Teaching Learners with Visual Impairment

Promoting the Educational Success of Children and Youth Learning English

SUTTON KERR

How Citizen Teachers Are Combating the Achievement Gap in America's Schools Lingua Franca Csoport

Schwarz, founder of the groundbreaking Citizen Schools program, shares his vision for reducing inequality by pairing successful adults with low-income students. Parental wealth now predicts adult success more than at any point in the last hundred years. And yet as debates about education rage on, and wealth-based achievement gaps grow, too many people fix the blame on one of two convenient scapegoats: poverty or our public schools. But in fact, low-income kids are learning more now than ever before. The real culprit for rising inequality, Eric Schwarz argues in *The Opportunity Equation*, is that wealthier kids are learning much, much more—mostly outside of school. In summer camps, robotics competitions, sessions with private tutors, and conversations around the dinner table, children from more affluent families build the skills and social networks that propel them to success. In *The Opportunity Equation*, Schwarz tells the story of how he founded the pioneering Citizen Schools program to combat rising inequality by bringing these same opportunities to children who don't have access to them. By increasing learning time in schools and harnessing the power of an army of volunteers with various skills and professional backgrounds—lawyers, engineers, carpenters, journalists, nonprofit leaders, and grandmothers who sew—Citizen Schools offers after-school apprenticeships that provide the building blocks for adult success. Recounting the triumphs and setbacks he's encountered in implementing the program, Schwarz shows that some of the nation's lowest-performing schools in its lowest-income cities can, with help, provide their students with many of the same experiences wealthy communities afford to their children. The results have been proven: in the dozen school districts, from New York to Oakland, that have partnered with Citizen Schools, rates of attendance, proficiency, graduation, and college acceptance have gone up—and the achievement gap closes. At a time when many

stakeholders in the education debates are looking for new, silver-bullet shortcuts to educational excellence, Schwarz shows that the best solution is human-centered, rooted in the American tradition of citizen voluntarism, and, most important, achievable. We can provide quality education for all students and close the opportunity gap in this country—and we can do it together.

Concepts of Biology Springer

This book discusses multilingual postcolonial common law, focusing on Malaysia's efforts to shift the language of law from English to Malay, and weighing the pros and cons of planned language shift as a solution to language-based disadvantage before the law in jurisdictions where the majority of citizens lack proficiency in the traditional legal medium. Through analysis of legislation and policy documents, interviews with lawyers, law students and law lecturers, and observations of court proceedings and law lectures, the book reflects on what is entailed in changing the language of the law. It reviews the implications of societal bilingualism for postcolonial justice systems, and raises an important question for language planners to consider: if the language of the law is changed, what else about the law changes? GB,GBT,GB/T Chinese Standard(English-translated version)-Catalog001- Prabhat Prakashan

A footprint materializes mysteriously on a deserted shore; a giant helmet falls from the sky; a traveler awakens to find his horse dangling from a church steeple. Eighteenth-century fiction brims with moments such as these, in which the prosaic rubs up against the marvelous. While it is a truism that the period's literature is distinguished by its realism and air of probability, *Eighteenth-Century Fiction and the Reinvention of Wonder* argues that wonder is integral to—rather than antithetical to—the developing techniques of novelistic fiction. Positioning its reader on the cusp between recognition and estrangement, between faith and doubt, modern fiction hinges upon wonder. *Eighteenth-Century Fiction and the Reinvention of Wonder* unfolds its new account of fiction's rise through surprising readings of classic early novels—from Daniel Defoe's *Robinson Crusoe* to Jane Austen's *Northanger Abbey*—and brings to attention lesser-known works, most notably Rudolf Raspe's *Baron Munchausen's Narrative of His Marvellous*

Travels. In this bold new account, the eighteenth century bears witness not to the world's disenchantment but rather to wonder's relocation from the supernatural realm to the empirical world, providing a reevaluation not only of how we look back at the Enlightenment, but also of how we read today.

Civics and Citizenship Education in Australia Bloomsbury Publishing

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, *Concepts of Biology* is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of *Concepts of Biology* is that instructors can customize the book, adapting it to the approach that works best in their classroom. *Concepts of Biology* also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand—and apply—key concepts.

Miscellaneous Product Catalog. Translated English of Chinese Standard. (MT; MT/T; MTT) World Bank Publications

This book examines the relationship between the English language and growth - economic and inclusive - in India. It

explores why English continues to be the language of aspiration long after Independence. With the second largest English-speaking population in the world today, India is testimonial to how a linguistic legacy continues to cast a long shadow on its contemporary discourse in the economic arena. The volume: Explores how English language proficiency constitutes as human capital. Draws in the latest India Human Development Survey data. Investigates the relationship between the language and economic indicators such as wages, household income and state growth. Further investigates the role of English language in the inclusivity of growth. Provides a snapshot of the pedagogy of English in the Indian education system. First of its kind in scope, this volume will be of great interest to scholars of economics, education, sociolinguistics, development studies, politics and sociology. It will also be of great interest to the general reader. *Assessing Young Learners of English: Global and Local Perspectives* Taylor & Francis

This book explores the ways and means by which English threatens the vitality and diversity of other languages and cultures in the modern world. Using the metaphor of the Hydra monster from ancient Greek mythology, it explores the use and misuse of English in a wide range of contexts, revealing how the dominance of English is being confronted and counteracted around the globe. The authors explore the language policy challenges for governments and education systems at all levels, and show how changing the role of English can lead to greater success in education for a larger proportion of children. Through personal accounts, poems, essays and case studies, the book calls for greater efforts to ensure the maintenance of the world's linguistic and cultural diversity.

Confronting the Hydra Oswaal Books and Learning Private Limited
This volume documents international, national, and small-scale testing and assessment projects of English language education for young learners, across a range of educational contexts. It covers

three main areas: age-appropriate 'can do statements' and task types for teaching and testing learners between the ages of 6 to 13; innovative approaches to self-assessment, diagnostic testing, self-perception, and computer-based testing; and findings on how young learners perform on vocabulary, listening, speaking, pronunciation, and reading comprehension tests in European and Asian contexts. Early language learning has become a major trend in English language education around the globe. As a result of the spread of teaching English to a growing number of young children, assessment of and for learning have emerged as key issues. In line with this development, there is a clear and emerging need to make early language programs accountable and to assess both the progress children make over time and to quantify their achievement at various stages of development. This volume informs stakeholders about the realistic goals of early language learning, their efficiency, and how much progress children make over time.

Oswaal ICSE Question Bank Class 10 (Set of 6 Books) English Paper- 1 (Language) & English Paper-2 (Literature), Economics, Geography, History & Civics, Mathematic (Reduced Syllabus) (For Exam 2022) Springer Nature

This book uses an in-depth, phenomenological interview approach to explain the generational characteristics of today's Chinese university youths and the critical dispositions they believe indispensable in acquiring English as an academic language in and outside school settings. By presenting the authentic voices of the recruited participants, the book clarifies how English for academic purposes (EAP), as an emerging global phenomenon and a research-informed practice, enables and empowers them for conscious self-transformation and critical awareness development through language study. The book also explores issues arising in the fields of general English language teaching as well as traditional and critical EAP, and discusses university English language learners' learning needs and rights. The book further promotes a dynamic and transformative University EAP pedagogy of particularity, practicality, and possibility moving from the oppression of language education to its liberation, and the increasing critical consciousness among the present and future university youths in a time of great social changes. Intercultural Learning on the Example of Asian British Literature

<https://www.chinesestandard.net>

This book explores the global spread of English and its ramifications for the status of English in Morocco. It sheds light on motivational issues in English language teaching and learning in Moroccan higher education and examines various teaching practices in terms of: teaching effectiveness, assessment and evaluation, written feedback, English-Arabic translation, and undergraduate supervision. In addition to identifying critical issues in the discipline of English studies and the main challenges facing English departments from historical, institutional, and pedagogical perspectives, it suggests strategies for addressing and overcoming them.

The Handbook of Human and Social Conditions in Assessment is the first book to explore assessment issues and opportunities occurring due to the real world of human, cultural, historical, and societal influences upon assessment practices, policies, and statistical modeling. With chapters written by experts in the field, this book engages with numerous forms of assessment: from classroom-level formative assessment practices to national accountability and international comparative testing practices all of which are significantly influenced by social and cultural conditions. A unique and timely contribution to the field of Educational Psychology, the Handbook of Human and Social Conditions in Assessment is written for researchers, educators,

and policy makers interested in how social and human complexity affect assessment at all levels of learning. Organized into four sections, this volume examines assessment in relation to teachers, students, classroom conditions, and cultural factors. Each section is comprised of a series of chapters, followed by a discussant chapter that synthesizes key ideas and offers directions for future research. Taken together, the chapters in this volume demonstrate that teachers, test creators, and policy makers must account for the human and social conditions that shape assessment if they are to implement successful assessment practices which accomplish their intended outcomes. *The Education Invasion* Routledge

This book demonstrates the value of approaching education from a sociological and philosophical perspective. Specifically, it addresses current and long-standing educational issues in the Asia-Pacific region, integrating sociological and philosophical insights with practical applications in four key areas: educational aims, moral education, educational policy, and the East-West dichotomy. It discusses educational aims in terms of rationality, philosophical thinking, and sustainable development and presents the literary, religious, and analytical approaches to moral education. Four educational policies are then considered: Hong Kong's language policy, Hong Kong's policy on the

internationalization of education, East Asia's policies on English education, and Australia's policy on teacher education. Different aspects of the East-West dichotomy are analysed: Confucian rationalism versus Western rationalism, Confucian learning culture versus Western learning culture, and Asian research methodology versus Western research methodology. Taken as a whole, the book shows that issues in education are rarely simple, and looking at them from multiple perspectives allows for rich and informed debates. It presents a rare philosophical and sociological analysis of the cultures and experiences of education in the Asia-Pacific region, and promotes research that leads to more culturally rooted educational policies and practice.
