A cold case heats up . . . A dead man in Big Bay Creek, spring break, and a rogue FBI agent would be enough to drive Chief Callie Jean Morgan to drink . . . if she hadn't already quietly crawled inside a bottle of gin to drown her sorrows over a life

ripped apart by too many losses. When her investigation into the stranger's death heats up an unsolved abduction case, Callie finds herself pitted against the town council, her son, the agent, and even the raucous college kids enjoying idyllic Edisto Beach. Amidst it all, Callie must find a way to reconcile her grief and her precious taste for gin before anyone else is killed. C. Hope Clark is the award-winning author of the Carolina Slade Mysteries and now the Edisto Island Mysteries. During her career with the U.S. Department of Agriculture, she met and married a federal agent--now a private investigator. James Swallow's 24: Deadline. This tie-in novel to Fox's groundbreaking TV show 24 answers the question of what happened to CTU agent Jack Bauer after the thrilling final

moments of the last season. The time is 5:00 PM. One hour ago, federal agent Jack Bauer was declared a fugitive. If he wants to survive, he must get out of the country, and he doesn't have much time. With his former colleagues in the Counter Terrorist Unit now dead, under arrest, or shut down, Jack has no resources to call upon, no back-up, and nowhere to go—only his determination can drive him on. One thing remains clear to him: the promise he made to his daughter Kim. Jack vows that he will see Kim one last time to tell her he loves her...before he drops off the radar forever. Meanwhile, a hastily-assembled FBI task force set out to track down and capture Jack, even as a covert operations unit of Russia's SVR set out to do the same—only the remit of the Russians is to kill on sight. As the clock runs down, Jack must face old friends and past enemies in a desperate race to stay one step ahead of the hunters, leaving them with a grim warning— Stay out of my way, and I'll be gone within 24 hours. You'll never see me again. Come after me...and you'll regret it. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

### *The Shadows of Consumption* Univ. of Queensland Press

An environmentalist maps the hidden costs of overconsumption in a globalized world by tracing the environmental consequences of five commodities. The Shadows of Consumption gives a hard-hitting diagnosis: many of the earth's ecosystems and billions of its people are at risk from the consequences of rising consumption. Products ranging from cars to hamburgers offer conveniences and pleasures; but, as Peter Dauvergne makes clear, global political and economic processes displace the real

costs of consumer goods into distant ecosystems, communities, and timelines, tipping into crisis people and places without the power to resist. In *The Shadows of Consumption*, Peter Dauvergne maps the costs of consumption that remain hidden in the shadows cast by globalized corporations, trade, and finance. Dauvergne traces the environmental consequences of five commodities: automobiles, gasoline, refrigerators, beef, and harp seals. In these fascinating histories we learn, for example, that American officials ignored warnings about the dangers of lead in gasoline in the 1920s; why China is now a leading producer of CFC-free refrigerators; and how activists were able to stop Canada's commercial seal hunt in the 1980s (but are unable to do so now). Dauvergne's innovative analysis allows us to see why so many efforts to manage the global environment are failing even as environmentalism is slowly strengthening. He proposes a guiding principle of "balanced consumption" for both consumers and corporations. We know that we can make things better by driving a high-mileage car, eating locally grown food, and buying energy-efficient appliances; but these improvements are incremental, local, and insufficient. More crucial than our individual efforts to reuse and recycle will be reforms in the global political economy to reduce the inequalities of consumption and correct the imbalance between growing economies and environmental sustainability.
