The goals of the National Workshop on Micro-enterprise Development in Coastal Communities in the Philippines were to exchange experiences and good practices and to identify financial and institutional support services and facilities to sustain livelihoods and micro-enterprise development in coastal areas. The workshop was attended by 45 participants from people's organizations, fisherfolk cooperatives, non-governmental organizations, national government agencies and financing institutions. The discussions at the workshop showed that livelihood diversification and the improvement of income and

employment opportunities in coastal fishing communities are crucial for their participation in the conservation and management of aquatic resources. Key elements of sustainable micro-enterprise development as identified by the workshop include capability building of fisherfolk organizations such as cooperatives and associations to implement livelihood projects, the preparation of feasibility studies and business plans, technical skills development, sound financial management practices, development of innovative and high quality products, access to new markets including urban and regional markets and the full participation of fisherfolk in the identification of livelihood activities and micro-enterprises. The Pilot Project in Support of the Development of Micro-enterprises in Banate Bay, Iloilo and Southern Iloilo was implemented by the University of the Philippines in the Visayas in cooperation with the Banate Bay

Resource Management Council Inc. and the Southern Iloilo Coastal Resource Management Council with support from FAO. A number of microenterprises were introduced and supported in the municipalities of Banate Bay and Southern Iloilo including fish ball production, shrimp paste production, oyster and mussel culture, salt production and iodization, fish marketing and fish sauce production. Training programmes were conducted for fisherfolk on product development and marketing of their products. Good coordination with local government units, active participation of all stakeholders and conduct of appropriate training programmes are considered essential for the sustainability of the micro-enterprises. The involvement of fisherfolk in livelihood activities and micro-enterprises is strengthening their participation in the fisheries and aquatic resources management councils of Banate Bay and Southern Iloilo. The experiences of the pilot project also suggest that in order to make various income generating livelihood initiatives sustainable and stand on their own feet, many of these need to develop further into full-fledged micro-enterprises. Considerable scope lies in farming of aquatic organisms such as seaweed, shellfish and various fish species as well as in fisheries related value adding activities such as fish processing and marketing. As far as the relationship between the conservation of aquatic resources and the generation of income is concerned, the quality of the aquatic environment and the economic success of mariculture micro-enterprises and activities are directly related. This should create a strong motivation for fisherfolk entrepreneurs involved in such type of enterprises to be strong advocates and stewards of a healthy coastal ecology. In the long

term, fisherfolk will benefit from the development of various micro-enterprise initiatives. It is clearly in their interest.

American Economist Fao

Mobile Money is a booming industry in an increasing number of countries worldwide. The project results from increased demand for guidance and technical assistance from governments after the 2008 publication of an exploratory paper, Integrity in Mobile Phone Financial Services, which discussed mobile money and the application of international anti-money laundering (AML) and combating the financing of terrorism (CFT) standards. For most, how to craft a regulatory regime that expands access to financial services to the poor through the development of mobile phone financial services, but compliant with AML/CFT standards remains elusive. Specific AML/CFT regulations related to mobile money have not been issued in many jurisdictions, mainly due to the lack of awareness of the risks these services can pose if the right controls are not in place. Because the international standards for AML/CFT, the Financial Action Task Force s 40 + 9

Recommendations were designed and issued well before mobile money technology and business models became prevalent, even developed countries have begun to face challenges with their regulation. The project team aims to provide practical guidance to jurisdictions and the Industry on how to draft regulations and internal guidelines that allow them to comply with AML/CFT standards with enough flexibility for mobile money to thrive. Specifically, the paper (1) takes stock of new AML/CFT regulations and practices relevant to Mobile money, (2) design guidelines for

drafting AML/CFT regulations that cover mobile money and (3) propose examples of best practices for the Industry to include AML/CFT in their own business model.

Cambridge University Press

By an expert with over twenty-five years' experience interviewing more than thirty of the most dangerous male and female serial killers of contemporary times, this latest book from the bestselling author explores the darkest corners of these thrill-killers' minds. As all law-enforcement authorities, including the FBI's elite Behavioral Science Unit, will confirm, the majority of sexual psychopaths gain most of their perverse thrills from the stalking of their unsuspecting victims, often in so many different ways. For them, the actual kill is frequently something less, after which the dead body is treated like so much garbage and simply abandoned or thrown away. Yet as these cases show, a victim has often been unwittingly followed, watched, or even visited

before they are attacked, sometimes for weeks or even months. Having exhaustively studied the case histories of more than sixty modern-day sexually motivated serial murderers - some still alive, others subsequently executed - the author zeros in on the Internet porn industry as one of the main motivating drivers in cultivating fantasy stalking, which can lead to rape, multiple rapes, and homicide graduating to serial murder. Even more chillingly, anyone who is active on social media is a potential stalker's victim.

The Philatelic Gazette World Bank Publications

This volume contains the papers presented at the 8th Workshop on Computing: Theory and Practice, WCTP 2018 and is devoted to theoretical and practical approaches to computation. The conference was organized by four top universities in Japan and the Philippines: the Tokyo Institute of Technology, Osaka University, the University of the Philippines Diliman, and De La Salle University. The proceedings provide a broad view of the recent developments in computer science research in Asia, with an emphasis on Japan and the Philippines. The papers focus on both theoretical and practical aspects of computations, such as programming language theory, modeling of software systems, empathic computing, and various applications of information technology. The book will be of interest to academic and industrial researchers interested in recent developments in computer science research.

Wie Demokratien sterben Oxford University Press, USA

This book is the second in The Gospel According to Juan/a series. Like its precursor, The Gospel of Mercy According to Juan/a, it is a compilation of true-to-life stories and reflections from the perspective of the Filipino every wo/man. It is intended to be read as a prequel rather than a sequel to The Gospel of Mercy because love encompasses all virtues. It is only through the eyes of love where one can truly appreciate all that is good in the human spirit. In this day and age when there is but a thin line between virtual and real, one is hard put to see through the layers of filters that post-modern and post-truth civilization offers. To those who may find themselves lost in this maze, this book serves as a signpost that directs one back to the primary source of love, mercy and compassion—the God who loved us first, Jesus who taught us how to love, and the Holy Spirit who continually prompts us to keep loving despite the challenges and distractions.

Religious Telescope John Blake

Uniquely authoritative and wide-ranging in its scope, The Oxford Dictionary of the Christian Church is the indispensable one-volume reference work on all aspects of the Christian Church. It contains over 6,000 cross-referenced A-Z entries, and offers

unrivalled coverage of all aspects of this vast and often complex subject, including theology, churches and denominations, patristic scholarship, the bible, the church calendar and its organization, popes, archbishops, saints, and mystics. In this revision, innumerable small changes have been made to take into account shifts in scholarly opinion, recent developments, such as the Church of England's new prayer book (Common Worship), RC canonizations, ecumenical advances and mergers, and, where possible, statistics. A number of existing articles have been rewritten to reflect new evidence or understanding, for example the Holy Sepulchre entry, and there are a few new articles. Perhaps most significantly, a great number of the bibliographies have been updated. Established since its first appearance in 1957 as an essential resource for ordinands, clergy, and members of religious orders, ODCC is an invaluable tool for academics, teachers, and students of church history and theology, as well as for the general reader.

Talking With Serial Killers: Stalkers

'Meth, murder and pirates: the coder who became a crime boss. A world that lurks just outside of our everyday perception, in the dark corners of the internet we never visit' – Wired The Mastermind tells the incredible true story of Paul Le Roux, the frighteningly powerful creator of a twenty-first century cartel, and the decade-long global manhunt that finally brought his empire to its knees. Le Roux's business evolved from an online prescription

drug network into a sprawling multinational conglomerate engaged in almost every conceivable aspect of criminal mayhem. All tied together with encryption programs so advanced that government agencies were unable to break them. Tracing Le Roux's vast wealth and his shadowy henchmen around the world, award-winning journalist Evan Ratliff spent four years piecing together this intricate network. His investigation reveals a dark parable of ambition and greed, and exposes a new age of crime in which a reclusive entrepreneur can build an empire in the shadows of our networked world.

Mayibuye

Moving toward universal access to financial services is within reach, thanks to new technologies, transformative business models, and ambitious reforms. Instruments such as e-money accounts and mobile accounts, along with debit cards and low-cost traditional bank accounts, can significantly increase financial access for those who are excluded. Bringing e-Money to the Poor: Successes and Failures examines the lessons of success from four country case studies of "gazelles" Kenya, South Africa, Sri Lanka, and Thailand that leapt from limitation to innovation by successfully enabling the deployment of e-money technology. These countries have thereby transformed the landscape of financial access to their poor. In addition, two country case studies (Maldives and the Philippines) yield lessons learned from constraints that stalled e-money deployments. Because technology is not a silver bullet, the case studies also explore other strategic elements that need to be in place for a country to expand access to financial services through digital technology.

Weekly Philatelic Gossip

»Das wichtigste Buch der Trump-Ära« The Economist
Ausgezeichnet mit dem NDR Kultur Sachbuchpreis als bestes
Sachbuch des Jahres Demokratien sterben mit einem Knall oder
mit einem Wimmern. Der Knall, also das oft gewaltsame Ende
einer Demokratie durch einen Putsch, einen Krieg oder eine
Revolution, ist spektakulärer. Doch das Dahinsiechen einer
Demokratie, das Sterben mit einem Wimmern, ist alltäglicher –

und gefährlicher, weil die Bürger meist erst aufwachen, wenn es
zu spät ist. In ihrem mehrfach preisgekrönten Bestseller zeigen
die beiden Politologen Steven Levitsky und Daniel Ziblatt, woran
wir erkennen, dass demokratische Institutionen und Prozesse
ausgehöhlt werden. Und sie sagen, wie wir diese Entwicklung
stoppen können. Denn mit gezielter Gegenwehr lässt sich die
Demokratie retten – auch vom Sterbebett.
