New International Business English Updated Edition Student's Book and Audio Cassette Set (3 Cassettes) Springer

This book presents an empirical study to develop and validate a proficiency scale of business English writing in the Chinese tertiary context. Through a mixture of intuitive, quantitative and qualitative methods, the book demonstrates how a pool of descriptors are collectively formulated, statistically calibrated and meticulously validated for the establishment of a proficiency scale of business English writing. The writing scale differs in significant ways from the existing language scales, most of which were constructed in English as L1 or L2 contexts and applied to English for General Purposes (EGP) domains. This book also provides important insights into the construct of business English writing as well as the methods for English for Specific Purposes (ESP) proficiency scale development and validation. It is of particular interest to those who work in the area of ESP teaching and assessment.

This volume examines the nature of second language listening proficiency and how it can be assessed. The book highlights the need for test developers to provide a clear explication of the ability constructs which underpin the tests they offer in the public domain. This is increasingly necessary if claims about the validity of test score interpretation and use are to be supported both logically and with empirical evidence. It operationalises a comprehensive test validation framework which adopts a socio-cognitive perspective. The framework embraces six core components, examining and then analysing Cambridge ESOL listening tasks from the following perspectives: Test Taker; Cognitive Validity; Context Validity; Scoring Validity; Criterion-related Validity; and Consequential Validity.

Examining Listening Haufe-Lexware

Years of observation and reflection in a classroom session, allow us to continuously reinvent the wheel of teaching and learning pedagogy. This continuous introspection and reinvention orients into best practices. In the same stream, this articulation, is an outcome of immaculate observation meant for learners at the tertiary level. The scholarly approach adopted in this book aligns with the requirement of acquiring a language, especially the speaking skills. The need for effective communication skills in the new millennium has surged and has become all the more important. English continues to be the dominant language in Science, Technology, Engineering and Management (STEM). It is therefore obvious that the growth curve of a person hinges on effective communication skills. To perform exceptionally well in

interviews and group discussions, it is imperative for students to manage their communication skills effectively. This book attempts to prepare the students to excel in it as well as group discussions and give an impressive interview which will ultimately increase their credibility. Indians have always had the upper-hand in international scenario due to their exceptional English language and communication skills. However, as we see from the last decade many non-English speaking countries especially China, Korea and others are honing and improving their English skills and trying to shake India's numero uno position. Hence it has become necessary that we Indians continuously upgrade and improve our communication skills to maintain its position at global level. Therefore, this book is packed with practical tactics and tasks within a framework of ten chapters. The live situations used for discussions, give an insight into the corporate work culture and this makes the learner familiar with business vocabulary. A brief explanation of concepts followed by activities, gently transcends the conversation skills from a preliminary level of self-introduction to an advanced level of board room presentation. The additional topics on Ethical Dilemma, and Group Discussions are meant to stimulate the thought process of the students and engage them in an interactive conversation. This handbook has also been drafted to serve English teachers who can evaluate students with the help of the given rubrics and make the sessions vibrant and simplify the teaching learning process. Speaking and interacting with a partner will encourage a slow learner to overcome the hesitancy and speak freely. Imagine a learner-centered classroom bustling with students engaged in speaking activities, using gestures, facial expressions, body language and intonations without the fear of being assessed. This book guarantees to evoke enthusiasm and the students will begin to communicate with a Panache.

Excellence in Communication Skills Ernst Klett Sprachen
Unterrichtsentwurf aus dem Jahr 2019 im Fachbereich Didaktik - Englisch - Sonstiges, Note: 6.0, Sprache: Deutsch, Abstract: In dieser Arbeit soll deshalb gezielt der Frage nachgegangen werden, wie und in welchen Kombinationen Vokabular gewinnbringend und nachhaltig vermittelt werden kann. Die Grundlage dazu bildet die konstruktivistische Theorie. Wie in so vielen Fachrichtungen muss auch in der Vermittlung von Vokabular im Englischunterricht von der Subjektivität des individuellen Studierenden (SuS) ausgegangen werden. Das bedeutet aus konstruktivistischer Sicht für die Lehrperson (LP), dass im Unterricht nicht von einer heterogenen Lehr- und Lernsituation ausgegangen werden kann. Daraus resultierend

ergibt sich entsprechend die Problematik, wie die lehrende Person in die Wirklichkeit der lernenden Person(en) dergestalt manipulierend eingreifen kann, um eine möglichst homogene Situation für die Lerngruppe herbeiführen zu können. Dazu stehen diverse konstruktivistische Strategien und Methoden zur Verfügung, welche innerhalb, aber auch außerhalb des Unterrichts durchaus zur Anwendung kommen können.

The book addresses the challenge of living in a multilingual world from three perspectives: socio-linguistics and the study of multilingualism in contrast, philosophy of technology with its emphasis on the world as a technosphere—how it is made, how it is experienced, and how it can be managed, and then pedagogy and the question of teaching and learning to competently negotiate multilingual environments. In today's multicultural and multilingual world, technologies provide a common ground. The story of the technosphere as a multilingual environment offers new perspective, namely that of learning to cooperate and coordinate.

Test developers need to provide a clear explication of the language ability constructs that underpin the tests they offer in the public domain; such an explication is essential for supporting claims about the validity - or usefulness - of test scores. This volume describes the theory and practice of Cambridge ESOL's approach to assessing second language writing ability. A comprehensive test validation framework is used to examine the tasks in Cambridge ESOL writing tests from a number of different validity perspectives that reflect the socio-cognitive nature of any assessment event. The authors show how an understanding and analysis of the framework and its components can assist test developers to operationalise their tests more effectively, especially in relation to the key criteria that differentiate one proficiency level from another. The book provides: an up-to-date review of relevant literature on assessing writing, an accessible and systematic description of the different proficiency levels in second language writing, a comprehensive and coherent basis for validating tests of writing. This volume is a rich source of information on all aspects of examining writing ability. As such, it will be of considerable interest to examination boards who wish to validate their own writing tests in a systematic and coherent manner, as well as to academic researchers and students in the field of language assessment more generally.
