 Object Relations in Psychoanalytic Theory provides a masterful overview of the central issue concerning psychoanalysts today: finding a way to deal in theoretical terms with the importance of the patient's relationships with other people. Just as disturbed and distorted relationships lie at the core of the patient's distress, so too does the relation between analyst and patient play a key role in the analytic process.

psychoanalytic psychology is the process of developing a psyche in relation to others in the childhood environment. It designates theories or aspects of theories that are concerned with the exploration of relationships between real and external people as well as internal images and the relations found in them. It maintains that the infant's relationship with the mother primarily determines the formation of his personality in adult life. Particularly, the need for attachment

### **Object relations theory - Wikipedia**

Object relations theory is centered on our relationships with others. According to this theory, our lifelong relationship skills are strongly rooted in our early attachments with our parents, especially our mothers. Objects refer to people, parts of people, or physical items that symbolically represent either a person or part of a person.
