The Anachronistic Turn: Historical Fiction, Drama, Film and Television is the first study to investigate the ways in which the creative use of anachronism in historical fictions can allow us to rethink the relationship between past and present. Through an examination of literary, cinematic, and popular texts and practices, this book investigates how twenty-first century historical fictions use creative anachronisms as a way of understanding modern issues and anxieties. Drawing together a wide range of texts across all forms of historical fiction - novels, dramas, musicals, films and television - this book re-frames anachronism not as an error, but as a deliberate strategy that emphasises the fictionalising tendencies of all forms of historical writing. The book achieves this by exploring three core themes: the developing trends in the twenty-first century for creators of historical fiction to include deliberate anachronisms, such as contemporary references, music, and language; the ways in which the deliberate use of anachronism in historical fiction can allow us to

rethink the relationship between past and present, and; the way that contemporary historical fiction uses anachronism to better understand modern issues and anxieties. This book will appeal to students and scholars of historical fiction, contemporary historical film and television studies, and historical theatre studies.

On 24 February 2022, Russia invaded Ukraine in a major escalation of the Russo-Ukrainian War, which began in 2014. Following the 2014 Ukrainian Revolution, Russia annexed Crimea, and Russian-backed paramilitaries seized part of the Donbas region of south-eastern Ukraine, which consists of Lugansk and Donetsk oblasts, sparking a regional war. In March 2021, Russia began a large military build-up along its border with Ukraine, eventually amassing up to 190,000 troops and their equipment. Despite the build-up, denials of plans to invade or attack Ukraine were issued by various Russian government officials up to the day before the invasion. On 21 February 2022, Russia recognized the Donetsk People's Republic and the Lugansk People's Republic, two self-proclaimed breakaway quasi-states in the Donbas. The next day, the Federation Council of Russia

authorized the use of military force and Russian troops entered both territories. This book tries to shed light on the causes which led to this war. It presents arguments of both sides carried through the words of presidents Putin and Zelenskyy. This edition includes as well the book about the historical background of the conflict and the military actions during the war. Content: The Speeches and Decisions of Vladimir Putin The Speeches and Decisions of Volodymyr Zelenskyy The Consequence: Russo-Ukrainian War

As the Egyptian revolution unfolded throughout 2011 and the ensuing years, no one was better positioned to comment on it—and try to push it in productive directions—than best-selling novelist and political commentator Alaa Al-Aswany. For years a leading critic of the Mubarak regime, Al-Aswany used his weekly newspaper column for Al-Masry Al-Youm to propound the revolution’s ideals and to confront the increasingly troubled politics of its aftermath. This book presents, for the first time in English, all of Al-Aswany’s columns from the period, a comprehensive account of the turmoil of the post-revolutionary years, and a portrait of a country and a people in flux. Each column is presented along with a context-setting introduction, as well as notes and a glossary, all designed to give non-Egyptian readers the background they need to understand the events and figures that Al-Aswany chronicles. The result is a definitive portrait of Egypt today—how it got here, and where it might be headed.

A/AS Level History for AQA The American Dream: Reality and Illusion, 1945–1980 Student Book Cambridge University Press

Jesus was born in Bethlehem, but why Bethlehem? Why should God purpose to become man somewhere so marginal, so insignificant? This book follows the unfolding story of Bethlehem through the Bible, from the death of Rachel to the birth of Jesus, uniquely combining four perspectives: a) the Bible as one developing story, b) the Bible as a Middle Eastern book, c) insights from contemporary Palestinians from Bethlehem, and d) what this means for mission. Suffering Rachel, refugee Rahab, vulnerable Ruth, overlooked David all have a connection with Bethlehem. If Bethlehem shelters refugees, then so must we. If Bethlehem welcomes strangers, so must we. If Bethlehem weeps at injustice, and takes a stand against empire, so must we. What we see in Bethlehem’s story, we apply to our own stories. We enter into Bethlehem’s story with as much cultural and geographical colour and flavour as we can muster in order to feel the crises, taste the dust, hear the lambs bleating on the hillside. And there we find the Christ-child, son of David, the Good Shepherd, Lion of Judah, Bread of Life, Lamb of God, fulfilling all the recurring themes, taking his inevitable place as rightful king.

Mahmoud Darwish, Exile's Poet Stackpole Books

A thrilling, vivid, and “compelling” (Wall Street Journal) account of the epic siege during one of World War II’s most important battles, told by the brilliant British editor-turned-historian and author of Checkpoint Charlie. To the Soviet Union, the sacrifices that enabled the country to defeat Nazi Germany in World War II were sacrosanct. The foundation of the Soviets’ hard-won victory was laid during the battle for the city of Stalingrad, resting on the banks of the Volga River. To Russians, it is a pivotal landmark of their nation’s losses, with more than two million civilians and combatants either killed, wounded, or captured during the bitter fighting from September 1942 to February 1943. Both sides endured terrible conditions in brutal, relentless house-to-house fighting. Within this life-and-death struggle, Soviet war correspondents lauded the fight for a key strategic building in the heart of the city, “Pavlov’s House,” which was situated on the frontline and codenamed “The Lighthouse.” The legend grew of a small garrison of Russian soldiers from the 13th Guards Rifle Division holding out against the Germans of the Sixth Army, which had battled its way to the very center of Stalingrad. A report about the battle in a local Red Army newspaper would soon grow and be repeated on Moscow radio and in countless national newspapers. By the end of the war, the legend would gather further momentum and inspire Russians to rebuild their destroyed towns and cities. This story has become a pillar of the Stalingrad legend and one that can now be told accurately. Written with “impressive skill and relish” (Sunday Times), The Lighthouse of Stalingrad sheds new light on this iconic battle through the prism of the two units who fought for the very heart of the city itself. Iain MacGregor traveled to both German and Russian archives to unearth previously unpublished testimonies by soldiers on both sides of the conflict. His “utterly riveting” (Alex Kershaw) narrative lays to rest the questions as to the identity of the real heroes of this epic battle for one of the city’s most famous buildings and provides authoritative answers as to how the battle finally ended and influenced the conclusion of the siege of Stalingrad.

Wild Immunology—The Answers Are Out There John Wiley & Sons

Methods in World History is the first international volume that systematically addresses a number of methodological problems specific to the field of World History. Prompted by a lack of applicable works, the authors advocate a considerable sharpening of the tools used within the discipline. Theories constructed on poor foundations run an obvious risk of reinforcing flawed assumptions, and of propping up other, more ideological constructions. The dedicated critical approach outlined in this volume helps to mitigate such risks. Each essay addresses a particular issue, discussing its problems, giving practical examples, and offering solutions and ways of overcoming the difficulties involved. The perspectives are varied, the criticism focussed, and a common theme of coalescence is maintained throughout. This unique anthology will be of great use to advanced scholars of World History, and to students entering the field for the first time.

The Bethlehem Story Routledge

“Go into partnership with nature; she does more than half the work and asks none of the fee.” - Martin H. Fisher. Nature has undertaken an immense amount of work throughout evolution. The evolutionary process has provided a power of information that can address key questions such as - Which immune molecules and pathways are conserved across species? Which molecules and pathways are exploited by pathogens to cause disease? What methods can be broadly used or readily adapted for wild immunology? How does co-infection and exposure to a dynamic environment affect immunity? Section 1 addresses these questions through an evolutionary approach. Laboratory mice have been instrumental in dissecting the nuances of the immune system. The first paper investigates the immunology of wild mice and reviews how evolution and ecology sculpt differences in the immune responses of wild mice and laboratory mice. A better understanding of wild immunology is required and sets the scene for the subsequent papers. Although nature doesn't ask for a fee, it is appropriate that nature is repaid in one form or another. The translational theme of the second section incorporates papers that translate wild immunology back to nature. But any non-human, non-laboratory mouse research environment is hindered by a lack of research tools, hence the underlying theme throughout the second section. Physiological resource allocation is carefully balanced according to the most important needs of the body. Tissue homeostasis can involve trade-offs between energy requirements of the host and compensatory mechanisms to respond to infection. The third section comprises a collection of papers that employ novel strategies to understand how the immune system is compensated under challenging physiological situations. Technology has provided substantial advances in understanding the immune system at cellular and molecular levels. The specificity of these tools (e.g. monoclonal antibodies) often limits the study to a specific species or strain. A consequence of similar genetic sequences or cross-reactivity is that the technology can be adapted to wild species. Section 4 provides two examples of probing wild immunology by adapting technology developed for

laboratory species.

Electric propulsion for boats was developed in the early 19th century and—despite the advent of the internal combustion engine—continued with the perfecting of the modern turbo-electric ship. Sustainable and hybrid technologies, pioneered in small inland watercraft toward the end of the 20th century, have in recent years been scaled up to create integrated electric drives for the largest ocean-going vessels. This comprehensive history traces the birth and rebirth of the electric boat from 1835 to the present, celebrating the Golden Age of electric launches, 1880–1910.

Analysing the transformation of Berlin's former Allied border control point, "Checkpoint Charlie," into a global heritage industry, this volume provides an introduction to, and a theoretically informed structuring of, the interdisciplinary international heritage debate. This crucial case study demonstrates that an unregulated global heritage industry has developed in Berlin which capitalizes on the internationally very attractive - but locally still very painful - heritage of the Berlin Wall. Frank explores the conflicts that occur when private, commercial interests in interpreting and selling history to an international audience clash with traditional, institutionalized

public forms of local and national heritage-making and commemorative practices, and with the victims' perspectives. *Wall Memorials and Heritage* illustrates existing approaches to heritage research and develops them in dialogue with Berlin's traditions of conveying history, and the specific configuration of the heritage industry at "Checkpoint Charlie". Productively integrating theory with empirical evidence, this innovative book enriches the international literature on heritage and its economic and political contexts.
