Previous research on Joseph Urban (1872-1933) has focused on his architectural career; yet after moving from Vienna to the U.S. in 1912, he devoted much of his energies to the stage, especially productions for the Metropolitan Opera and the Ziegfeld Follies. A seminal figure in the history of American theater, he introduced to the U.S. the sophistication of European developments in stage design, experiments with lighting, and painterly effects which paralleled developments in modernist literature, painting, and dance. Architect of Dreams documents more than 100 finely rendered watercolors, photographs, and three-dimensional stage models. Arnold Aronson (professor of theatre arts at Columbia University) contributes a major essay. In other

essays, Derek E. Ostergard contextualizes Urban's architecture, and Matthew Wilson Smith examines Urban's work in film.

*To End a War* Inner Ocean Publishing

A brilliant new approach to the Constitution and courts of the United States by Supreme Court Justice Stephen Breyer. For Justice Breyer, the Constitution's primary role is to preserve and encourage what he calls "active liberty": citizen participation in shaping government and its laws. As this book argues, promoting active liberty requires judicial modesty and deference to Congress; it also means recognizing the changing needs and demands of the populace. Indeed, the Constitution's lasting brilliance is that its principles may be adapted to cope with unanticipated situations, and Breyer makes a powerful case against treating it as a static guide intended for a world that is dead and gone. Using contemporary examples from federalism to privacy to affirmative action, this is a vital contribution to the ongoing debate over the role and power of our courts.

George C. Marshall served as chairman of the U.S. Joint Chiefs of Staff during World War II and as secretary of state during the rebuilding of Europe. A master of mobilization and organization, he did as much as any national leader in achieving Allied victory in the war; afterward, as architect of the Marshall Plan, he won the Nobel Peace Prize for that massive and highly effective effort on behalf of Western European economic recovery. Winston Churchill called him "the noblest Roman of them all." This colorful collection of Marshall portraiture and memorabilia commemorates and humanizes this giant of a man, about whom comparatively little beyond his career achievements is known. The book will accompany an exhibit on Marshall that will open at the National Portrait Gallery in November 1997. "He was certainly no flamboyant general, he was not a character, there were no pearl-handled revolvers or corncob pipes of crusty anecdotes to spice up the legend of Marshall. He never wrote a book to tell his story. He never ran for

election to public office. He never sought popularity. He never exploited his fame. He never asked for recognition or favors. He was a man driven more than anything else by a sense of duty, by the powerful, overpowering obligation of service. To him, it was never George C. Marshall that was important; it was the task at hand." -- Colin Powell

Whilst the maritime container business has been studied in depth, the impact on shippers and how shippers deal with the given challenges has not been fully examined. Container Logistics bridges this gap and looks at the maritime business from a customer's perspective. The book examines the challenges, solutions and the latest developments in the container industry as well as the interaction between the different actors involved, such as freight forwarders, supply chain managers and shippers. Current hot topics from the supply chain and the maritime business perspective are

included. From the supply chain perspective, Container Logistics covers areas such as the purchase of transportation services from ocean carriers and transport management, to effective and efficient logistics execution. From the maritime business perspective, the book covers topics such as intermodal freight optimisation and hinterland transportation, and terminal and port optimisation. With the inclusion of clear examples of best practice and bona fide case studies, as well as invaluable contributions from an international team of experts, Container Logistics is an essential guide for supply chain managers and shippers, as well as academics and industry professionals working in the maritime business. Online supporting resources include images from the book and chapter summaries.

Architect for Peace

Publisher's description: Biocosm challenges both sides of the controversy over evolution and creationism. This carefully reasoned book proposes that life and intelligence have not emerged as a series of random accidents, as Darwinists like Stephen Jay Gould have maintained, but are hardwired into the cycle of cosmic creation, evolution, death, and rebirth. Gardner's theory of an exponential coevolution of biological and electronic intelligence, designed and directed, offers an extraordinary vision of a universe of point and purpose.

İsmail Akbaş

This is an important document in the history of Japanese-American

relations. In 2002, President Bush spoke of the great Japanese scholar and statesman Inazo Nitobe, who envisioned a future of friendship between the two nations. This book is one of the means by which Nitobe sought to bridge the Pacific. Writing before World War I, he presents a detailed account of Japan and the Japanese in terms easily understandable to western readers, emphasising points of similarity rather than difference, often citing the work of western historians and philosophers in order to explain Japanese practices, always searching for common aims and goals. He deals with the effect of the past on the present, national characteristics, religious beliefs, morals and moral ideals, education, economic conditions, Japan as coloniser, relations between the United States and Japan, and America's influence in the Far East, concluding with the hope that wherever else war may break out, lasting peace would reign over the Pacific. In this he was disappointed, but the fact that Nitobe is cited today as the architect of Japanese-American

friendship makes this volume essential reading for the historian.

 In 2025 in the common era, a man in his twenties, Tav, published a manifesto of a new unprecedented economic system called the Magnificent Age. Some viewed Tav as a savior, while some authorities declared Tav as a terrorist. The revolution did not happen peacefully as Tav had hoped... People accepted the year when the Magnificent Age manifesto was published, the beginning of the new calendar. They called the times after that year "After Revolution"... In the 11th year after the revolution, Tav developed a sleeping capsule that froze aging in the human body. In order to control this capsule, he developed a conscious

artificial intelligence called Banda. The capsule was sealed on Banda. When going to sleep in the capsule, Tav neither left a note nor told anything to anyone. People couldn't make sense of this behavior of Tav... Speaking at the council, Banda said: "If you're going to send me and Tav into exile in space, then assign us an advanced spacecraft with ship factories and refineries so that we can survive in space." Banda's request was met and in the 18th year of the revolution, Tav and Banda were exiled to the infinite depths of space... In the vehicle, there were Avadin and Marya from the United Nations secret service. Marya who was sitting at the driver's seat put the vehicle into autonomous drive mode and turned his seat towards Raino and Avadin. Raino who was in a tense mood, forgot all his tension when he came face to face with Marya; seeing her green eyes and brown hair, he was filled with peace and excitement. The strained look on his face was replaced by a smile. He had been in love with Marya for a long time. But he had not yet gathered the courage to confess to

her yet... The Oracle said, "You're so worried, Raino, tell me what are you afraid of?" Raino said, with an anxious expression, "I'm afraid of losing." The Oracle said, "Tell me, Raino, when did victories matter such that we could value defeats? #love, #love dilemma, #betrayal, #adventure, #mystery, #fantastic, #science fiction, #robot, #revolution, #juvenile, #tale, #007, #agent, #detective, #revolution time, #alice in wonderland, #The Lord of the Rings, #star wars, #avatar, #avenger, #superman, #batman #trump, #black, #black lives matter, #all lives matter, #the lost girls of paris, #the weight of ink, #we were the lucky ones, #a novel, #the view from penthouse B, #the two-family house: A novel, #the paris architect, #London, #New York, #berlin, #tokyo

Kogan Page Publishers  
John Adams could be, and was on occasion, cantankerous, stubborn, tactless, even rude. He was also prone to vanity and self-pity, and sensitive to what he perceived as slights, or attacks on his reputation or character. He also had a lust for fame, as did

many involved in the founding of this nation. But if fame was the spur, it was also the driving force behind Adams' enormous energy, energy guided by a strong sense of honor and duty that was built into his character and stayed with him his whole life. Adams was a realist, with a profound sense of what people en masse are all about. He seems to have drawn that knowledge from his understanding of himself. He knew that each of us has the capacity for good or evil, and the government of checks and balances he envisioned for the new nation they were building took this into account. Victory in the long struggle for freedom was certainly not assured. Many were Tories who wished to continue as British subjects. Many cared, but not enough to fight for the cause. We can be thankful for those who did, who initiated and carried on the War for Independence. Among them were the best and brightest the colonies had to offer. These were the people who tendered their lives, property, and sacred honor as collateral in the struggle for freedom. We can be grateful that John Adams

was among them.

Connecting with Self, Others and a Sense of Wonder Council on Foreign Relations Press

The blue economy, comprising coastal and marine resources, offers vast benefits for sub-Saharan Africa: of the 53 countries and territories in the region, 32 are coastal states; there are 13 million sq km of maritime zones; more than 90% of the region's exports and imports come by sea; and the African Union hails the blue economy as the 'new frontier of African renaissance'. Despite their importance, the region's coastal and marine resources have been neither fully appreciated nor fully utilized. They are only now being recognized as being key to Africa's potential prosperity. As the region grows, it has, in general, not taken adequate safeguards to protect these valuable resources. That is partly because some of the problems (pollution, for example) are regional and know no borders. All too often, short-term gains are made at the expense of the long term (overfishing, for example). This book provides, for the first time, a study of the constraints and

opportunities the blue economy offers for sub-Saharan Africa. It includes an introduction and overview; sectoral analyses (including tourism, fisheries, mineral resources, culture, shipping and maritime safety); country case studies; and analyses of regional and international efforts towards better coastal zone and marine management.

R. Buckminster Fuller, Architect, Inventor, and Poet Rizzoli International Publications

Explains the process by which the US government selects architect-engineering firms to perform design services for it, and guides the prospective contractor through the maze of requirements from finding the announcement of available contracts, almost (but not quite) to the Senate subcommittee hearings on graft. Covers how to go after a job, the proposals and negotiations leading to getting it, the administration and recording requirements after the contract is awarded, and the requirements when the project is completed. Updated to the 1995 versions of the regulations. Annotation

A Comparative Study Routledge  
The Martin Luther King Memorial on the National Mall of Washington, DC, is dedicated to the first person of color, first person for peace, and first person with no public or government position, etc. The values this person represents—democracy, justice, equal rights, hope, and love—are ever more relevant to the advance of human civilization of our own society and those of the whole world. The unique memorial style also sets it apart from all the other memorials on the National Mall of Washington, DC. Its central piece, the Stone of Hope, is the first granite statue, the tallest, and installed outdoor. It was designed, carved, and installed by a Chinese master sculptor, Lei Yixin. You may want to know who first initiated this project. Who managed the operation of the memorial development project? Whose design was finally selected? Who is Lei Yixin? How and why he was chosen to be the sculptor of record? How did he design and build the massive Stone of Hope and the Mountains of Despair out of granite?

Where did he create those art pieces? And from where did they ship the stone to Washington DC? How did he install this central piece of the memorial? This book will give you all above and more answers you would like to know.

*The Writings of Clarence S. Stein* Viking Adult  
Intended for people who are not boat designers -- and not to make them into naval architects -- this book describes how to bring a dream boat into being. Written by an experienced naval architect, it prepares intelligent amateurs to create conceptual vessel designs ready for a naval architect's finishing touches. Included are all the basic rationales and data needed to undertake a designing project, presented in a style that successfully bridges the gap between the technical approach of naval architecture and the simplification of consumer magazine articles. This volume covers a wide variety of watercraft, so it can be equally useful if you're envisioning a cruising yacht or a sixty-foot fishing boat.  
*Preliminary Design of Boats and Ships* Arcadia Publishing  
Realizing how lost and

meaningless my life had become, I embarked on a journey to rediscover myself and connection with others and a sense of wonder. In my quest, I have been privileged to have conversations with people ranging from an Icelandic artist to a Kenyan eco architect, Colombian choreographer, Cambodian peace activist and Maine lobster boat captain. to name but a few. The remarkable people I have met have shared their cultural traditions and spiritual practices, as well as their personal accounts of fear, disappointment, change, awakenings, transitions, courage, integrity, joy, and faith. I began to realize that many of the people I was drawn to had a deep affinity for and love of nature and the environment. Slowly, I came to see a pattern and an evolution in the "lessons" that were being offered to me. I recognized that collectively the conversations that blossomed with a seemingly diverse assortment of people actually formed a nurturing eco system of sorts, with each individual's experience and insights contributing to my growth. Just as the

shores embrace the oceans, the mountains reach for the sky, and plants depend on earth and air to exist, we humans are interconnected. Through relating to the struggles, foibles, humor, and hope of total strangers, I re-joined the human race. Recognition that my quest had come full circle came when I found myself listening as intently to a neighbor as I had to the far-flung "Guardian Angels" I so often met in my travels. In realizing that each and every one of us has profound experiences and enlightenment to offer each other, I had come "home" to myself. It is a privilege and a pleasure to pass on the insights of the 25 people featured in this book. I hope you enjoy these conversations as much as I did...and that you cherish and nurture the give-and-take art of asking questions and listening to the answers that come.

*EHealth* Athena V Lord  
Even the casual reader will notice a strong preoccupation with religion in the work of Northrop Frye. In his latest book, however, the esteemed Frye scholar Robert Denham shows that it played a far greater

role than has been assumed—religion was in fact central to practically everything Frye wrote. Denham's focus shifts the emphasis from *Anatomy of Criticism*, Frye's most famous work, and places it on those works with which Frye began and ended his career—the early *Fearful Symmetry* and, fifty years later, his two studies of the Bible and *The Double Vision*. This reevaluation is based on a close examination of Frye's religiously charged language and aided by Denham's remarkable and unique access to Frye's notebooks. The notebooks' contents not only expand on ideas laid out in Frye's published works but also touch on subjects most readers would not associate with Frye, such as his wide reading in both Eastern religious texts and in esoteric traditions ranging from astrology to the Cabala. Denham does not attempt to distill a theology from Frye's work; rather, he seeks to trace the movement of Frye's thought, demonstrating the imaginative use to which he put his wide-ranging reading. The result is a pivotal work, redefining our understanding of one of the most important

humanists of the twentieth century.  
Active Liberty Iowa State Press  
 "Really alive in dark times! The innocent word is foolish. A stretched forehead means insensitivity. Whoever laughs, hasn't known the terrible news yet." From Bertolt Brecht's lyric (1938): "To those who will come". This collection of my poems comes from the tormented period we are experiencing, as spectators or actors of a difficult era, of a period of transition towards new and inscrutable horizons of history, now unknown to us. My verses represent a tribute of hope in a better world and the hope that humanity will not sink into a new Middle Ages. Considering the brutality of what is happening both in the microcosm of the family and in the macrocosm of society due to terrorist factions, including ISIS, I felt the need to raise my humble voice together with the choral voice of more enlightened contemporary poets. Heinous murders, especially against unarmed women and children, perpetrated inside the domestic walls, on one side; massacres and massacres not only at the gates, but also within

the heart of the West, on the other hand, tend in a different way to make us withdraw on positions of subordination to brute force and of relegation towards an intolerant barbarism. In addition to all this, there are the current problems resulting from the Coronavirus pandemic that is bringing the whole world to its knees. Hence the name "Damned Times" which distinguishes this simple collection of verses. Therefore, forgive me some blunder or redundancy of style, the metric or the lack of metric that the different emotional situations have aroused in me according to the various circumstances. I had the audacity to translate some poems of mine into English. Forgive me for any mistakes, since - although I use English as my custom and ambition - I cannot consider myself a perfect connoisseur of this idiom. In addition to the topical poems, I added others of love or aimed at contemplating nature and, in particular, the sea. Precisely from this latter element, which characterizes my historical town Gaeta (Lazio region) stretching out over the Tyrrhenian Sea, I have drawn the

poetic and descriptive force of situations and alternating seasons. Dr. Arch. FRANCA COLOZZO - an Italian Architect/writer/novelist, poet, educationist, retired teacher of "Drawing and History of Art" in Italy and Istanbul (Turkey) on behalf of the Italian Ministry of Foreign Affairs - has been nominated in March 2018 Global Goodwill Ambassador (GGA Director~ITALY) by the influencer Richard DiPilla (Virginia - USA) and, in March 2019, INSPAD ~Ambassador of Peace & CEO of IHC~International Harmony Council by Dr. Muhammad Tahir Tabassum, President of INSPAD ~ Institute of Peace and Development, in Islamabad (Pakistan), a NGO incorporated with the UN with special observer status & Think Tank based in Islamabad (Pakistan) and Belgium. During the seven years spent abroad, thanks to her multi-ethnic and multi-cultural experience, she organized exhibitions of Art at the Italian High School I.M.I., the Italian Institute of Culture and the most prestigious universities in Istanbul (Turkey). Multi-tasked, creative and enthusiastic with strong belief in

organizational innovation, she is an excellent team worker even in a multicultural context. Passionate about justice, attentive to the rights of the weakest social classes and the importance of the

education of women and children, her current focus is in writing novels, poems, essays, articles on different newspapers and blogs about Human Rights, Kashmir, Peace, environmental problems, refugees, women's

empowerment, education and health related programs, etc. She is at present very active on social media to promote peace through articles, comments, publications also on ACADEMIA.edu.
