The epic 1950s battle that would shape the legal future of the civil rights movement is chronicled here for the first time. The bitter feud between President Dwight D. Eisenhower and Chief Justice Earl Warren framed the tumultuous future of the modern civil rights movement. Eisenhower was a gradualist who wanted to coax white Americans in the South into eventually accepting integration, while Warren, author of the Supreme Court's historic unanimous opinion in *Brown v. Board of Education*, demanded immediate action to dismantle the segregation of the public school system. In *Eisenhower vs. Warren*, two-time New York Times Notable Book author James F. Simon examines the years of strife between them that led Eisenhower to say that his biggest mistake as president was appointing that "dumb son of a bitch Earl Warren." This momentous, poisonous relationship is presented here at last in one volume. Compellingly written, *Eisenhower vs. Warren* brings to vivid life the clash that continues to reverberate in political and constitutional debates today.

Acclaimed astrophysicist David Darling comes well-armed with both science and mysticism to provide a theory of consciousness and its final conclusion. The science of death and the logic of reincarnation give pause to our current thinking process. Yet, after reading this book you can nod our head in understanding and move on, more mature perhaps in knowing we do live on in some sense. Just not in the way we most wished for.

A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published *Last Letters from Hav* in 1985, it was short-listed for the Booker Prize. Here it is joined by *Hav of the Myrmidons*, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

Violence is one of the most important challenges, not only for public health systems, but also for public mental health. Violence can have immediate as well as long-term and even transgenerational effects on the mental health of its victims. This book provides a comprehensive and wide-ranging assessment of the mental health legacy left by violence. It addresses the issues as they affect

states, communities and families, in other words at macro-, meso- and microlevels, beginning by describing the impact of violence on neurobiology and mental health, as well as the spectrum of syndromes and disorders associated with different forms of violence. The work moves on to tackle violence at the international—and intranational—level before zeroing in on the nature of violence in communities such as villages or city districts. It also examines the results of violence in the family. Each type of violence has distinct effects on mental health and in each chapter specific groups are explored in depth to demonstrate the heterogeneity of violence as well as the diversity of its outcomes in the realm of public mental health. Finally, the book addresses the notion of 'undoing violence' by detailing case studies of effective interventions and prevention occurring in countries, communities and families. These cases give us pause to reflect on the nature of resilience and dignity in the context of violence and mental health. All the chapters have been written by leading authors in the field and provide a state-of-the-art perspective. The authors, from different fields of expertise, facilitate interdisciplinary and international insights into the impact of violence on mental health.
