This monograph is based on the author's results on the Riemannian geometry of foliations with nonnegative mixed curvature and on the geometry of submanifolds with generators (rulings) in a Riemannian space of nonnegative curvature. The main idea is that such foliated (sub) manifolds can be decomposed when the dimension of the leaves (generators) is large. The methods of investigation are mostly synthetic. The work is divided into two parts, consisting of seven chapters and three appendices. Appendix A was written jointly with V. Toponogov. Part 1 is devoted to the Riemannian geometry of foliations. In the first few sections of Chapter I we give a survey of the basic results on foliated smooth manifolds (Sections 1.1-1.3), and finish in Section 1.4 with a discussion of the key problem of this work: the role of

Riemannian curvature in the study of foliations on manifolds and submanifolds. *Report of the Superintendent of Public Instruction of the Commonwealth of Pennsylvania, for the Year Ending ...*

Philosopher, physician, and master of rabbinical literature, Moses ben Maimon (1135-1204) strove to reconcile biblical revelation with medieval Aristotelianism. His writings, especially the celebrated *Guide for the Perplexed*, exercised considerable influence on both Jewish and Christian scholasticism and brought him lasting renown as one of the greatest medieval thinkers. This volume contains his most significant ethical works, newly translated from the original sources by Professors Raymond L. Weiss and Charles E. Butterworth, well-known Maimonides scholars. Previous translations have often been inadequate — either because they were not based on the best possible texts or from a lack of precision. That deficiency has been remedied in this text; the translations are based on the latest scholarship and have been made with a view toward maximum accuracy and readability. Moreover, the long "Letter to

Joseph" has been translated into English for the first time. This edition includes the following selections: I. Laws Concerning Character Traits (complete) II. Eight Chapters (complete) III. On the Management of Health IV. Letter to Joseph V. Guide of the Perplexed VII. The Days of the Messiah Taken as a whole, this collection presents a comprehensive and revealing overview of Maimonides' thought regarding the relationship of revelation and reason in the sphere of ethics. Here are his teachings concerning "natural law," secular versus religious authority, the goals of moral conduct, diseases of the soul, the application of logic to ethical matters, and the messianic era. Throughout, the great sage is concerned to reconcile the apparent divergence between biblical teachings and Greek philosophy.
