 This text covers the basic
 facts and interpretation of
 microscopic anatomy. It
 emphasizes the
 relationship and concepts
 by which cell and tissue
 structure are inextricably
 linked with their function.
 Numerous
 photomicrographs and
 electron micrographs
 should amplify the text
 and remind the user of
 the laboratory basis of the
 study of histology. An
 atlas section containing
 105 color plates is also
 included. Emphasis on
 diagrams, illustrations,
 and charts that
 summarize morphologic
 and functional features of
 cells, tissues, and organs,
 and inclusion of clinical
 correlations in each
 chapter to further
 illustrate the direct
 application of basic
 histological information to
 diagnosis, prognosis,
 pathobiology, and clinical
 aspects of disease, should
 appeal to students, who
 are anxious to see how
 the basic sciences taught
 in the first two years of
 medical school relate to
 the clinical aspects
 thereafter.

Air Bags & On-off Switches: Information for an Informed Decision

CarTech Inc
This book provides a wealth of detailed information that collectors, investors, and restorers of imported cars will not find in any other book. This massive volume spans the marques of imported vehicles. The list includes such familiar names as Alfa Romeo, Aston Martin, Bentley, Citroen, Jaguar, Lamborghini, Porsche, Rolls-Royce, Saab, and Volkswagon. Also in these pages, you'll find details on such lesser-known yet no less intriguing marques as Abarth, DAF, Frazer Nash, Humber, Iso, Nardi, Panhard, Peerless, Sabra and Skoda. The book also highlights model changes and corporate histories and provides value information on the most popular models of imported cars.

Catalyst Deactivation 1994 was an expansion of earlier, highly successful symposia. The objective of the symposium was to promote a scientific approach of the phenomenon of catalyst deactivation which will

contribute to the development of catalysts which are less subject to structural transformations and more resistant to poisons and coke formation. These aspects are dealt with in 12 plenary lectures, 48 oral presentations and 35 poster papers, which were critically selected from an impressive response from some 30 countries. Both fundamental and applied aspects were covered. The deactivation of catalysts in important industrial processes like fluid bed catalytic cracking hydrotreatment, hydrodesulfurization, catalytic reforming, hydrodenitrogenation, steam reforming, hydrodemetallization, hydrocracking, Fischer-Tropsch synthesis, propane dehydrogenation, phthalic anhydride synthesis received considerable attention. Mechanisms of poisoning, sintering and coking were further investigated and modelled and new experimental techniques for the characterization and the quantification of deactivation were also introduced.
