 Nature
 In the spirit of Pieter Sanders's classic *Quo Vadis Arbitration?* (1999), this far-reaching overview of the state of international arbitration thoroughly assesses the current condition and prospects of arbitration and conciliation with practical, insightful

solutions to the new and emerging problems confronting arbitration practice today. A distinguished group of internationally renowned arbitrators, academics, and lawmakers elucidate the ubiquitous evolution towards increased technical complexity, the need for multi-focal and multi-cultural approaches, and the tension between desirable simplicity and indispensable precision that have come to characterize current arbitral practice and procedure. Among the topics covered are the following: remote hearings; reliance on digital technology; cost of arbitration in a post-COVID world; extension of the arbitration agreement to non-

signatories; tailoring of ADR techniques to suit the needs of micro, small, and medium-sized enterprises; jurisdictions emerging as new arbitration hubs, e.g., Delaware, the Caribbean, Scotland; evolution of a code of conduct for adjudicators in investment disputes; and the reform of bilateral investment treaties. As Sanders's 1999 book did at the time, the chapters identify specific improvements and refinements to the entire system as it has developed over recent decades. The book will be a go-to resource for the arbitration community worldwide as a stocktaking of current and ongoing trends in international arbitration. It will enthuse the many

lawyers, judges, legislators, and businesspeople to whom it is addressed. Fibre2Fashion - Textile Magazine - October 2016 Springer Nature

The COVID-19 pandemic changed world dynamics, working scenarios, as well as professional and emotional dimensions. The virus has emerged as a significant threat for the continuity of business. Keeping the gravity of the problem in mind, companies must understand the need for change and must now update their strategy to account for pandemics. The next pandemic may be more severe than the current one, meaning that organizations need to devise mechanisms and business models to

fight with these situations and maintain business continuity. They should not only look forward to saving plants, machinery and infrastructure, but also concentrate on employee welfare, customer engagement and satisfaction during this crisis time. The book will not only present the evidence of various effective solutions to run a business in the time of a pandemic, but also put forward the new models and practices of business being followed by people at the time of crisis. It aims to create a bridge between existing business models and proposed business solutions, focusing on existing theories and most importantly case studies from recent happenings. This rich

collection of chapters will provide insights regarding the business challenges, opportunities and practices during pandemic situations like COVID-19, making it particularly valuable to researchers, academics and students in the fields of strategic management, leadership and disaster management.

Sustainable Asia: Supporting The Transition To Sustainable Consumption And Production In Asian Developing Countries

Disha Publications
Fibre2Fashion magazine—the print venture of Fibre2Fashion.com since 2011—is circulated among a carefully-chosen target audience globally, and

reaches the desks of top management and decision-makers in the textiles, apparel and fashion industry. As one of India's leading industry magazines for the entire textile value chain, Fibre2Fashion Magazine takes the reader beyond the mundane headlines, and analyses issues in-depth.

Quarterly Current Affairs - April to June 2017 for Competitive Exams Taylor & Francis
Disha's BESTSELLER "23 Years CSAT General Studies IAS Prelims & Mains Topic-wise Solved Papers (1995-2017)" consists of past years solved papers of the General Studies Paper 1 & 2 distributed into 8 Units and 52 Topics. This is the 8th edition of the book and has been thoroughly revised and

updated. The book has been designed in 2 colour so as to make it more student friendly. The book also provides Essays divided topic-wise from 1993-2016. The strength of the book lies in the Errorless DETAILED Solutions. The book is 100% useful for both the General Studies papers (1 and 2) of the Prelims/ CSAT.

Повышение конкурентоспособности в странах Центральной Азии
 OECD Publishing
 Micro, Small and Medium Enterprises (MSME) sector has emerged as a highly vibrant and dynamic sector of the Indian economy over the last six decades. MSMEs not only play crucial role in providing large employment opportunities at

comparatively lower capital cost than large industries but also help in industrialization of rural & backward areas, thereby, reducing regional imbalances, assuring more equitable distribution of national income and wealth. MSMEs are complementary to large industries as ancillary units and this sector contributes enormously to the socio-economic development of the country. The principal focus of this seminar is to create an awareness about MSME amongst the participants and also make them understand the process of starting an enterprise. This Seminar will provide a platform where the Government programmes related to

MSMEs can be very well understood.

OECD Public Governance Reviews Public Procurement in Peru Reinforcing Capacity and Co-ordination OECD Publishing

The integration of digital technologies into practice presents opportunities and challenges for the field of youth work.

Digitalization procedures transform interactions with users, in addition to their needs. These also transform the organizations where youth workers are involved in professional practice. Adapting digital technological tools is a crucial challenge for the youth work profession. *Youth Work in a Digital Society* is an essential scholarly publication

that explores how to overcome any challenges and issues facing youth development work in the digital age and to what extent modern digital technologies can contribute to empowering youth work practice.

Featuring a wide range of topics such as digital inclusion, mobile technologies, and social media, this book is ideal for executives, managers, researchers, professionals, academicians, policymakers, practitioners, and students.

Enhancing Competitiveness in Central Asia IGI

Global

In the emerging narrative of sustainable development in Asia,

the essential challenge is to reduce the use of natural resources and environmental degradation alongside the increasing demand for goods and services. To achieve this, Sustainable Consumption and Production (SCP), one of the Sustainable Development Goals (SDGs) adopted by the United Nations in 2015, aims at reconciling the three goals of minimising the extraction of natural resources from the environment, limiting waste and emissions over the life cycle of goods and services and improving human development and wellbeing. Sustainable Asia: Supporting the Transition to Sustainable Consumption and Production in Asian

Developing Countries provides an overview and analysis of the current status of SCP in Asian developing countries. The book focuses on projects supported by the EU-funded SWITCH-Asia Programme, a regional development cooperation programme promoting the adoption of SCP practices among small and medium-sized enterprises (SMEs) and consumer groups in Asia since 2007. For readers looking for a comprehensive introduction to the topic of SCP together with a detailed analysis of the current developmental situation in various Asian developing countries and key sectors such as manufacturing, tourism, renewable

energy and agriculture, this book is an invaluable tool. The book examines in detail the SCP approaches and innovative solutions demonstrated by the SWITCH-Asia supported projects in Asia and thus serves as a reference for practitioners, researchers and policymakers alike.

Just Transition in India: An inquiry into the challenges and opportunities for a post-coal future IGI Global

This book gathers selected research articles from the International Conference on Innovative Product Design and Intelligent Manufacturing System (ICIPDIMS 2019), held at the National Institute of Technology,

Rourkela, India. The book discusses latest methods and advanced tools from different areas of design and manufacturing technology. The main topics covered include design methodologies, industry 4.0, smart manufacturing, and advances in robotics among others. The contents of this book are useful for academics as well as professionals working in industrial design, mechatronics, robotics, and automation.

Youth Work in a Digital Society Springer

Nature

TERI Energy & Environment Data Diary and Yearbook (TEDDY) is an annual publication brought out by The Energy and Resources Institute (TERI) since 1986. It is the only

comprehensive energy and environment yearbook in India that provides updated information on the energy supply sectors (coal and lignite, petroleum and natural gas, power, and renewable energy sources), energy demand sectors (agriculture, industry, transport, household), and local and global environment sectors (environment and climate change). The publication also provides a review of the government policies that have implications for the sectors of the Indian economy. In TEDDY, an account of India's commercial energy balances is given, which provide comprehensive information on energy flows within different

sectors of the economy and how they have been changing over time. These energy balances and conversion factors are a valuable ready reckoner for researchers, scholars, and organizations working in the energy sector. After the introductory chapters, for the ease of readers, TEDDY has been divided into sections on energy supply, energy demand, and local and global environment. Interactive graphs, figures, maps, and tables have been used throughout the chapters to explain facts, which make the book an interesting read. In addition, detailed tables at the end of each chapter represent statistical data on each of the

above-mentioned sectors. The publication is accompanied by a complimentary CD containing full text. The publication has more than 15,000 readers across the globe and is often cited in international peer-reviewed journals and policy documents. Innovative Product Design and Intelligent Manufacturing Systems OECD Publishing Kazakhstan, Kyrgyzstan, Mongolia, Tajikistan, Turkmenistan and Uzbekistan have recorded impressive economic growth rates since 2000, driven mainly by the export of commodities and labour. However, the end of the commodity super-cycle and the recent economic slowdown highlighted

the risks inherent in this reliance on minerals exports and remittances, as well as the challenges to be overcome to achieve more stable and inclusive growth. The Central Asian countries have long recognised the importance of enhancing the competitiveness of their economies, diversifying the production structures and improving the resilience to external shocks. This will require ambitious reforms in three areas: governance, connectivity, and business environment. This publication focuses mostly on aspects of the business environment and reflects several years of OECD work with Central Asian countries on access to finance,

business internationalisation and skills development. Each of the country case studies presented here is the result of a country-specific project carried out by the OECD, hand-in-hand with the governments of Kazakhstan, Kyrgyzstan, Mongolia, Tajikistan, Uzbekistan.

Modi Empowers Development Allied Publishers

COVID-19 has changed not only human lives since the beginning of the year 2020, but systems of human society as well. Legal measures have been employed in every country to mandate the state's control of human behavior in order to stop the pandemic. But the mode of legal control has differed by country, showing

different results in terms of constraining the spread of infection. While the behavioral restrictions continue, the socio-economic impacts of the pandemic have been causing another catastrophe, particularly in the most vulnerable sectors of each society. Small and medium-sized enterprises (SMEs) are typical representatives of such vulnerable groups, compelled to assume the economic burdens of the pandemic that have been shifted from the larger economic actors that hold the advantage in contractual negotiations. Statistical data on infection status have revealed a great gap between countries, such as European nations reaching the

level of several thousand deaths per one hundred thousand population, while most Asian countries have maintained a level of one or two digits. Even though COVID-19 affects the whole world, the redistribution of risks in the pandemic is a goal to be pursued in the socio-cultural context of each society. This book explores the law and social changes in Asian countries under the impact of COVID-19, with a particular focus on the social relations surrounding the SMEs. These form the center of contractual relations between various socio-economic actors and at the same time, are a direct counterpart of the governmental SME policies, peculiar to Asian interventionist

governments. A comparative approach is taken, using the results of interview surveys based on structured questions conducted via research collaboration between the contributors from Japan as well as other Asian countries. A comparative analysis of the risk redistribution in the pandemic between countries that share similar preconditions is still possible and meaningful. The authors of this book hold the view that Asian countries have sufficient bases for international comparison, particularly on the risk reallocation in the SME sector, given the relatively well-controlled level of infection, presumably due to the similarity of

cooperative social culture. Another basis for comparison is the similarity of the laws surrounding the business operation of SMEs since normal times, which makes it feasible to compare the difference in the pandemic. What risks should be reallocated between whom, and how?

Energy, Environment and Globalization
OECD Publishing

This book analyzes contemporary issues relating to energy, environment, and globalization in the Indian context. As a signatory to the Paris climate accord, India has reiterated its commitment to taking strong and positive steps toward climate change mitigation. However, as one of the fastest growing

economies in the world, it is battling the effects of a steep rise in fossil fuel usage and pollution. Further, increasing globalization is leading to greater economic activity and production, resulting in additional energy use, which has a negative effect on the environment. The book argues that globalization need not have only a negative environmental impact; it can also have positive impact through the importation of environmentally sound technologies and implementing global compliance standards. The book is divided into three sections: The energy section discusses issues relating to the status of Indian natural gas market and the need

for developing an efficient gas market in India; the economics and politics of sustainable energy in India; the challenges of thermal power and significance of clean thermal power generation in India; environmental and policy issues concerning energy use in urban India; the importance of energy use in developing Human Development Index (HDI); and issues relating to renewable energy in India. The environment section then examines topics such as the impact of global warming on local weather by examining the frequency of extreme weather events such as drought and floods, and their impact on farming activities in the Indian state of

Odisha; the importance of according the economic value to environmentally significant things like national park , mangroves, etc. for sustainable development; the role of environmental accounting for ecological sustainability and ecotourism; and environmental concerns increasingly gaining traction among the corporate sector for their long-run benefits . Lastly, the third section addresses issues relating to the challenges and opportunities of globalization, such as the interface between globalization and environment; managing India's business interest in proposing new Bilateral Investment Treaty

(BIT); the challenges being faced by Indian exports and their revival; and making Indian SMEs competitive. As such, it is an invaluable resource for policymakers, researchers, practitioners and students in the field of energy, environment and trade economics.

Investing in women livestock advisers and farmers Bloomsbury Publishing

This book investigates how development institutions created and promoted marketized development financial instruments to increase the speed and scope of assistance by leveraging private financial markets for development objectives. To attract private investors,

donor governments agreed to bear the risk in these new instruments in order to mobilize investment during times of political crisis. In particular, this book contends that Germany's KfW played an outsized role in the development of these new financial instruments, particularly in microfinance banks and structured funds, as KfW's unique institutional attributes and strong political support from the German government at critical junctures fostered financial innovation. Using over 70 interviews and a cache of newly released archival materials, this book documents how KfW and other development institutions created and promoted these

marketized development financial instruments, and how they have become a pillar of modern development policy.

Handbook of Research on Sustaining SMEs and Entrepreneurial Innovation in the Post-COVID-19 Era OECD Publishing

This second edition of *Government at a Glance: Latin America and the Caribbean* provides the latest available data on public administrations in the LAC region and compares it to OECD countries.

Changing Law and Contractual Relations under COVID-19

IGI Global
This book presents a critical understanding of Indian business situated as an encounter between indigeneity and

Western modernity by exploring notions and practices of responsibility. It brings the paradoxical nature of Indian businesses to the fore: though they have a rich history of philanthropic contributions to social causes, they have also been known for labour rights and human rights violations, environmental abuses, destruction of habitats, pollution and corruption. The book shows how Indian firms straddle these two starkly contrasting positions and the many blends in between to conform to global developments in the pursuit of corporate social responsibility (CSR). It also looks at the emergent field of critical studies and analysis of CSR, especially from the

context of a developing country. Part of the 'Contemporary Themes in Business and Management' series, this book will interest scholars of international business studies, management studies, economics, post-colonial management, organisational studies and corporate social responsibility, as well as businesses, corporates and practitioners.

 Digital technologies are changing both the national and global business landscapes. Digitalization within firms and industries and newcomers from other fields give new conditions for competition through new business models. The Handbook of Research on Business Model Innovation Through Disruption and Digitalization discusses the aspects of the innovation of business

models through disruption and digitalization. It further includes chapters on theories and practices related to the overall theme of how business models are developed. Covering topics such as agile networks, interactive business models, and managerial implications, this major reference work is a dynamic resource for business leaders and executives, IT managers, human resource managers, entrepreneurs, government officials, students and faculty of higher education, librarians, researchers, and academicians.
