The New York Clipper (December 1919) Delmar Pub  
The Complete Reference for Choosing, Installing, and Understanding Boat Propellers—a first of its kind reference—fully revised and updated Propeller Handbook, Second Edition demystifies the operation, behavior and selection of propellers and provides practical and detailed advice in readable, easy-to-understand language. The book will enable readers to size and select the correct propeller for their boat or for boats they may be working on. Solutions to propeller problems, installation considerations, propeller shafting, number of blades and blade

area, boat speed and powering calculations and considerations, and much more are discussed in detail. In the twenty-seven years since the publication of the first edition, Propeller Handbook, has become a cornerstone resource that marine-industry professionals rely on. All material from the previous edition is completely rewritten to reflect the author's additional 27-years of experience in boat design and propeller selection since the first edition was introduced. Significant changes in the emphasis placed on factors such as blade area and propeller and engine matching, underlie the revised propeller-selection approach. Plus, the entire book has been updated to fully include metric and English units.

Volume 1: The Magnificent Obsession "Winner of the Governor

General's Award" This volume examines the formative influences on Pierre Trudeau's childhood, his knight-errant youth and early manhood, his charismatic ascent to the Liberal Party leadership, and his dramatic first decade as prime minister. It concludes with his bittersweet triumphs in fighting off the separatists in the 1980 referendum campaign and his battle with provincial premiers to repatriate the Canadian constitution.

**Kawaii Nightmare** International Marine/Ragged Mountain Press  
This volume presents results from the ESO workshop Multiple Stars across the H-R Diagram, held in Garching in July 2005. It covers observations of multiple stars from ground and space, dynamical and stellar evolution in multiple systems, formation and early evolution of multiple stars, and special components of multiple stars. The book reviews the current state of observational and theoretical knowledge and discusses future studies for further progress in the field.

Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, Nada, a project they completed in 1984. Calder is author of numerous articles for *Yachting Monthly* and many other magazines worldwide, as well as the bestselling *Boatowner's Practical and Technical Cruising Manual* and *Boatowner's Mechanical and Electrical Manual*, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel

Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'

**Gloria - A Lifetime Motorcyclist: 75 Years on Two Wheels and Still Riding** Butterworth-Heinemann

Read about the adventures and mis-adventurers of a rookie inboard hydroplane driver as he learns how to drive an eleven foot long, ninety mile per hour, alky-burning prop-rider on race courses in California, Arizona, Utah, and Washington. Experience the wild elation of victory and the disappointment of defeat as the author relates various anecdotes of accidents, engine explosions, lost opportunities, bad decisions, and lucky wins. Gain insight into the behind-the-scenes activity that supports power boat racing: the seemingly endless hours of engine building and hull maintenance that are required in preparation for a few minutes of all-out racing action on Sunday afternoon. Tag along as the author chases parts, repairs his hull, re-installs the engine, and "safety-wires everything." Then strap on a Gentex or a Lifeline jacket and a Bell helmet and join Bob Foley on *A Wild Ride*.

Illustrations: Few B/w Illustrations Description: The most fruitful growth of Buddhism in the Far East has resulted in the development of Zen and Shin. Zen attained its maturity in China and Shin in Japan. The vigour and vitality which Buddhism still has after more than two thousand years of history will be realized when one comes in contact with these two branches of Buddhism. The one appeals to the inmost religious consciousness of mankind, while the other touches the intellectual and practical aspects of the oriental mind which is more intuitive than discursive, more mystical than logical. If Zen is the ultra self power wing of Buddhism, Shin represents the other extreme wing known as the 'other power and these two extremes are synthesized in the enlightened Buddha consciousness. This book

is a collection of essays originally published in *The Eastern Buddhist* except for the one on the 'History of Zen Buddhism' specially written for the volume.

This book is not a leadership guide. It's not some leadership 101 class that will draw you a picture of what a leader is supposed to look like and how you can learn to fit that mould. This is a book that will change the way you look at leadership and at yourself. It

strives to hold a mirror up to your beliefs about who you are, and leadership in general, to help you discover what sort of leader you were naturally destined to be. While this book uses leadership science authored by academics to anchor principles and concepts, paired with anecdotal insights and perspective garnered through a wealth of professional and executive leadership experience, it should be treated as an instrument for creating dialogue and discussion, and formulating the necessary questions to put your own assumptions to the test. Reflection

fuels, people matter, and relationships make a difference. These three threads are used to weave a tapestry of self-discovery and personal growth.
