in the Twentieth Century and Beyond Routledge Combining select chapters from Grigsby's standard-setting *The Electric Power Engineering Handbook* with several chapters not found in the original work, *Electric Power Substations Engineering* became widely popular for its comprehensive, tutorial-style treatment of the theory, design, analysis, operation, and protection of power substations. For its Methods, Strategies, and Issues Polity "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt Stories and Poems McGraw Hill Professional Weaving in the Batak region of North Sumatra is an ancient art practised by women, and exhibits some of the oldest design and technical features in the Indonesian archipelago. Since colonial annexation at

the turn of the twentieth century, innovative Batak weavers from the Lake Toba region in northern Sumatra have successfully adapted their art to new economic and social circumstances—but at great cost. In recent decades, weaving has fallen into decline and the tradition is threatened, while at the same time Batak textiles are highly prized in museum collections around the world. Legacy

in cloth offers the first definitive study of the woven heritage of the Toba, Simalungun, and Karo Batak. The most complete analysis of Batak textiles ever published, it provides a record of more than 100 different design types, including archival and contemporary photographs showing how the textiles are woven and how they are used in Batak culture.

Legacy in

Cloth

Springer
Offers unified treatment of conventional and modern continuous and discrete control theory and demonstrates how to apply the theory to realistic control system design problems. Along with linear and nonlinear, digital and optimal control systems, it presents four case studies of actual designs. The majority of solutions contained in the book and

the problems at the ends of the chapters were generated using the commercial software package, MATLAB, and is available free to the users of the book by returning a postcard contained with the book to the MathWorks, Inc. This software also contains the following features/utilities created to enhance MATLAB and several of the MathWorks' toolboxes: Tutorial File

which contains the essentials necessary to understand the MATLAB interface (other books require additional books for full comprehension), Demonstration m-file which gives the users a feel for the various utilities included, OnLine HELP, Synopsis File which reviews and highlights the features of each chapter. Electric Power Substations Engineering Routledge A major revision of the

bestselling "bible" of amateur robotics building--packed with the latest in servo motor technology, microcontrolled robots, remote control, Lego Mindstorms Kits, and other commercial kits. Gives electronics hobbyists fully illustrated plans for 11 complete Robots, as well as all-new coverage of Robotix-based Robots, Lego Technic-based Robots, Functionoids with Lego Mindstorms,

and Location and Motorized Systems with Servo Motors. Features a pictures and parts list that accompany all projects, and material on using the BASIC Stamp and other microcontrollers.

Revised and updated with the latest information from this fast-paced field, Fundamentals of Information System Security, Second Edition provides a comprehensive overview of the essential concepts readers must know as they pursue careers in information systems security. The text opens with a discussion of the new risks, threats, and vulnerabilities associated with the

transformation to a digital world, including a look at how business, government, and individuals operate today. Part 2 is adapted from the Official (ISC)2 SSCP Certified Body of Knowledge and presents a high-level overview of each of the seven domains within the System Security Certified Practitioner certification. The book closes with a resource for readers who

desire additional material on information security standards, education, professional certifications, and compliance laws. With its practical, conversational writing style and step-by-step examples, this text is a must-have resource for those entering the world of information systems security. New to the Second Edition: - New material on cloud computing, risk analysis,

IP mobility, OMNIBus, and Agile Software Development. - Includes the most recent updates in Information Security laws, certificates, standards, amendments, and the proposed Federal Information Security Amendments Act of 2013 and HITECH Act. - Provides new cases and examples pulled from real-world scenarios. - Updated data, tables, and sidebars provide the most current

information in the field.

The study of provenance—the history of the creation and ownership of an artefact, work of art, or specimen—provides insights into the history of taste and collecting, illuminating the social, economic, and historic trends in which an object was created and collected. It is as much a history of people as it is of objects, and its study often reveals intricate networks of relationships, patterns of activity and

motivations. This book promotes the study of the history of collecting and collections in all their variety through the lens of provenance, and explores the subject as a cross-disciplinary activity. Perhaps for the first time in a publication, it draws on expertise ranging from art history and anthropology, to natural history and law, looking at periods from antiquity through the

18th century and the Holocaust era to the present, and materials from Europe and the Americas to China and the Pacific. The issues raised are wide-ranging, touching on aspects of authenticity, cultural meaning and material transformation and economic and commercial drivers, as well as collector and object biography. The book fills a gap in the study of collecting and

provenance, taking the subject holistically and from multiple standpoints, better to reflect the widening interest in provenance from a range of disciplinary perspectives. This book will be a service to the field, from established scholars and museum professionals to students of collecting history, cultural heritage, and museum studies.

This document is a self learning document for a course in Python programming. This course contains (1) a part for beginners, (2) a discussion of several advanced topics that are of interest to Python programmers, and (3) a Pythonworkbook with lots of exercises.

Practical Electronic Troubleshooting HSE Books
This second edition of Patrick Baert's widely

acclaimed Social Theory in the Twentieth Century has been brought right up-to-date with cutting-edge developments in social theory today. It offers an easy-to-read but provocative account of the development of social theory, covering a range of key figures and classic schools of thought. The authors also bridge the gap between philosophy and social theory,

locating the theoretical views of individuals such as Giddens, Foucault and Habermas within wider historical traditions.

Fundamentals of Information Systems

Security Brill Academic Pub
Everyone who works with electronic circuitry on a regular basis needs test equipment. But commercially sold meters and probes are very expensive, and often more than the

average home experimenter needs. This money-saving project book aims to solve that dilemma by providing plans and instructions for building two dozen inexpensive test instruments - both analog and digital - for the workbench. Computer-Controlled Systems lakeview research llc
We are delighted to introduce the Proceedings of the Second International Conference on Progressive

Education (ICOPE) 2020 hosted by the Faculty of Teacher Training and Education, Universitas Lampung, Indonesia, in the heart of the city Bandar Lampung on 16 and 17 October 2020. Due to the COVID-19 pandemic, we took a model of an online organised event via Zoom. The theme of the 2nd ICOPE 2020 was "Exploring the New Era of Education", with various related topics

including Science Education, Technology and Learning Innovation, Social and Humanities Education, Education Management, Early Childhood Education, Primary Education, Teacher Professional Development, Curriculum and Instructions, Assessment and Evaluation, and Environmental Education. This conference has invited academics, researchers, teachers, practitioners, and students worldwide to participate and exchange ideas, experiences, and research findings in the field of education to make a better, more efficient, and impactful teaching and learning. This conference was attended by 190 participants and 160 presenters. Four keynote papers were delivered at the conference; the first two papers were delivered by Prof Emeritus Stephen D. Krashen from the University of Southern California, the USA and Prof Dr Bujang Rahman, M.Si. from Universitas Lampung, Indonesia. The second two papers were presented by Prof Dr Habil Andrea Bencsik from the University of Pannonia, Hungary and Dr Hisham bin Dzakiria from Universiti Utara Malaysia, Malaysia. In addition, a total of 160 papers were also presented

by registered presenters in the parallel sessions of the conference. The conference represents the efforts of many individuals. Coordination with the steering chairs was essential for the success of the conference. We sincerely appreciate their constant support and guidance. We would also like to express our gratitude to the organising committee members for putting much effort into

ensuring the success of the day-to-day operation of the conference and the reviewers for their hard work in reviewing submissions. We also thank the four invited keynote speakers for sharing their insights. Finally, the conference would not be possible without the excellent papers contributed by authors. We thank all authors for their contributions

and participation in the 2nd ICOPE 2020. We strongly believe that the 2nd ICOPE 2020 has provided a good forum for academics, researchers, teachers, practitioners, and students to address all aspects of education-related issues in the current educational situation. We feel honoured to serve the best recent scientific knowledge and development in education and hope that these

proceedings will furnish scholars from all over the world with an excellent reference book. We also expect that the future ICOPE conference will be more successful and stimulating. Finally, it was with great pleasure that we had the opportunity to host such a conference.

Topics in Chemical Engineering
A hands-on introduction to microcontroller project design with dozens of example circuits and programs. Presents practical designs for use in data loggers, controllers, and other small-computer applications. Example circuits and programs in the book are based on the popular 8052-BASIC microcontroller, whose on-

chip BASIC programming language makes it easy to write, run, and test your programs. With over 100 commands, instructions, and operators, the BASIC-52 interpreter can do much more than other single-chip BASICs. Its abilities include floating-point math, string handling, and special commands for storing programs in EPROM, EEPROM, or battery-backed RAM. Proceedings of the 2nd

AECT Design & Development Outstanding Book Award for 2008!
Design and Development Research thoroughly discusses methods and strategies appropriate for conducting design and development research. Rich with examples

and explanations, the book describes actual strategies that researchers have used to conduct two major types of design and development research: 1) product and tool research and 2) model research. Common challenges confronted by researchers in the field when planning and conducting a study are explored and procedural explanations are supported by a wide variety of examples

taken from current literature. Samples of actual research tools are also presented. Important features in this volume include: concise checklists at the end of each chapter to give a clear summary of the steps involved in the various phases of a project; an examination of the critical types of information and data often gathered in studies, and unique procedures for

<p>collecting these data; examples of data collection instruments, as well as the use of technology in data collection; and a discussion of the process of extracting meaning from data and interpreting product and tool and model research findings. Design and Development Research is appropriate for both experienced researchers and those preparing to become researchers. It</p>	<p>is intended for scholars interested in planning and conducting design and development research, and is intended to stimulate future thinking about methods, strategies, and issues related to the field.</p> <p><i>Third International Conference, FGIT 2011, Jeju Island, December 8-10, 2011. First Aid at Work Jones & Bartlett Publishers
MQ Telemetry Transport (MQTT) is a messaging protocol that is lightweight enough to be supported by the smallest devices, yet robust enough to ensure that important messages get to their destinations every time. With MQTT

devices such as smart energy meters, cars, trains, satellite receivers, and personal health care devices can communicate with each other and with other systems or applications. This IBM® Redbooks® publication introduces MQTT and takes a scenario-based approach to demonstrate its capabilities. It provides a quick guide to getting started and

then shows how to grow to an enterprise scale MQTT server using IBM WebSphere® MQ Telemetry. Scenarios demonstrate how to integrate MQTT with other IBM products, including WebSphere Message Broker. This book also provides typical usage patterns and guidance on scaling a solution. The intended audience for this book ranges from new users of

<p>MQTT and telemetry to those readers who are looking for in-depth knowledge and advanced topics. <i>How Our Schools Can Teach Respect and Responsibility</i> Allyn & Bacon Calls for renewed moral education in America's schools, offering dozens of programs</p>	<p>schools can adopt to teach students respect, responsibility, hard work, and other values that should not be left to parents to teach. <i>Building Smarter Planet Solutions with MQTT and IBM WebSphere MQ Telemetry</i> John Wiley & Sons Analyzes all phases of the electronic product</p>	<p>design process, including management, planning, quality control, design, manufacturing , and automation. A reference/text book for students and professionals in such fields as electronics, manufacturing , circuit design, computer science. Annotation copyrig</p>
