GAEL ERICK

Elsevier Health Sciences
MCEM Part C: 110 OSCE Stations offers a complete and practical skills guide for trainees preparing for the MCEM OSCE exam. Presented in a clear layout, chapters are mapped to the exam circuit to provide structured revision in all the syllabus topics. Featuring a wealth of practice stations, this book provides the essential clinical knowledge and practical

skills necessary to succeed in the MCEM Part C OSCE exam. 110 practice stations, reflecting the breadth of skills and topics tested in the actual exam Provides concise summaries of all the stations examined, including history taking, communication skills and procedures Addresses every aspect of the exam, including the circuit, content and marking Highly illustrated to improve understanding of key concepts
In Manufacture, Formulation and Clinical Use Elsevier Health Sciences
A solid knowledge base and good clinical skills don't necessarily guarantee examination success in the long case

OSCE. This book is the ultimate guide for medical students needing to combine their knowledge and skills with an ability to interpret the clinical findings, the proficiency to present them clearly and the confidence to deal with the examiners questions. Adopting a proven, highly effective approach, this revision aid uses role play with simulated patients to hone clinical examination and presentation skills. The fifty cases are divided into six areas: cardiology, respiratory, abdomen, neurology, musculoskeletal and surgery. Written by successful candidates and examiners, the guide poses a number of

important and commonly asked examination questions for each case to assist in preparation and confidence, and model answers are provided to ensure an understanding of exactly what is required. Working in groups or independently, students will welcome the large, colourful format, the breakdown of marking schemes, an overview of examiners expectations, a guide to presenting clinical findings and innumerable 'insider' tips throughout. See accompanying video here:

Integrated Pharmacy Case Studies Scion Publishing

This book is a printed edition of the Special Issue "Competence Training for Pharmacy" that was published in Pharmacy

Clinical Pharmacy and Therapeutics John Wiley & Sons

OSCEs for Medical Finals has been written by doctors from a variety of specialties with extensive experience of medical education and of organising and examining OSCEs. The book and website package consists of the most common

OSCE scenarios encountered in medical finals, together with checklists, similar to OSCE mark schemes, that cover all of the key learning points students need to succeed. Each topic checklist contains comprehensive exam-focussed advice on how to maximise performance together with a range of 'insider's tips' on OSCE strategy and common OSCE pitfalls.

Designed to provide enough coverage for those students who want to gain as many marks as possible in their OSCEs, and not just a book which will ensure students 'scrape a pass', the book is fully supported by a companion website at

www.wiley.com/go/khan/osces, containing: OSCE checklists from the book A survey of doctors and students of which OSCEs have a high chance of appearing in finals in each UK medical school

A Bailey & Love Revision Guide, Second Edition Oxford University Press

This is a fully updated edition of the hugely successful OSCEs for the MRCS Part B: A Bailey and Love Revision Guide. The content has been revised in line with recent changes to the examination, such as the introduction of microbiology and applied surgical sciences and changes

from patient safety to clinical and procedural skills. Popular with trainee surgeons preparing for the oral element of the MRCS (the objective structured clinical examination, or OSCE), this revision guide will maximise the chances of success in surgical examinations.

Essentials of Pharmaceutics Churchill Livingstone

Suitable for undergraduate BDS exam-takers, postgraduate MFDS exams, and overseas candidates sitting their IQEs, this book offers a revision text developed by dentists focussed on getting students through their dental OSCE exams.

Clinical Examination, Communication Skills and History Taking CRC Press

Presented in a structured question-and-answer format, the first book of this comprehensive reference addresses the revised syllabus of the Membership of the Royal College Surgeons' (MRCS) Objective Structured Clinical Examination (OSCE). Beneficial to MRCS OSCE candidates as well as to surgeons, doctors, and medical practitioners, this didactic guide covers the important aspects of surgical radiology, applied surgical science, critical care, anatomy, surgical pathology,

operative surgery, surgical skills, principles of surgery, and patient safety. Chapters on communication skills, ethics, and history-taking skills are also included. *An Aid to the MRCS OSCE* Pharmaceutical Press

A comprehensive guide to the Final FRCEM examination, *OSCE Revision for the Final FRCEM* covers over 100 topics in emergency medicine. It is mapped to the curriculum for the Royal College of Emergency Medicine, and is structured by the domains in the syllabus. Ideal for helping you practice in pairs or groups, each topic starts with a clinical situation for the candidate, instructions for an actor or revision buddy, and a mark sheet so you can score yourself effectively against the FRCEM criteria. Each question contains a pie chart to demonstrate how the marks will be assigned so you know where to focus your efforts. Topics include learning points so you can learn about the nuances of the stations and improve your answer next time. References to guidelines or evidence-based rules are included to further your study. Written by a team of authors who have successfully passed their FRCEM examination, *OSCE Revision*

for the Final FRCEM will give you all the essential tips, insights, and guidance you need for thorough exam preparation.

MRCS Part B OSCEs CRC Press

Now in its fourth edition, this best-selling book is fully updated to address the ever increasing demands on healthcare professionals to deliver high-quality patient care. A multitude of factors impinge on healthcare delivery today, including an ageing population, more sophisticated medicines, high patient expectation and changing health service infrastructure. Time demands on primary care doctors have caused other models of service delivery to be adopted across the world, leading to ongoing changes in the traditional boundaries of care between doctors, nurses, and pharmacists. Certain medical tasks are now being performed by nurses and pharmacists, for example prescribing. Healthcare policies to encourage patients to manage their own health have led to more medicines becoming available over the counter, allowing community pharmacists to manage and treat a wide range of conditions. Further deregulation of medicines to treat acute illness from

different therapeutic areas seems likely.

Government policy now encourages chronic disease management as a self-care activity, and could well be the largest area for future growth of reclassification of medicines. Pharmacists, now more than ever before, need to be able to recognise the signs and symptoms, and use an evidence-based approach to treatment. Community Pharmacy is intended for all non-medical prescribers but especially for pharmacists, from undergraduate students to experienced practitioners. Key features
 Guidance for arriving at a differential diagnosis
 Practical prescribing tips
 Trigger points for referral boxes
 Other hints and tips boxes
 Specific questions to ask boxes
 Case studies
 Self-assessment questions
 Consistent approach gives: Anatomy overview
 History taking and physical examination
 Prevalence and epidemiology
 Aetiology
 Arriving at a differential diagnosis
 Clinical features
 Conditions to eliminate
 Likely causes
 Unlikely causes
 Very unlikely causes
 Evidence base for OTC medicine
 Practical prescribing and product selection
 More on the examination of eyes, ears and mouth
 New sections on future-proofing (vaccinations etc.)
 New

material covering inter-professional education for clinical skills. Now on StudentConsult

Pharmacy OSCEs A Revision Guide Pharmaceutical Press

FASTtrack Applied Pharmaceutical Practice Anshan Pub

Fully updated to reflect NHS moves to encourage greater self-care and more use of over-the-counter remedies Informed by the experiences and expertise of seasoned pharmacists and GPs, this reference guide provides pharmacists working in the community with the treatment information they need when they need it. Each chapter incorporates a decision-making framework which distills the information necessary for treatment along with suggestions on “when to refer” set off in summary boxes.

Elucidating case studies are provided throughout, in which pharmacists and doctors describe, in their own words, listening to and treating patients suffering with a range of common problems, from migraine to eczema to IBS. The indispensable guide to assessing and managing common symptoms seen in the

pharmacy Includes information about medicines recently reclassified for OTC supply such as those for malaria prophylaxis and erectile dysfunction Now includes more highlights of “Red Flag” signs and symptoms Covers respiratory, gastrointestinal, skin, ear and eye, cardiovascular, and pain conditions Offers specific recommendations for women’s, men’s and children’s health problems Provides decision making support for cases involving ethical dilemmas Features a visual display of relevant treatment guidelines Emphasizes the evidence base for OTC medicines With expert coverage of most common ailments which will be encountered by pharmacists on a daily basis, *Symptoms in the Pharmacy*, 8th Edition is a professional resource you’ll want to keep close at hand for frequent consultation.

The Easy Guide to OSCEs for Final Year Medical Students Oxford University Press

Radiology now forms part of the core curriculum and is assessed in the final medical OSCE. This book includes 100 radiology cases that medical students are likely to encounter in their exams. The

book is primarily image based, presenting a clinical history, description of findings and discussion for each image. Critically, the images include modern techniques such as CT and MRI in addition to more traditional photography, and the book helps students recognise and interpret abnormal image findings as well as increasing their factual knowledge. This book is vital reading for final year medical students approaching their final OSCE, and also for junior doctors who need a radiology quick reference guide in clinical practice. It can also be used to supplement *MRCS Picture Questions Book 1* (see below) by candidates revising for the MRCS examination.

Basic Science for the MRCS CRC Press Revised and expanded for the second edition, *ENT OSCEs* is an established full-colour revision guide covering all aspects of the DO-HNS and MRCS (ENT) OSCE. Written by a team of ENT specialty registrars, this accessible text follows a step-by-step approach with each test OSCE station based on the style of past questions. This new edition features more written stations, clinical examination walk-throughs and communication skills

stations. With over 100 colour images, ENT OSCEs remains unrivalled as a tool with which to prepare for ENT exams. It is essential reading for candidates of the DOHNS/MRCS (ENT) and will also aid trainees in preparation for specialty registrar national selection interviews. It is highly recommended for GPs wishing to refresh their knowledge of how to assess common ENT problems and will also be an ideal reference for any junior doctor learning to take histories and examinations in their first ENT post. Finally, it is an invaluable resource for medical students undertaking their ENT attachment and in preparation for final examinations.

Physical Examination for Surgeons

Elsevier Health Sciences

This book is a concise revision guide to the core basic sciences - anatomy, physiology and pathology - which comprise the essential knowledge required by the trainee entering the specialty of surgery. It has been written in a style to facilitate easy learning of the essential facts, with indications of both their clinical relevance and importance. This book concentrates on those topics which tend to be recurring examination themes for initial surgical

training. It will be an invaluable resource for the basic surgical trainee studying for the Intercollegiate MRCS examination, as well as proving useful for those in higher surgical training and for the surgically inclined, well-motivated student. The book covers in one volume all the essentials of the basic sciences - anatomy, physiology and pathology - to aid the candidate for the MRCS examination. In covering the applied basic science the book explains the application and clinical relevance of the three sciences. The text is written in an appropriate 'bullet-point' style to allow easy reading and rapid exam preparation. The contents concentrate on the recurring common themes of the examination, thus helping direct appropriate learning and focussing on the specific important areas of knowledge. The book is illustrated with line drawings which are clearly annotated to aid learning. In this Second Edition, chapters have been updated and sections expanded to cover topics which are particularly relevant to examinations. The microbiology chapter has been rewritten, and the section on skin healing has also been extensively rewritten to include a section on burns, skin grafting and the

anatomy of flaps. Each chapter has new OSCE scenario questions added to bring together the basic science and its clinical application in OSCE examinations.

DrExam Part B MRCS OSCE Revision Guide Book 2

Radcliffe Publishing

The Unofficial Guide to Prescribing lays out the practical steps of how to assess, investigate and manage a patient, with a focus on what to prescribe and how to prescribe it. Its aim is to empower newly graduated junior doctors to excel at dealing with emergencies and handling complex prescribing scenarios. Prescribing errors cost healthcare systems millions annually, so early training in prescribing has become an urgent priority of medical education and now forms an essential part of teaching and assessment. The Unofficial Guide to Prescribing (from the same stable as The Unofficial Guide to Passing OSCEs) is a new book designed to address this requirement. It is written by junior doctors still close to the transition from theory to practice, overseen by a review panel of senior clinicians to ensure accuracy, and designed to help medical students practise and learn as much as possible about prescribing, in actual clinical scenarios,

before they have to do it for real. Each scenario is presented as you would see it in the hospital setting and covers: Initial step-by-step assessment of the patient: how to assess, assessment findings, and immediate management Initial investigations Initial management Reassessment Treatment Handing over the patient 'Prescribe' alerts throughout Written-up drug charts Blank drug charts for copying and practice

A Guide to Passing the DO-HNS and MRCS (ENT) OSCE, Second Edition Libri Pub Limited

Revision guide for students giving points of basic information on applied pharmacy practice followed by questions and answers.

OSCEs for the MRCS Part B Cambridge University Press

An introduction to pharmaceutical chemistry for undergraduate pharmacy, chemistry and medicinal chemistry students. Essentials of Pharmaceutical Chemistry is a chemistry introduction that covers all of the core material necessary to provide an understanding of the basic chemistry of drug molecules. Now a core text on many university courses, it

contains numerous worked examples and problems. The 4th edition includes new chapters on Chromatographic Methods of Analysis, and Medicinal Chemistry - The Science of Drug Design.

Short and OSCE Cases in Internal Medicine Clinical Exams Pharmaceutical Press

This book aims to provide an easily accessible quick reference guide for advanced nursing students preparing to undertake practical examinations to assess advanced clinical practice competence, and students preparing for practical examinations in non-medical prescribing assessment. These examinations are commonly known as objective structured clinical examinations (OSCEs). The book is a preparation and revision tool, designed to be read in conjunction with any recommended core clinical textbooks: however, along with giving students step-by-step instructions on performing well in OSCE scenarios, it also gives guidance to academic staff on preparing to teach and mark OSCEs. This book uses a case study approach to OSCEs in a coherent, consistent, and easily understandable style. Both authors are clinical academic nurse practitioners who

regularly work in clinical practice in conjunction with teaching advanced nurse practitioner and non-medical prescribing students.

Symptoms, Diagnosis and Treatment Pharmaceutical Press

This is a practical revision book for learning techniques to pass clinical examinations in all the major clinical subjects for final examinations. The book covers Medicine, Surgery, Obstetrics and Gynaecology, Paediatrics and Psychiatry. Each section starts with advice on the general aspects of examination of the patients, followed by a series of clinical problems presented in the form of cases. Each case includes a fact file of key points to remember about this condition, and advises on the likely discussion points that can be asked. The book outlines in each clinical problem the likely use of OSCE, short and long case examinations.

A Revision Aid for Medical Finals Libri Pub Limited

A curriculum-based guide, *Advanced Training in Anaesthesia* contains everything candidates need in preparation for taking the Final FRCA exam. This book is ideal for both learning and exam

revision, but it also provides a ready source of reference for situations in all specialties and sub-specialties, with knowledge which will continue to apply beyond training. Topics in applied basic science and clinical anaesthesia are presented in a systems-based format, as laid out in the syllabus set by the Royal College of Anaesthetics, allowing for easy

navigation and structured learning and revision. Advanced Training in Anaesthesia is authored by both trainees and specialists in order to create an authoritative yet accessible text. Containing everything candidates need to know to pass this final major hurdle in anaesthetic training, this book is ideal for

exam revision. Suggestions for further reading are included for candidates wishing to read around the subjects. Topics in applied basic science are presented in a systems-based format, as laid out in the syllabus set by the Royal College of Anaesthetists, to allow for easy navigation and structured learning and revision.
