
0610 S13 Ms 22 Max Papers

OPEN THREAD for the BRAD SHOW of August 27
Carbohydrate-dependent B cell activation by
fucose-binding bacterial lectins

0610 S13 Ms 22 Max

Systems-level analysis of mechanisms regulating
yeast metabolic flux

In situ correlation between metastable phase-
transformation mechanism and kinetics in a
metallic glass

Integrated allelic, transcriptional, and phenomic
dissection of the cardiac effects of titin
truncations in health and disease

Nanometer resolution imaging and tracking of
fluorescent molecules with minimal photon fluxes

Electronic Supporting Information (ESI)

Inferring number of populations and changes in
connectivity under the n-island model

SNP to offer free breakfasts to secondary pupils
as school meals policy expanded

Dual activity of anthocyanidin reductase supports
the dominant plant proanthocyanidin extension
unit pathway

Inhibition of SARS-CoV-2 main protease by
phenolic compounds

MYA
