Why It Can Matter More Than IQ Univ of California Press

George Orwell's *Nineteen Eighty-Four* is unquestionably the most famous dystopian novel of all times. Written in the year of 1948, the author swapped the last two digits while describing a future totalitarian society where the minds, attitudes and actions of the subjects are

thoroughly scrutinized by the "Thought Police", suspected dissidents tracked down and where the worship of the mythical party leader Big Brother is forced upon the masses. The low-ranking party member Winston Smith begins secretly to question the whole system and initiates a forbidden love affair with another party member.

Nineteen Eighty-Four Thomson Brooks/Cole

'My dear, I don't give a damn.' Margaret Mitchell's page-turning, sweeping American epic has been a classic for over eighty years. Beloved and thought by

many to be the greatest of the American novels, *Gone with the Wind* is a story of love, hope and loss set against the tense historical background of the American Civil War. The lovers at the novel's centre - the selfish, privileged Scarlett O'Hara and rakish Rhett Butler - are magnetic: pulling readers into the tangled narrative of a struggle to survive that cannot be forgotten. WINNER OF NATIONAL BOOK AWARD AND PULITZER PRIZE 'For sheer readability I can think of nothing it must give way before' *The New Yorker* 'What makes some people come through

catastrophes and others, apparently just as able, strong, and brave, go under?’

This is the story of LSD told by a concerned yet hopeful father, organic chemist Albert Hofmann. He traces LSDs path from a promising psychiatric research medicine to a recreational drug sparking hysteria and prohibition. We follow Dr. Hofmanns trek across Mexico to discover sacred plants related to LSD, and listen in as he corresponds with other notable figures about his remarkable discovery. Underlying it all is Dr. Hofmanns powerful conclusion that mystical experience may be our planets best hope for survival. Whether induced by LSD, meditation, or arising spontaneously, such experiences help us to comprehend the wonder, the mystery of the divine in the microcosm of the atom, in the macrocosm of the spiral nebula, in the seeds of plants, in the body and soul of people. Now, more than sixty years after the birth of Albert Hofmanns problem child, his vision of its true potential is more relevant, and more needed, than ever.

Everyone knows the thrill of being transported by a film, but what is it that makes movie watching such a compelling emotional experience? In *Moving Viewers*, Carl Plantinga explores this question and the implications of its answer for aesthetics, the psychology of spectatorship, and the place of movies in culture. Through an in-depth discussion of mainstream Hollywood films, Plantinga investigates what he terms "the paradox of negative emotion" and the function of mainstream narratives as ritualistic fantasies. He describes the sensual nature

of the movies and shows how film emotions are often elicited for rhetorical purposes. He uses cognitive science and philosophical aesthetics to demonstrate why cinema may deliver a similar emotional charge for diverse audiences.

No one writes about mountaineering and its attendant hardships and victories more brilliantly than critically acclaimed author Jon Krakauer. In this collection of his finest work from such magazines as *Outside* and *Smithsonian*, he explores the subject from the unique and memorable perspective of one who has battled peaks like K2, Denali, Everest, and, of course, the Eiger. Always with a keen eye, an open heart, and a hunger for the ultimate experience, he gives us unerring portraits of the mountaineering experience. Yet *Eiger Dreams* is more about people than about rock and ice—people with that odd, sometimes maniacal obsession with mountain summits that sets them apart from other men and women. Here we meet Adrian the Romanian, determined to be the first of his countrymen to solo Denali; John Gill, climber not of great

mountains but of house-sized boulders so difficult to surmount that even demanding alpine climbs seem easy; and many more compelling and colorful characters. In the most intimate piece, "The Devils Thumb," Krakauer recounts his own near-fatal, ultimately triumphant struggle with solo-madness as he scales Alaska's Devils Thumb. *Eiger Dreams* is stirring, vivid writing about one of the most compelling and dangerous of all human pursuits.

Primero como observador en la investigación llevada a cabo por su homólogo en Río, y después al frente del caso con su equipo de Barcelona, el inspector Prats deberá indagar en la peculiar vida de la víctima para intentar reconstruir los hechos. Un elegante cadáver español es encontrado en una playa de Río de Janeiro con signos de violencia. Para tramitar su repatriación, la Policía Nacional envía desde Barcelona al

inspector Dani Prats, un policía sin vocación más preocupado por los asuntos pendientes de su vida privada que por los casos que se le asignan. Tirando de un hilo que lo llevará a verse con todos aquellos que tuvieron relación (directa o indirecta) con el asesinato, para acabar de encajar todas las piezas del puzle, Prats deberá averiguar quién juega sucio y quién sabe más de lo que dice. Los métodos que utilice para ello no quedarán reflejados en ningún expediente.
