', Students' and Parents' Perspectives' presents a collection of works by authors in the field of education, like from the field

of language teaching, mathematics education, early childhood education, TPACK, parental involvement, and the use of technology. The book was especially written during the outbreak of the COVID-19 where classes were moved to online classes. This extreme change has led to different reactions from all elements of education; students, teachers, and parents. Some common reactions observed by the works in this edited book include hesitation, skepticism, puzzlement, but some reacted positively, with excitement and enthusiasm. Indonesia has experienced a period with massive online courses and classes during the two years of pandemic. Despite the initial shock, Indonesia has proved to survive and made this a golden period in which many innovative teaching ideas were created. Indonesia has also accelerated its adaptation of technology to teaching during this time. This book is therefore presented to you to discuss how technology is integrated in education from different perspectives.

Über polare fünffache und sechsfläche räumlicher reciprocitäten
Springer-Verlag

This book contains the proceedings of the The 5th Annual International Seminar on Trends in Science and Science Education (AISTSSE) and The 2nd International Conference on Innovation in Education, Science and Culture (ICIESC), where held on 18 October 2018 and 25 September 2018 in same city, Medan, North Sumatera. Both of conferences were organized respectively by Faculty of Mathematics and Natural Sciences and Research Institute, Universitas Negeri Medan. The papers from these conferences collected in a proceedings book entitled: Proceedings of 5th AISTSSE. In publishing process, AISTSSE and ICIESC were collaboration conference presents six plenary and invited speakers from Australia, Japan, Thailand, and from Indonesia. Besides speaker, around 162 researchers covering lecturers, teachers, participants and students have attended in this conference. The researchers come from Jakarta, Yogyakarta, Bandung, Palembang, Jambi, Batam, Pekanbaru, Padang, Aceh, Medan and several from Malaysia, and Thailand. The AISTSSE meeting is expected to yield fruitful result from discussion on various issues dealing

with challenges we face in this Industrial Revolution (RI) 4.0. The purpose of AISTSSE is to bring together professionals, academics and students who are interested in the advancement of research and practical applications of innovation in education, science and culture. The presentation of such conference covering multi disciplines will contribute a lot of inspiring inputs and new knowledge on current trending about: Mathematical Sciences, Mathematics Education, Physical Sciences, Physics Education, Biological Sciences, Biology Education, Chemical Sciences, Chemistry Education, and Computer Sciences. Thus, this will contribute to the next young generation researches to produce innovative research findings. Hopely that the scientific attitude and skills through research will promote Unimed to be a well-known university which persist to be developed and excelled. Finally, we would like to express greatest thankful to all colleagues in the steering committee for cooperation in administering and arranging the conference. Hopefully these seminar and conference will be continued in the coming years with many more insight articles from

inspiring research. We would also like to thank the invited speakers for their invaluable contribution and for sharing their vision in their talks. We hope to meet you again for the next conference of AISTSSE.

Beweise ohne Worte Springer Nature Proceedings of the 7th Annual International Seminar on Transformative Education and Educational Leadership (AISTEEL 2022) contains several papers that have presented at the seminar with theme "Technology and Innovation in Educational Transformation". This seminar was held on 20 September 2022 and organized by Postgraduate School, Univesitas Negeri Medan and become a routine agenda annually. The 7th AISTEEL was realized this year with various presenters, lecturers, researchers and students from universities both in and out of Indonesia. The 7th AISTEEL presents 4 distinguished keynote speakers from Universitas Negeri Medan - Indonesia, Murdoch University-Australia, Curtin University Perth-Australia, University Malaya - Malaysia, Monash University - Australia, and Tampere University of Applied Sciences, Finland. In addition,

presenters of parallel sessions come from various Government and Private Universities, Institutions, Academy, and Schools. Some of them are those who have sat and will sit in the oral defence examination. The plenary speakers have been present topics covering multi disciplines. They have contributed many inspiring inputs on current trending educational research topics all over the world. The expectation is that all potential lecturers and students have shared their research findings for improving their teaching process and quality, and leadership. There are 162 papers passed through rigorous reviews process and accepted by the committee. All of papers reflect the conference scopes by follow: Teachers Education Model in Future; Education and Research Global Issue; Transformative Learning and Educational Leadership; Mathematics, Science and Nursing Education; Social, Language and Cultural Education; Vocational Education and Educational Technology; Economics, Business and Management Education; Curriculum, Research and Development; Innovative Educational Practices and Effective Technology in the Classroom;

Educational Policy and Administration Education.

Proceedings of the 6th International Conference on Learning Innovation and Quality Education (ICLIQE 2022) Springer-Verlag

Buku yang mengulas konsep bangun ruang dipadukan dengan pendekatan STEM (Science, Technology, Engineering, dan Mathematics) ini terdiri dari 9 bab yang masing-masing bab terdiri atas materi, rangkuman, contoh soal, dan latihan soal. Bab 1 membahas Unsur-unsur Bangun Ruang, Bab 2 membahas Ketegaklurusan, Bab 3 membahas Kubus, Bab 4 membahas Balok, Bab 5 membahas Prisma, Bab 6 membahas Limas, Bab 7 membahas Benda Putar, Bab 8 membahas Kerucut, dan Bab 9 membahas Bola. Harapan penulis kepada pembaca adalah pembaca mampu memahami dan memiliki daya tanggap ruang yang baik, menguasai konsep dan mampu memecahkan persoalan yang berkaitan dengan bangun ruang. Buku ini bisa menjadi salah satu sumber belajar untuk memperdalam pengetahuan tentang konsep bangun ruang berbasis pendekatan STEM.

Proceedings of the 4th International

Conference on Innovation in Education, Science and Culture, ICIESC 2022, 11 October 2022, Medan, Indonesia Springer Nature

This is an open access book. The 6th International Conference on Learning Innovation and Quality Education (ICLIQE 2022) is organized by Faculty of Teacher Training and Education. The purpose of the ICLIQE 2022 activity is as a forum to accommodate researchers, academics, educators and education staff, consultants, government and other stakeholders to share perspectives related to educational trends seen from the perspective of society 5.0 era which includes the fields of science and technology education, social and humanities, management education, basic education, special education, early childhood education, guidance and counseling, curriculum, and educational evaluation and innovation.

Encyklopädie der Mathematischen Wissenschaften mit Einschluss ihrer Anwendungen European Alliance for Innovation

Sie rätseln gerne und haben ein Faible für Mathematik? Mit den Grafiken dieses

Buches finden Sie einen eleganten Zugang zu ausgewählten mathematischen Kostbarkeiten. Die gesammelten Illustrationen sind nicht nur schön anzusehen, sie helfen auch beim Verstehen von Formeln und bebildern erstaunliche Zusammenhänge. Beweise ohne Worte animieren zum selbstständigen Nachdenken über Mathematik und geben Anstoß zu vollständigen Beweisen. Diese Sammlung bietet Beispiele auf allen Niveaus aus unterschiedlichen Disziplinen: Sie lernen Spannendes über Geometrie, Kombinatorik, Arithmetik und Analysis kennen. Dieses Potpourri von bildlichen Beweisen visualisiert kleine Knocheleien und bekannte Schulmathematik in neuem Gewande, aber auch anspruchsvolle Mathematik, wie sie im Studium auftritt. Und Sie bekommen Lust, sich selbst Gedanken für weitere Beweise ohne Worte zu machen.

Springer Nature Cognitive mathematics provides insights into how mathematics works inside the brain and how it is interconnected with other faculties through so-called blending and other associative processes. This

handbook is the first large collection of various aspects of cognitive mathematics to be amassed into a single title, covering decades of connection between mathematics and other figurative processes as they manifest themselves in language, art, and even algorithms. It will be of use to anyone working in math cognition and education, with each section of the handbook edited by an international leader in that field.

Proceedings of the 3rd International Conference on Education and Technology (ICETECH 2022) European Alliance for Innovation

This volume contains the work of the great Swiss mathematician on differential geometry, a field marked by some of his greatest achievements. Between 1690 and 1700, Jacob Bernoulli published twelve treatises in the scientific journal *Acta Eruditorum* on the use of infinitesimal methods to answer geometrical questions. Preparatory notes for most of these papers and on many other themes are found in Bernoulli's scientific diary *Meditationes*, from which twenty-nine texts are published here for the first time. Among the curves considered are the isochrones (lines of

constant descent), the parabolic spiral, the loxodrome, the cycloid, the tractrix, and the logarithmic spiral (Bernoulli's *spira mirabilis*, which also adorns his tombstone). The description of these curves by differential equations and by geometrical constructions, their rectification and quadrature, and the determination of their evolutes and caustics offered Bernoulli and his colleagues a range of challenging problems, many of them relevant for mechanical or optical applications. The French mathematician André Weil, who lived in the United States until his recent death, has greatly influenced 20th century mathematics, among other things, as a founding member of the Bourbaki group. For many years he has pursued intensive studies of the history of mathematics, especially number theory and algebraic geometry. Weil's introduction to this volume places Jacob Bernoulli's contribution to differential geometry in a line of development from Descartes, Huygens and Barrow through Newton's and Leibniz's epochal innovations right up to the codification of the subject by Euler. Martin Mattmüller, secretary of the

Bernoulli Edition at Basel, edited the source text. His commentaries consider particular topics in differential geometry with reference to their historical context at the end of the 17th century.

Elemente der absoluten Geometrie

European Alliance for Innovation

Die meisten Menschen erinnern sich an Geometrie als sterile Übungen im Staub der neunten Klasse. Eine obskure Reihe an seltsamen Schritten zu noch unverständlicheren Beweisführungen, nur um eine Tatsache über Dreiecke zu zeigen, Ihnen von vornherein klar war. Und doch ist das nur ein winziger Teil der eigentlichen Geometrie. Jordan Ellenberg - einer der führenden Mathematiker unserer Zeit - offenbart in *Shape*, dass es die Geometrie ist, die hinter einigen der wichtigsten wissenschaftlichen, politischen und philosophischen Probleme steckt, denen wir gegenüberstehen: Wie sollte eine Demokratie ihre Vertreter wählen? Wie kann man verhindern, dass eine Pandemie die Welt überschwemmt? Wie lernen Computer? Können antike griechische Proportionen den Aktienmarkt vorhersagen? Was sollten Kinder in der Schule lernen, wenn sie wirklich denken

lernen wollen? Alles Fragen zur Geometrie. Denn schon das Wort »Geometrie« kommt aus dem Griechischen und bedeutet »Vermessung der Welt«. Und selbst das ist eine Untertreibung: Denn die Geometrie misst die Welt nicht nur, sie erklärt sie auch. Jordan Ellenbergs Blickwinkel auf die Welt bietet eine radikal andere Perspektive auf die verborgene Geometrie hinter Biologie, Strategie, Information, Demokratie und eigentlich – absolut allem.

The proceedings of International Conference on Science, Education, and Technology 2019 are the compilation of articles in the internationally refereed conference dedicated to promote acceleration of scientific and technological innovation and the utilization of technology in assisting pedagogical process.

Analytische Geometrie der höheren ebenen Kurven Springer Nature
This is an open access book. The first Nusa Tenggara International Conference on Chemistry (1st NITRIC), which will take place in Lombok, Indonesia, on July 28 and 29, 2022. The conference organized by Department of Chemistry Education, Faculty of Teacher Training and Education, University of Mataram, Indonesia. Collaborations on the conference have been made with PP Savani University, Veer Narmad South Gujarat University in India, and the Indonesian Chemical Society-Nusa Tenggara Chapter. The conference aims to bring synergy between research and industry by disseminating research findings from universities, research centers, and government bodies. The conference will give attendees the chance to learn about more environmentally friendly and effective technologies in the areas of chemistry, chemical process, and engineering in the spirit of green chemistry, chemical, and industrial process for a sustainable and brighter future. The first NiTRIC 2022 offers a platform for scientists from other countries to share and discuss their most recent

research and expertise through oral and poster presentations. These scientists include chemists, material scientists, engineers, undergraduate, graduate (master's and doctoral) students, and scientists from research centers and industries. In addition, international keynote and invited speakers from a variety of fields will attend the plenary session to offer their knowledge. All papers will be published in conference proceedings, and following peer review, the best articles will be published in indexed journals by Scopus.

Die geometrie der lage Springer Nature
This is an open access book. The development and use of new technologies have accelerated considerably in recent decades. Researchers and experts are encouraged to innovate in across fields in support of sustainable development (SDGs) especially in education. The 3rd International Conference on Education and Technology (ICETECH 2022), organized by Universitas PGRI Madiun (UNIPMA) Indonesia, accommodates researchers, experts, academics, educators, stakeholders, and students to exchange experiences through research results in

TEAM Based Education, Digital Literacy in Education, Applied Science in Education, Digital Education, Curriculum and Instruction, Social Science Education.

Grundzüge einer allgemeinen Theorie der Oberflächen in synthetischer Behandlung
Springer-Verlag

Dieses dem 125. Geburtstag H.

Minkowskis gewidmete Buch enthält neben fotomechanischen Nachdrucken seiner wichtigsten Arbeiten Fotos und einige Briefe. Beigefügt ist auch D. Hilberts Gedächtnisrede, die den Menschen H. Minkowski in gleicher Weise würdigt wie sein wissenschaftliches Werk. Im Anhang finden sich aktuelle Anmerkungen zu den Arbeiten, zu ihren Beziehungen untereinander und zu

Weiterentwicklungen der Theorien. Ein umfangreiches Literaturverzeichnis soll dem interessierten Leser Hilfe zur weiteren Orientierung sein. "Seit meiner ersten Studienzeit war mir Minkowski der beste und zuverlässigste Freund, der an mir hing mit der ganzen ihm eigenen Tiefe und Treue. Unsere Wissenschaft, die uns das liebste war, hatte uns zusammengeführt; sie erschien uns wie ein blühender Garten ... Gern suchten wir

aber auch verborgene Pfade auf und entdeckten manche neue, uns schön dünkende Aussicht, und wenn der eine dem andern sie zeigte, und wir sie gemeinsam bewunderten, war unsere Freude vollkommen." David Hilbert#1
Die Geometrie der Lage Springer-Verlag
We are delighted to present the Proceedings of the 4th International Conference on Innovation in Education, Science and Culture (ICIESC) that organized by Research and Community Service Centre of Universitas Negeri Medan (LPPM UNIMED). Proceedings of the 4th ICIESC contains several papers that have presented at the seminar with theme Education and Science in time of uncertainty: Recovering for the Future. This conference was held on 11 October 2022 virtually and become a routine agenda annually. The 4th ICIESC was realized this year with various presenters, lecturers, researchers and students from universities both in and out of Indonesia. The 4th International Conference on Innovation in Education, Science and Culture (ICIESC) 2022 shows up as a Mathematics and Natural Science, Material Science, Physics Education, Biology

Education, Chemistry Education, Vocational Education, Applied Sciences-Computers, Multimedia Technology, Applied Mathematics, E-learning system, Applied Sciences-Information Technology, Applied Sciences-Engineering, Social Science and Humanities, Management Innovation and Heritage Culture research platform to gather presentations and discussions of recent achievements by leading researchers in academic research. With the number participants 260 participants, who came from the various national and international universities member, research institute, and academician. There are 181 papers passed through rigorous reviews process and accepted by the committee. All of papers reflect the conference scopes and become the latest trend. It has been our privilege to convene this conference. Our sincere thanks, to the conference organizing committee; to the Program Chairs for their wise advice and brilliant suggestion on organizing the technical program and to the Program Committee for their through and timely reviewing of the papers. Recognition should go to the Local Organizing Committee members who have

all worked extremely hard for the details of important aspects of the conference programs and social activities. We welcome you to read this proceeding and hope the reader can find according to your interests and scientific field.

How to create high quality teaching and learning in the digital era : teachers, students and parents' perspectives Springer Nature

This is an open access book. This is the first annual conference of Islamic education organized by Faculty of Tarbiyah and Teacher Training, UIN Kiai Haji Achmad Siddiq Jember. This conference is a forum held to bring together various academics, researchers, lecturers, and practitioners, especially in the scope of Islamic education to discuss various contemporary issues related to the development of the world of Islamic

education in the era of global transformation. This event can give you a valuable opportunity to share ideas, ideas, research results, theories, and various other contributions in the academic world. It can also encourage you to increase the network of collaborative relationships between researchers and other writers to build partnerships.

Vorlesungen über Geometrie unter Besonderer Benutzung der Vorträge

European Alliance for Innovation The 2nd Universitas Kuningan International Conference on System, Engineering, and Technology (UNISET) will be an annual event hosted by Universitas Kuningan. This year (2021), will be the second UNISET will be held on 2 December 2021 at Universitas Kuningan, Kuningan, West Java, Indonesia. "Opportunity and

challenge in environmental, social science and humanity research during the pandemic Covid-19 era and afterward" has been chosen at the main theme for the conference, with a focus on the latest research and trends, as well as future outlook of the field of Call for paper fields to be included in UNISET 2021 are: natural science, education, social science and humanity, environmental science, and technology. The conference invites delegates from across Indonesian and South East Asian region and beyond, and is usually attended by more than 100 participants from university academics, researchers, practitioners, and professionals across a wide range of industries.
