Drawing on more than 15 years of experience as an active clinician and instructor specializing in treating the chemically dependent and their families, Olivia Curtis presents an engaging and practical book on the nuts and bolts of counseling drug affected families. Unique and timely, *Chemical Dependency: A Family Affair* looks at family dynamics from a family systems perspective and examines how those dynamics are affected by chemical dependency. Through her insightful and friendly writing style, Curtis gives a comprehensive summary of the development of family theories, the structure of a family system, and the interplay between chemical dependency and the family system. How does a minister respond to a cry for help when the concern is alcohol or drug abuse? With one out of eight adults in the country suffering from alcohol dependency or drug abuse and one out of four families distressed by someone's use of chemicals, clergy frequently deal with related problems whether they are willing and capable, or not. How does a congregation respond to a minister who might be suffering from chemical dependency? Clergy are just as likely to suffer from the disease as any lay person, and yet denominational leaders and superiors, called upon by concerned members of the congregation, may feel powerless to discern the truth and act. Though parishioners are often called on to deal with the chemically dependent person or those suffering from the fallout, few are trained in this area. And because few clergy are trained as treatment specialists, often they only make the problem worse through personal, empathetic involvement. Instead, *Alcohol and Substance Abuse* shows how clergy and laity can be pastoral problem solvers, not practitioners, through intervention and referral. Throughout, the aim is to provide spiritual

answers to the spiritual questions of dispirited people. This is a how-to handbook with specific descriptions and suggestions, featuring a comprehensive list of organizations and agencies equipped to help.

A guidebook to understanding and getting the most out of therapy. This book is for clients—and for clinicians to recommend to their clients—who want to enhance the process of psychotherapy and get the most out of a therapeutic relationship. Kaiser writes in a friendly, accessible tone, and explains what exactly therapy is and how it works, including the beginning, middle, and ending stages of the therapy process. She elaborates on the dynamics of the relationship between therapist and client, including such issues as power, boundaries, trust, and termination, and describes the four common factors of change: the client, the therapeutic relationship, hope, and technique. Furthermore, she explains the basic aspects of brain development and how psychotherapy physically changes the brain. This book familiarizes potential clients with four major therapeutic approaches—psychodynamic, developmental, cognitive-behavioral, and humanistic—and explains the characteristics of individual, family, and group therapy. Through case studies, Kaiser reveals the healing potential of the therapeutic relationship, including the experience of being deeply understood by and coming to trust a therapist. Kaiser offers much food for thought, as well as compassion, wisdom, encouragement, and practical suggestions for those who choose to take this fascinating and fruitful journey.

Families of the Future John Wiley & Sons

Alcoholism, like other forms of addiction, is a complex disease, but treatment does not have to be complicated. The stigma/shame of the disease comes from the behaviors developed from the disease. These behaviors must be addressed and changed using a therapy program. Sobriety is more than abstinence and relapse prevention. Family members are severely emotionally and mentally injured and need as much treatment as the alcoholic/addict so they can become healthy persons. A clinical social worker, author Alice M. Lebron has dedicated her career to finding and developing information to help individuals suffering from alcoholism/addiction, as well people directly affected by the disease-their families. The author believes that "recovery enables a person to become the person they were born to become," and through this book, she aims to guide you and your family down the path of change and healing, which she has been doing for more than forty years.

Here is an essential volume for educators, social workers, health care professionals, and parents who are frustrated by the consuming power of drugs over the lives of young people and looking for answers to this enormous problem. In this unique and highly practical volume, experts concentrate on the family--the foundation of mental health and social control--as the most positive force in the prevention of adolescent drug use. Despite the "war on drugs," young people in large numbers continue to use substances. This instructive guide focuses on educating and strengthening families--which makes stronger children who are less likely to use drugs--instead of the traditional efforts based on rehabilitation instead of prevention. It offers instructive background information about societal forces that affect families and make it difficult to raise drug-free youngsters. Family differences are discussed, such as family structure, parenting styles, ethnic and cultural characteristics. Contributors thoroughly examine practical, effective interventions--at home, at school, and with peers--that are positive rather than negative, instructional rather than punitive, and preventive instead of remedial.
