Lucas Pacioli's Treatise (A. D. 1494--the Earliest Known Writer on Bookkeeping) Reproduced and Translated with Reproductions, Notes and Abstracts from Manzoni, Pietra, Mainardi, Ympyn, Stevin and Dafforne Routledge

From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called "the Dear Abby of the work world." Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit "reply all" • you're being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate's loud speakerphone is making you homicidal • you got drunk at the holiday party Praise for Ask a Manager "A must-read for anyone who works . . . [Alison Green's] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work."—Booklist (starred review) "The author's friendly,

warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers' lives. Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work experience."—Library Journal (starred review) "I am a huge fan of Alison Green's Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor."—Robert Sutton, Stanford professor and author of The No Asshole Rule and The Asshole Survival Guide "Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way."—Erin Lowry, author of Broke Millennial: Stop Scraping By and Get Your Financial Life Together

"This is essential reading for anyone seeking to compete and succeed in the flat world." –John Hagel, Chairman of Deloitte Center of Innovation "Competing in a Flat World provides an extraordinary glimpse into a new kind of organizational architecture, one built around the notion of orchestrating resources you don't control and doing so in a way that builds both trust and agility. This architecture may well turn out to be the dominant model of the firm for the 21st century. This book is a must read for anyone who wants to compete in a flat world. Every chapter details new and powerful ideas." –John Seely Brown, Former Chief Scientist of Xerox Corporation and coauthor of The Only Sustainable Edge "We are led by unstoppable economic forces to connect our resources to form smart networks, either wired or unwired. The authors bring forward the notion of

'network orchestration,' an almost one-size-fits-all strategy for organizations to survive and excel in an ever-flattening world." –John Chen, Sybase Chairman, CEO and President In the "flat world," everything changes...above all, what it takes to run a winning company. Success is less about what the company can do itself and more about what it can connect to. Find out how it's done, from the company that pioneered "flat world" success, Li & Fung, which produces more than \$8 billion in garments and other goods for the world's top brands and retailers—without owning a single factory. Victor and William Fung and Jerry Wind, author of the best-selling The Power of Impossible Thinking, reveal how they've replaced "old-fashioned" infrastructure and huge employee bases with a fluid, ever-changing network that can design, manufacture, and deliver almost anything, anywhere. The key to success in this world is a set of principles for "network orchestration," described for the first time in this book. They examine how these principles can be applied in manufacturing, services and other industries. They show how to build and orchestrate your own world-class global network. * Compete "network vs. network"—and win! * Create a "big-small" company that combines scale and agility * Forge loose-tight relationships with suppliers * Balance control with empowerment, stability with renewal * Manage the "bumps" in the flat world—from politics to terrorism Visit the authors' website: www.competinginaflatworld.net

Building Enterprises for a Borderless World "O'Reilly Media, Inc."

Goodwill, sometimes purchased but often more significantly internally generated, is the major constituent of the value of many listed companies. Accounting aims to provide users of financial statements with useful information, and more than fifty current International Financial Reporting Standards prescribe accounting disclosure requirements in minute detail. However, these Standards dismiss internally generated goodwill with a single brief provision that it is not to be brought to account at all. The impairment regime now laid down for dealing with purchased goodwill contains severe flaws, while previous methods have also been found to be unsatisfactory. This book traces the history of the goodwill accounting controversy in detail and demonstrates that it has been a prime example of an issue 'conceived in a way that it is in principle unsolvable'. It explores the problem of recognising the importance of goodwill as a whole and finding a way of presenting meaningful information regarding it in the context of the financial statements. The author's proposed solution builds upon research undertaken and uses a Market Capitalization Statement, based on a modification of nineteenth century 'double accounting' in a modern context. Examples show that the proposed Market Capitalization Statement has the potential to provide significant information not currently available from conventional financial statements, which in turn are freed to present clearer information.
