 Being active is fundamental to a person's sense of physical and mental wellbeing, and the need to engage in purposeful and meaningful activity does not diminish with age. However, common effects of ageing, such as reduced vision and hearing,

arthritis, dementia, and in some cases social isolation, can affect an older person's ability to participate in therapeutic and recreational activities. Introducing the concept of PIE (Planning, Implementation and Evaluation), this practical resource will enable professionals working with older people to initiate and run successful activity-based programmes with their clients, either individually or in groups. The authors guide the reader through the processes of group and individual work, and provide step-by-step instructions for a range of activities, including arts and crafts, music, drama, movement, relaxation, reminiscence, and day-to-day tasks such as taking care of personal hygiene and preparing food and drinks. The book also describes the importance of assessing and evaluating activity-based work, with examples of completed evaluation and assessment forms. Useful case studies and self-reflective activities for the facilitator are included throughout. This book will be an invaluable for occupational therapists, creative arts therapists, health and social care practitioners and all other professionals working with older people. Taylor & Francis

We live in a world surrounded by all the stuff that education is supposed to be about: machines, bodies, languages, cities, votes, mountains, energy, movement, plays, food, liquids, collisions, protests, stones, windows. But the way we've been taught often excludes all sorts of practical ways of finding out about ideas, knowledge and culture - anything from cooking to fixing loo cisterns, from dance to model making, from collecting leaves to playing 'Who am I?'. The great thing is that you really can use everything around you to learn more. Learning should be much more fun and former children's laureate, million-selling author, broadcaster, father of five and all-round national treasure, Michael Rosen wants to show you how. Forget lists, passing tests and ticking boxes, the world outside the classroom can't be contained within the limits of any kind of curriculum - and it's all the better for it. Long car journeys, poems about farting, cake baking, even shouting at the TV can teach lessons that will last a lifetime. Packed with enough practical tips, stories and games to inspire a legion of anxious parents and bored children, Good Ideas shows that the best kind of education really does start at home.

Communication Skills in English" is a basic book that can provided a foundation for further study in the field of English language, literature, grammar and its usage. It will benefit students who are learning the essentials at the Diploma level and those who wish to review the concepts previously learned. The premise of this book is to understand English language and its practice thus enabling us to use it more effectively. This skill can enhance personal communication, college/university work finally percolating down to professional lives. Therefore, the present book will be useful for advanced level students who face difficulty with grammar and need a book for reference and practice. In writing this book, I have drawn on many years of my expertise in teaching, research, and writing. I Have taught the English language in a range of institutions and to multiple age groups at different levels: at a college of further education, and universities. Therefore, this book in front of you is a systematic account of grammatical forms and the way they are used in standard British English today. The emphasis is on the meanings and how the govern the choice of grammatical patterns. The book is thorough in its coverage but also pays attention to the points that are of importance to the intermediate and advanced learners of English, and to their teachers. It would be equally suitable for quick reference to details and the more leisured study of grammar topics. A useful feature of the book is the inclusion of example text and conversations, many of them authentic, to show how grammar is used in connected writing and speech. Study the rules, review the examples, and look for more examples of good writing in newspapers, magazines, and other available sources on the internet. Complete the exercises to practice what you have learned, but also remember to

apply the rules whenever you speak and write. There are writing test exercises too for assessing the reader's progress. Although every effort has been made to make the book as useful and accurate as possible but if students of teachers have any comments, criticisms, or suggestions I would be very pleased to hear from them. The more you use what's written in this book, the better you would be able to apply it in real life. In the end, you will be a better and more effective speaker and writer. You're on your way—good luck!

In Teach Like Nobody's Watching: The essential guide to effective and efficient teaching, Mark Enser sets out a time-efficient approach to teaching that will reduce teachers' workload and enhance their pupils' levels of engagement and attainment. At a time when schools are crying out for more autonomy and trust, teacher and bestselling author Mark Enser asks educators the critical question How would you teach if nobody were watching? and empowers them with the tools and confidence to do just that. Mark argues that a quality education is rooted in simplicity. In this book he convincingly

strips away the layers of contradictory pedagogical advice that teachers have received over the years and lends weight to the three key pillars that underpin effective, efficient teaching: the lesson, the curriculum and the school's support structure. *Teach Like Nobody's Watching* explores these three core elements in detail, and presents teachers with a range of practical, time-efficient approaches to help them reclaim their professional agency and ensure that their pupils get the excellent education they deserve. Part I considers the individual lesson and explores how lessons can be built around four simple elements: recap, input, application and feedback. Each chapter considers one aspect of the lesson in turn and discusses its importance with a particular focus on how educational research can be applied to it in the classroom, how it might look in different subjects, and the potential pitfalls to avoid. Part II recognises that lessons don't happen in isolation but as part of a wider curriculum. This section tackles: the creation of a programme of study that takes pupils on a journey through your subject; the super-curriculum of what happens outside the classroom; the principles of assessment design; and how time in departments can be used to reduce workload and support a culture of excellence. Finally, Part III looks at the role of the wider school in supporting teachers to teach like nobody's watching and how leaders can help to set them free from some of the more burdensome pressures. In this section, Mark draws on the experience of school leaders in a range of different contexts to illustrate what they have done to support effective and efficient teaching in their schools. Suitable for all teachers in both primary and secondary schools.

Tips and techniques to build interactive learning into lecture classes Have you ever looked out across your students only to find them staring at their computers or smartphones rather than listening attentively to you? Have you ever wondered what you could do to encourage students to resist distractions and focus on the information you are presenting? Have you ever wished you could help students become active learners as they listen to you lecture? *Interactive Lecturing* is designed to help faculty members more effectively lecture. This practical resource addresses such pertinent questions as, "How can lecture presentations be more engaging?" "How can we help students learn actively during lecture instead of just sitting and passively listening the entire time?" Renowned authors Elizabeth F. Barkley and Claire H. Major provide practical tips on creating and delivering engaging lectures as well as concrete techniques to help teachers ensure students are active and fully engaged participants in the learning process before, during, and after lecture presentations. Research shows that most college faculty still rely predominantly on traditional lectures as their preferred teaching technique. It is a proven teaching and learning strategy that can be readily incorporated into every teacher's methods. In addition to providing a synthesis of relevant, contemporary research and theory on lecturing as it relates to teaching and learning, this book features 53 tips on how to deliver engaging presentations and 32 techniques you can assign students to do to support their learning during your
