DAPHNE DAISY

English Mechanic and Mirror of Science

Springer

Over the last forty years, the functionalist approach to linguistic description and explanation has given rise to several major schools of thought that share two crucial assumptions: (i) form is not independent of meaning/function or language use; and (ii) linguistic description and explanation need to take into account the communicative function of language. This volume offers readers interested in functional linguistics a selected sample of studies that jointly prove the efficacy of the analytical tools and procedures broadly accepted within the functionalist tradition in order to investigate language and discourse, with special focus on key pragmatic/discourse notions such as contextualization, grammaticalisation, reference, politeness, (in-)directness, discourse markers, speech acts, subjective evaluation and sentiment analysis in texts, among others. In addition, this volume

offers specific corpus-based techniques for the objective contextualisation of linguistic data, which is crucial given the central role allotted to context in both functional linguistics and pragmatics/discourse analysis.

Political and personal satires John Benjamins Publishing Company

In this stimulating collection of papers, leading researchers from Europe and North America demonstrate the theoretical and methodological importance of corpus studies of phraseology and show how data-intensive case studies provide new perspectives on language use. One of the main theoretical findings of recent linguistics is that phraseology is central to language organization. The authors show how software and statistical techniques can reveal phraseological patterns in different text types – literary, academic and commercial – and also typical paths of language change across the last 200 years. These patterns are revealed only when computational methods

are applied to corpora consisting of hundreds of millions of running words, collected from thousands of authentic texts. A major feature of the book is its critical comparison and evaluation of different quantitative and statistical tools, which readers can use for their own empirical work. Originally published in International Journal of Corpus Linguistics, Vol. 18:1 (2013).

This edited volume brings together the work of a number of researchers working in the framework of Processability Theory (PT), a psycholinguistic theory of second

language acquisition (SLA) (Pienemann 1998; 2005). The aim of the volume is two-fold: It engages with current issues in both theory development and theory application and focuses on theoretical developments within the framework of PT as well as issues related to second language teaching and assessment. In coordinating approaches to addressing both theoretical and applied aspects of SLA, this volume aims at bridging the gap between theory and practice. It also reflects the richness of debate within the field of PT-based research. The volume is intended for postgraduate students, SLA researchers as well as language teachers. As of January 2019, this e-book is freely available, thanks to the support of libraries working with Knowledge Unlatched.

John Benjamins Publishing Company

In its Second Edition, *Handbook of Pulping and Papermaking* is a comprehensive reference for industry and academia. The book offers a concise yet thorough introduction to the process of papermaking from the production of wood chips to the final

testing and use of the paper product. The author has updated the extensive bibliography, providing the reader with easy access to the pulp and paper literature. The book emphasizes principles and concepts behind papermaking, detailing both the physical and chemical processes. A comprehensive introduction to the physical and chemical processes in pulping and papermaking. Contains an extensive annotated bibliography. Includes 12 pages of color plates. The Journal of Education John Benjamins Publishing Company

This book presents a selection of empirical papers dealing with second and multiple language acquisition, in which qualitative research methodology is employed. Each of the studies reported in individual chapters is based on a solid theoretical background and an overview of studies in a given area. Although the main focus is on qualitative methods, some of the papers demonstrate the complementarity of quantitative and qualitative approaches in studying language acquisition.

Bengal's traditional industries, once celebrated worldwide, largely decayed under the backwash effects of the British Industrial Revolution in the first half of the nineteenth century. Although colonial ambivalence is often cited as an explanation, this study also shows that a series of new industries emerged during this period. The book reappraises the thesis of India's deindustrialisation and discusses the development status of the traditional industries in the early nineteenth century, examines their technology, employment opportunities and marketing and, finally, analyses the underlying reasons for their decay. It offers a study of how

traditional industries evolved into modern enterprises in a British colony, and contributes to the broader discussion on the global history of industrialisation. This book will be of interest to scholars of Indian economic history as well as those who seek to understand the widespread effects of industrialisation, especially in a colonial context.

The Manuals include information on syllabus, regulations, copies of examination papers and notes by examiners. They also include pass lists.

Manual of the Public Examinations Board

Introduction to English as a Second Language Workbook accompanies the Coursebook (sold separately) in this Fourth edition series, and is presented in an accessible updated design. Each Workbook unit reinforces the topic and theme from the corresponding Coursebook unit, and provides additional practice in reading, writing and listening. Furthermore, each Workbook unit starts with a review of key vocabulary from the corresponding Coursebook unit, and

contains a specific language focus.
