A Chronicle of His Presidency of Dartmouth College Dartmouth College Press

The extraordinary story of the small Vermont town that has likely produced more Olympians per capita than any other place in the country, Norwich gives “parents of young athletes a great gift—a glimpse at another way to raise accomplished and joyous competitors” (The Washington Post). In Norwich, Vermont—a charming town of organic farms and clapboard colonial buildings—a culture has taken root that’s the opposite of the hypercompetitive schoolyard of today’s tiger moms and eagle dads. In Norwich, kids aren’t cut from teams. They don’t specialize in a single sport, and they even root for their rivals. What’s more, their hands-off parents encourage them to simply enjoy themselves. Yet this village of roughly three thousand residents has won three Olympic medals and sent an athlete to almost every Winter Olympics for the past thirty years. Now, New York Times reporter and “gifted storyteller” (The Wall Street Journal) Karen Crouse spills Norwich’s secret to raising not just better athletes than the rest of America but happier, healthier kids. And while these “counterintuitive” (Amy Chua, bestselling author of *Battle Hymn of the Tiger Mother*) lessons were honed in the New England snow, parents across the country will find that “Crouse’s message applies beyond a particular town or state” (The Wall Street Journal). If you’re looking for answers about how to raise joyful, resilient kids, let Norwich take you to a place that has figured it out.

Cambridge, Mass. : Harvard University Press

Technology and increasing levels of education have exposed people to more information than ever before. These societal gains, however, have also helped fuel a surge in narcissistic and misguided intellectual egalitarianism that has crippled informed debates on any number of issues. Today, everyone knows everything: with only a quick trip through WebMD or Wikipedia, average citizens believe themselves to be on an equal intellectual footing with doctors and diplomats. All voices, even the most ridiculous, demand to be taken with equal seriousness, and any claim to the contrary is dismissed as undemocratic elitism. Tom Nichols' *The Death of Expertise* shows how this rejection of experts has occurred: the openness of the internet, the emergence of a customer satisfaction model in higher education, and the transformation of the news industry into a 24-hour entertainment machine, among other reasons. Paradoxically, the increasingly democratic dissemination of information, rather than producing an educated public, has instead created an army of ill-informed and angry citizens who denounce intellectual achievement. When ordinary citizens believe that no one knows more than anyone else, democratic institutions themselves are in danger of falling either to populism or to technocracy or, in the worst case, a combination of both. An update to the 2017 breakout hit, the paperback edition of *The Death of Expertise* provides a new foreword to cover the alarming exacerbation of these trends in the aftermath of Donald Trump's election. Judging from events on the ground since it first published, *The Death of Expertise* issues a warning about the stability and survival of modern democracy in the Information Age that is even more important today.

Norwich Duke University Press

'Once upon a time, there was a little girl who lived in a library...' Deep in the bowels of a New York Public Library lies a dragon: the monstrous coal furnace that Sharon's father, the live-in custodian, must feed every night. A moving examination of family secrets, forgiveness, and the power of language, *Feeding the Dragon* explores Sharon's life growing up in the library and the fire she never allowed to fade.

Feeding the Dragon Vintage

These twelve dazzling stories from Chimamanda Ngozi Adichie — the Orange Broadband Prize-winning author of *Half of a Yellow Sun* — are her most intimate works to date. In these stories Adichie turns her penetrating eye to the ties that bind men and women, parents and children, Nigeria and the United States. In “A Private Experience,” a medical student hides from a violent riot with a poor Muslim woman, and the young mother at the centre of “Imitation” finds her comfortable life in Philadelphia threatened when she learns that her husband has moved his mistress into their Lagos home. Searing and profound, suffused with beauty, sorrow and longing, this collection is a resounding confirmation of Adichie’s prodigious literary powers.

From Crisis to Crisis The Hamilton Project

Two distinct communities which share equally vibrant histories, the twin cities of St. Joseph and Benton Harbor possess a rich heritage rooted in agriculture, manufacturing, transportation, and tourism. Through more than 200 photographs, this book documents the cities' development from the time when pioneers first struggled to create a community in the wilderness. It pays tribute to the men and women who labored to establish farms and industries, and celebrates the delightful beaches and amusement parks—such as the House of David and Silver Beach—that have brought joy to generations of residents and visitors alike.

Universal Cyclopǎia and Atlas Simon and Schuster

An essential resource for transracially adoptive parents and the professionals who serve them, this book offers practical strategies for helping a transracially adopted child through the challenges he or she may face. • Includes advice and questions for discussion and thought by parents considering transracial adoption; for parents already on the journey with older children, the authors examine racial identity development • Offers concrete strategies for parents parenting a child from a different race • Provides practical steps related to managing influences and opinions from within the extended family and the community • Suggests ways parents can learn from members of their child's racial community—and how to manage challenges that arise in transracial adoption situations • Shares the stories of three adults who were transracial adoptees as well as vignettes from (and interviews with) dozens of parents who were involved in transracial adoptions
Essays in the Ethnohistory of Colonial North America Dartmouth College Press

One-in-seven adults and one-in-five children in the United States live in poverty. Individuals and families living in poverty not only lack basic, material necessities, but they are also disproportionately afflicted by many social and economic challenges. Some of these challenges include the increased possibility of an unstable home situation, inadequate education opportunities at all levels, and a high

chance of crime and victimization. Given this growing social, economic, and political concern, The Hamilton Project at Brookings asked academic experts to develop policy proposals confronting the various challenges of America's poorest citizens, and to introduce innovative approaches to addressing poverty. When combined, the scope and impact of these proposals has the potential to vastly improve the lives of the poor. The resulting 14 policy memos are included in *The Hamilton Project's Policies to Address Poverty in America*. The main areas of focus include promoting early childhood development, supporting disadvantaged youth, building worker skills, and improving safety net and work support.

Harper's Weekly Dartmouth College Press

Focusing on the revolutionary movement in the Fort Cumberland region of Nova Scotia in 1775-76, Ernest Clarke explores why supporters of American independence did not prevail in this British North American colony. He reveals how the siege of Fort Cumberland shaped the attitudes of Nova Scotians to the revolution and to their place in the North American world.

The Indian History of an American Institution Oxford University Press

At the age of thirty, just as everything was falling into place for him, Lee Pesky died of brain cancer. For his father, Alan, grief came with the realization that he had lost the chance to love Lee as he was—not as he wanted him to be. Ambitious, successful, and always striving for more, Alan had a hard time relating to a son who struggled with learning disabilities at a time when there was little understanding or help for kids who had them. Their relationship was complicated, and now, Lee was gone. *More to Life than More* is a memoir of misunderstanding, loss, and learning. After Lee's death, Alan's conception of more crumbles. He launches himself into keeping Lee's memory alive by helping kids in a way he wasn't able to help his son. It was too late to change his relationship with Lee, but he could create something positive and enduring from his loss: Lee Pesky Learning Center, a non-profit in Idaho dedicated to understanding and helping those with learning differences. In 25 years, LPLC has benefited more than 100,000 children and has become a national force for early childhood literacy. And for Alan, it has meant getting to know the son he had misunderstood and lost.

A history of the complex relationship between a school and a people

A Strategic Policy Review MIT Press

Jews and Gender features sixteen authors exploring the history and culture of the intersection of Judaism and gender from the biblical world to today. Topics include subversive readings of biblical texts; reappraisal of rabbinic theory and practice; women in mysticism, Chasidism, and Yiddish literature; and women in contemporary culture and politics. Accessible and comprehensive, this volume will appeal to the general reader in addition to engaging with contemporary academic scholarship.

The History of Britain, that Part Especially Now Call'd England ABC-CLIO

The seminal Dartmouth Conference (1966) remains a remarkably influential moment in the history of English teaching. Bringing together leading voices in contemporary English education, this book celebrates the Conference and its legacy, drawing attention to what it has achieved, and the questions it has raised. Encompassing a multitude of reflections on the Dartmouth Conference, *The*

Future of English Teaching Worldwide provides fresh and revisionist readings of the meeting and its leading figures. Chapters showcase innovative and exciting new insights for English scholars, and address both theoretical and practical elements of teaching English in a variety of settings and countries. Covering topics including the place of new media in English curricula, the role of the canon, poetry and grammar, the text is divided into three accessible parts: Historical perspectives Dartmouth today: why it still matters Reflections: but for the future. This powerful collection will be of value to researchers, postgraduate students, literature scholars, practitioners, teacher educators, trainee and in-service teachers, as well as other parties involved in the teaching and study of English.

An American Envoy AuthorHouse

Through personal stories this book demonstrates that generations 50 years apart in their college experiences share a commitment to address the world's troubles as their own and to make a difference in the lives of others. The stories are written by members of the Dartmouth Classes of 1964 and 2014 and reflect diverse ways of giving back to their communities. The classmate stories are complemented by special stories by the current President of Dartmouth, the only other living President of Dartmouth and the Dean of the College when members of the class of 1964 were students.

Siege of Fort Cumberland, 1776 Regnery Publishing

From the author of the Pulitzer Prize-winning *Arab and Jew*, an intimate portrait unfolds of working American families struggling against insurmountable odds to escape poverty. As David K. Shipler makes clear in this powerful, humane study, the invisible poor are engaged in the activity most respected in American ideology—hard, honest work. But their version of the American Dream is a nightmare: low-paying, dead-end jobs; the profound failure of government to improve upon decaying housing, health care, and education; the failure of families to break the patterns of child abuse and substance abuse. Shipler exposes the interlocking problems by taking us into the sorrowful, infuriating, courageous lives of the poor—white and black, Asian and Latino, citizens and immigrants. We encounter them every day, for they do jobs essential to the American economy. This impassioned book not only dissects the problems, but makes pointed, informed recommendations for change. It is a book that stands to make a difference.

The Universal Cyclopaedia Bloomsbury Publishing

In *Reimagining Social Medicine from the South*, Abigail H. Neely explores social medicine's possibilities and limitations at one of its most important origin sites: the Pholela Community Health Centre (PCHC) in South Africa. The PCHC's focus on medical and social factors of health yielded remarkable success. And yet South Africa's systemic racial inequality hindered health center work, and witchcraft illnesses challenged a program rooted in the sciences. To understand Pholela's successes and failures, Neely interrogates the "social" in social medicine. She makes clear that the social sciences the PCHC used failed to account for the roles that Pholela's residents and their environment played in the development and success of its program. At the same time, the PCHC's reliance on biomedicine prevented it from recognizing the impact on health of witchcraft illnesses and the social relationships from which they emerged. By rewriting the story of social medicine from Pholela, Neely challenges global health practitioners to recognize the multiple worlds and actors that

shape health and healing in Africa and beyond.

The first comprehensive survey of this American Regionalist painter, including new information about his life & art.

Paul Sample, Painter of the American Scene Basic Books

In *Wealth, Poverty, and Politics*, Thomas Sowell, one of the foremost conservative public intellectuals in this country, argues that political and ideological struggles have led to dangerous confusion about income inequality in America. Pundits and politically motivated economists trumpet ambiguous statistics and sensational theories while ignoring the true determinant of income inequality: the production of wealth. We cannot properly understand inequality if we focus exclusively on the distribution of wealth and ignore wealth production factors such as geography, demography, and culture. Sowell contends that liberals have a particular interest in misreading the data and chastises them for using income inequality as an argument for the welfare state. Refuting Thomas Piketty, Paul Krugman, and others on the left, Sowell draws on accurate empirical data to show that the inequality is not nearly as extreme or sensational as we have been led to believe. Transcending partisanship through a careful examination of data, *Wealth, Poverty, and Politics* reveals the truth about the most explosive political issue of our time.

Generational Bridges to the World's Troubles Knopf Canada

Peter S. Bridges's service as an American ambassador to Somalia capped his three decades as a career officer in the American Foreign Service. *Safirka*, a frank description of his experiences in Somalia and elsewhere, offers pointed assessments of American foreign policy and policymakers. Bridges recounts his service in Panama during a time of turmoil over the Canal; in Moscow during the Cuban missile crisis; in Prague for bleak years after the Soviet invasion; in Rome when Italian terrorists first began to target Americans; and in key positions in three Washington agencies. In Somalia Bridges managed the largest American aid program in sub-Saharan Africa. He dealt with a postcolonial regime, hobbled both by traditional clan rivalries and by a leader who cared far less about Somalia's people and progress than about maintaining his control over that poverty-stricken, strategic - which soon erupted in civil war.
