This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1920 edition. Excerpt: ... second and third persons singular of the subjunctive the analogical proportion stands: vofiev veTt: veiS ve i = Xvuptv Xurjre: xutjs Xujj. Since the inducing forms, Xuets and Xuei, contained, not diphthongs, but simple vowels of the quality which appeared elsewhere in the paradigm (pp. 124 ff.), the restored subjunctive forms contained, not 77i, but a monophthong of the same quality as that of the second person plural. Consequently we find very frequently such subjunctives as 8odrj, P. Petr. ii. 2. 1. 10 (260 B.C.). The frequent spelling with 77i in the subjunctive forms of late inscriptions and papyri is due in part to the influence of old documents with 77i in these forms but chiefly to the fact that the corresponding indicative forms were written with the digraph ei. The diphthongs ai and i, and also the restored 77i, lost their second element at various times in different parts of the Greek world. In Attica the loss occurred not far from 200 B.C.1 The change is reflected in the form of Greek loan-words in Latin; Thraex, tragoedus, etc., were borrowed in early times, while Thrax, Thracia, odeum are later forms. We have the explicit testimony of Strabo that i was silent in the dative singular (of the first and second declensions, of course): xiv. p. 648: Towoi yap x DEGREESpov i ypavaiKpiv aIrlav obK exov.2 In the fifth century 77i, ai, and wi were all true diphthongs, and at and wt remained

The linguistic integration of adult migrants: from one country to another, from one language to another Psychology Press

Grammatica Inglese per Studenti Italiani

Interdisciplinary Studies in Pragmatics, Culture and Society ICI Berlin Press

This book discusses mass higher education development in East Asian countries by means of three main issues: the strategy for higher education development; the way professors and students in the region are experiencing the rapid developments; and the challenges imposed by mass higher education. These challenges include the quality of education as well as structural changes in the rapidly developing systems, funding sources for supporting mass higher education, and job markets for college graduates. Part I discusses how the East Asian countries have accomplished or are in the process of accomplishing the rapid development of higher education. Japan, Korea, China, Taiwan, Malaysia, Singapore, and Hong Kong serve as case studies of mass higher education in the region. The case studies introduce and discuss national strategies to develop higher education, funding sources and mechanisms, and initiatives to assure quality of education in a period of rapid growth. Part II and Part III of the book focus on the

phenomena of mass higher education in the region and the influence on academia. Mass higher education changes professors and students, who are different from those in elite higher education. Part III further discusses the challenges posed to Asian mass higher education. The Comparative and International Education Society Higher Education (HESIG) has awarded Mass Higher Education Development in East Asia the Higher Education SIG Best Book Award 2015.

This collection of the proceedings of the 3rd conference on bi- and multilingual universities, held at the Free University of Bozen-Bolzano from 20 to 22 September 2007, tries to give a state-of-the-art insight into theoretical and practical approaches towards implementing bi- and multilingual models and policies in higher education institutions in various parts of the world.

Upper-intermediate. Teacher's book Theclassics.us

Recent worldwide education policy has reinvented teachers as agents of change and professional developers of the school curriculum. Academic literature has analyzed changes in how teacher professionalism is conceived in policy and in practice but Teacher Agency provides a fresh perspective on this issue, drawing upon an ecological theory of agency. Using this model for understanding agency, Mark Priestley, Gert Biesta and Sarah Robinson explore empirical findings from the 'Teacher Agency and Curriculum Change' project, funded by the UK-based Economic and Social Research Council (ESRC). Drawing together this research with the authors' international experiences and perspectives, Teacher Agency addresses theoretical and practical issues of international significance. The authors illustrate how teacher agency should be understood not only in terms of individual capacity of teachers, but also in respect of the cultures and structures of schooling.

This new edition of the Oxford Primary Thesaurus is bursting with thousands of synonyms, writing tips, overused words and word webs which will enrich children's writing. Entries are simple and clear, and include example sentences from children's favourite authors model how to use different words in context. Alphabet tabs on every page make navigation very easy. Extra writing support is given for overused words such as nice and good, topic vocabulary at words such as animal or castle, and writing tips at words such as food, weather and clothes suggest ways to create colourful descriptions. Finding new and alternative words is easy, quick and fun. The Oxford Primary Thesaurus is an invaluable reference tool for pupils to reflect, edit and improve their writing. An ideal companion to the new updated edition of the Oxford Primary Dictionary. Go online at www.oxfordschooldictionaries.com for the accompanying free downloadable activities.

Council of Europe

What remains of materialism's subversive potential — i.e., its ties with heresy or atheism and republicanism or communism — and to what extent does this concept still interpellate us politically and philosophically? As neoliberal policies expanded far beyond the state, their mechanisms of control seeped into the materiality of social reproduction, solidifying a conception of matter as something inert, to be appropriated, manipulated, and exploited. If in this context the subversive nature of a reference to materiality is called into question, it has also provoked new forms of resistance, as well as fundamental reconsiderations of the political implications of the notion of 'matter'. Against this background, the aim of this book is to show the diversity within continued engagements with materialism as a central concept for progressive politics, be it in the direction opened up by New Materialism, in renewed forms of Marxist and Spinozist based approaches, or in feminist analyses, each in their own terms, without excluding the possibility of alliances between them. Finally, this volume insists that the study of materiality and materialist approaches does not amount to a renunciation of philosophy, but rather urges us to broaden the task of philosophical thought in order to reconsider the historical and, in every sense of the word, material situatedness of all philosophical problems. Against a reductive and ahistorical conception of materialism — the straightest way back to ideology —, this book offers an analysis of its diverse emancipatory potentialities.

Strategic Learning: A Holistic Approach To Studying Brain Friendly Publications

The linguistic integration of migrants affects every aspect of settling in a new country (employment, health, etc.). The aim of this collection of texts is to propose a number of specific measures member states can take to help adult migrants become acquainted with the language of the host country. The main focus is on organising language courses that meet migrants' real communication needs. It is not enough for authorities simply to consider the technical aspects of such courses, they should also design and conduct them in accordance with the fundamental values of the Council of Europe. A number of issues concerning the linguistic integration of adult migrants are presented here, beginning with the notion of linguistic integration itself. Family reunion, the nature of citizenship and the function of language tests, among others, are dealt with from the point of view of language and language use. Readers are invited to reflect on the type of language competences that need to be acquired as well as an appropriate use of the Common European Framework of Reference for Languages. The collection also sets out approaches and instruments designed to assist in implementing effective policies.

and creator of the 'Remarkable People' podcast Most 'how to learn' books focus only on study techniques. However, knowing these study techniques doesn't guarantee they will be successfully implemented. Based on Professor Kamei's popular undergraduate course at the National University of Singapore, the author shares his unique perspective as an educator and physician to provide a strategic approach to learning that will benefit all students looking to optimize their learning. His extensive experience with helping students with their studies has identified a wide variety of reasons why they were not learning properly. What throws many learners off is that they hold certain myths that result in poor study habits. Learners who understand the truth behind these myths can use this knowledge to better plan their study and have an advantage over others that don't. Furthermore, modifying your study methods won't make much difference if you are too sleepy to learn or lack the motivation and self-discipline to pick up a book. These foundational aspects of learning also need to be solidly in place. This book takes learners through the author's holistic method to help students learn better and meet whatever learning challenges they face. Learners of all ages who wish to optimize their learning will benefit from this book, as well as educators seeking an approach to help their students learn better. Related Link(s)

Research with Children is a unique resource book on the methodology of childhood research. Leading and new researchers within the social studies of childhood discuss central questions of epistemology and methodology, demonstrating the links between theory and practice. The theoretical and practical questions are set out in a clear and well-argued fashion and will therefore appeal both to the newcomer to childhood studies and to experienced researchers in the field.

This edited collection provides a comprehensive overview of the area of successful language learning strategies and reviews the literature and research on this subject to date. The book provides a reference base, addresses theoretical issues and considers pedagogical implications. It identifies gaps in our current understanding and suggests useful research initiatives and it considers how all of this relates to successful language learning by unique individuals in a variety of situations. The book is divided into 2 sections: the first deals with learner variables and has chapters on such topics as age, culture, motivation, personality and aptitude. The second covers learning variables such as vocabulary, pronunciation, grammar, reading and listening. The writers include many well-established names such as Anna Chamot, Paul Nation and Andrew Cohen as well as some of the best representatives of the new generation of applied linguists.

As telescopes, detectors, and computers grow ever more powerful, the volume of data at the disposal of astronomers and astrophysicists will enter the petabyte domain, providing accurate measurements for billions of celestial objects. This book provides a comprehensive and accessible introduction to the cutting-edge statistical methods needed to efficiently analyze complex data sets from astronomical surveys such as the Panoramic Survey Telescope and Rapid Response System, the Dark Energy Survey, and the upcoming Large Synoptic Survey Telescope. It serves as a practical handbook for graduate students and advanced undergraduates in physics and astronomy, and as an indispensable reference for researchers. Statistics, Data Mining, and Machine Learning in Astronomy presents a wealth of practical analysis problems, evaluates techniques for solving them, and explains how to use various approaches for different types and sizes of data sets. For all applications described in the book, Python code and example data sets are provided. The supporting data sets have been carefully selected from contemporary astronomical surveys (for example, the Sloan Digital Sky Survey) and are easy to download and use. The accompanying Python code is publicly available, well documented, and follows uniform coding standards. Together, the data sets and code enable readers to reproduce all the figures and examples, evaluate the methods, and adapt them to their own fields of interest. Describes the most useful statistical and data-mining methods for extracting knowledge from huge and complex astronomical data sets Features real-world data sets from contemporary astronomical surveys Uses a freely available Python codebase throughout Ideal for students and working astronomers
