JULISSA SUTTON

Event Management SAGE

Theory and Practice of Learning Management argues that today's dominant pedagogical practices of schooling and teacher education are a major contributor to the failure of schools to fulfil the schools' promise for students and their families. The Learning Management concept represents a rethink of teaching, schooling and teacher education and places the emphasis on the following characteristics: the need for design principles and a common language of instruction for 'teachers', research-based techniques that deliver a wider curriculum agenda, and a renewed responsibility on the part of teachers, schools and teacher educators for the outcomes of pedagogical practice.

Introduction to Educational Administration McGraw-Hill Education (UK)

The SAGE Handbook of Educational Leadership is a landmark work with contributions from 37 internationally renowned scholars covering an extensive range of issues confronting the field of educational leadership and administration. The Handbook reviews how leadership was redefined by management and organizational theory in its quest to become scientific, then looks forward to promising theories, concepts, and practices that show potential for development and application. This Handbook represents the establishment of a new tradition in educational leadership. It thoroughly covers a broad range of issues pertaining to curriculum leadership, supervision, teacher evaluation, budgeting, planning, school design, and issues facing the principalship and the superintendency in the United States.

Educational Management' 2000 Ed. SAGE

Produced for unit ESA841 (Theory and practice in educational administration) offered by the School of Education in Deakin University's Open Campus program.

The Postmodern Challenge to the Theory and Practice of Educational Administration Routledge

Originally published in 1997. This book provides people moving into management roles in Further Education with an understanding of management theory applied specifically to Further Education colleges. Good management skills have been identified by the inspectorate as crucial to the future of this sector and this text tackles the unique problems of management in FE colleges. The author discusses the interrelated topics of People, Operations, Resources and Information, using examples and case studies from colleges to demonstrate the implications of putting theories into practice.

Mastering Theories of Educational Leadership and Management EDUCATIONAL ADMINISTRATION
Theory and Practice

This book is intended for students, leaders and managers who wish to explore the personal relevance and conceptual bases of educational leadership and organizational management and to develop their expertise in this field. It is a book written for both scholars and practitioners. The general public will also appreciate the accessible language in the book. There are two goals in the experiential learning process. One is to learn the specifics of a particular subject matter, in this case,

educational leadership and organizational management. The other is to learn about one's own strengths and weaknesses as a learner. This book is focused on the analysis of prevalent theories and concepts and their application to the development of leadership and management skills, and the knowledge and attitudes required to solve real world problems in the workplace. For decades, students have focused their studies of educational leadership and organizational management theories in classroom settings without actual opportunities to apply these theories in the workplace. A profound and significant lesson learned in history is that we must follow the principle of integrating theory with practice (unity of theory with practice). Then, we can follow the policy of walking on two legs, an analogy made by the late Chinese chairman, Mao Ze Dong.

Text-book of School and Class Management Routledge

Updated to reflect the Project Management Institute's (PMI's) Project Management Body of Knowledge (PMBOK® Guide), Fifth Edition, the new edition of this bestselling textbook continues to provide a practical and up-to-date overview of project management theory. Project Management Theory and Practice, Second Edition explains project management theory using language that is easy to understand. The book integrates the organizational environment that surrounds a project to supply the well-rounded knowledge of theories, organizational issues, and human behavior needed to manage real-world projects effectively. This edition includes a new chapter on Stakeholder Management, which is a new knowledge area covered in the new PMBOK® Guide. It also provides updated references and a new streamlined organization of chapters. There are several project-related model frameworks sponsored by PMI®, and many of these are covered in this text. Specifically, the book details: Work breakdown structures (WBS) Earned value management (EVM) Enterprise project management (EPMO) Portfolio management (PPM) Professional responsibility and ethics For many of the major sections, the PMI Global Accreditation curriculum learning objectives have been adapted with permission of PMI and used to guide the content. Filled with end-of-chapter questions, scheduling and budgeting problems, and scoping projects, this text is ideal for classroom use and essential reading for anyone seeking project management certification. The book also includes sample empirically oriented worksheets that demonstrate various management decision and analysis-oriented tools.

Educational Management Trafford Publishing

Originally published in 1986. Hitherto, most educational managers, including head teachers and senior staff in schools, have been expected to carry out their management tasks without any formal training. Recent initiatives, however, are changing this and all educational managers are now being encouraged to undertake some form of training. This book provides a framework for the study of educational management. Management in other professions has been a major concern for a long time and this book selects from this existing literature, theory and experience (for example from management studies and business studies) and relates relevant material to the context of education. It looks at the major themes and problems in educational management, discusses the appropriate theories and shows how good practices may be applied.

Educational Administration Routledge

This collection explores historical and present-day issues in education management, the training and development of leaders, and their roles in leading people and managing resources, and provides a focus on the major management issues which are current throughout the education world. The articles reprinted here include the management of applied individual psychology; organizational psychology; individual, interpersonal and group interaction; personality theory; leadership theory and organization theory.

Educational Management UNSW Press

Written by an academic at the University of Nairobi, this book seeks to widen both the breadth and depth of the body of knowledge about educational management. The theories and practices are presented as an integrated subject and the issues covered are educational management in perspective, development of management, theories of motivation and job satisfaction, leadership, authority and power, discipline, communication, decision making, supervision, financial management, and human resource development.

Educational Administration and the Management of Knowledge McGraw-Hill Europe

One of the most widely read books in educational leadership, *Educational Administration* uses a systems perspective to synthesize the relevant theory and research on organizational behavior and focuses on understanding and applying theory to solve problems of practice. With each new edition, the latest research and theory are incorporated into the analysis of teaching, learning, and leading. *Educational Administration* helps future administrators understand the content and context of schools, remember key ideas and principles, and apply and practice those principles as they lead.

Management Paul Chapman Educational Publishing

In this established text Tony Bush presents the major theories of educational management, and links them to contemporary policy and practice. Leadership continues to be one of the major criteria used to differentiate the models; but the author now makes clear links between educational management theories and the main models of leadership. The author applies the models to a range of international contexts, including both developed and developing countries. This relates to global interest in concepts of leadership and management and to an increasing recognition of the need to customize theory and practice to each context and culture rather than adopting a 'one size fits all' approach. For the Fourth Edition, the essential conceptual models remain. New case study material has been added from the full range of education and non-school settings, from early years through to further and higher education. Each chapter now includes key words, summary and end of chapter materials including issues for discussion. Key terms are defined in-text for the non-expert reader and all references and relevant key legislation details have been fully updated. This book is essential reading for all teachers who aspire to management, as well as for experienced leaders on Masters' level courses, and for those studying school management as part of education studies degrees.

Strategic Management Rex Bookstore, Inc.

"This closely argued and lively polemic is recommended for all policymakers and practitioners concerned with educational leadership and change" BJET "Thrupp and Willmott have produced a very important book regarding knowledge claims around issues of policy and practice.... I will be recommending my masters and doctoral students to read the book so that as practitioners they may relish the opportunity to engage with issues of knowledge production. Thrupp and Willmott's book is

directly relevant to every day practice in teaching and learning across the educational system, and it should be required reading for all training programmes because it enables trainees to know and understand the knowledge structures that are being used to control their work and identities." BJES "... will stir a lot of debate and be seminal to debates about the direction of education management for some time to come." Mike Bottery, Hull University "...a genuinely readable and accessible book that critically engages with school management literature." InService Education Journal This important and provocative book is not another 'how to' educational management text. Instead it offers a critical review of the extensive educational management literature itself. The main concern of the authors is that educational management texts do not do enough to encourage school leaders and teachers to challenge social inequality or the market and managerial reforms of the last decade. They demonstrate this problem through detailed analyses of texts in the areas of educational marketing, school improvement, development planning and strategic human resource management, school leadership and school change. For academics and students, *Educational Management in Managerialist Times* offers a critical guide to existing educational management texts and makes a strong case for redefining educational management along more socially and politically informed lines. The book also offers practitioners alternative management strategies intended to contest, rather than support, managerialism, while being realistic about the context within which those who lead and manage schools currently have to work. This controversial new title brings a new insight to the educational management debate.

Burns & Oates

Organized around the ISLLC standards, this text introduces students to the concepts and theories of educational leadership. The new edition adds coverage of such topics as data usage, ethics, innovative hiring practices, and student discipline. Appearing in the second edition are chapter-ending sections called "Point-Counterpoint" which prompt readers to examine their own beliefs regarding the material presented in the chapter and its application to work in our schools.

Educational Administration SAGE

Based on nearly a decade of scholarship, this is a highly focused book on the implications of postmodernism for the construction and assessment of theory and practice in educational administration. Current ideas of practice are deconstructed, from the notions of sound research to the use of national standards in the preparation of educational leaders along with ways of examining and resolving the theory-practice gap. Part One of the book contains chapters dealing with the rise of postmodernism and describes its broad-based dissent from a century of thought in the field, including a penetrating examination of whether the concept of a field itself is viable. Part Two of the book explores the many ramifications of postmodernism to practice, beginning with ideas concerning educational research. These chapters tackle the tough issues of the efficacy of the Interstate Leaders Licensure Standards (ISLLC) and the national exam as examples of job deskilling and deprofessionalization in the guise of raising standards of preparation of future educational leaders. Other chapters deal with deconstructing the popular managerial ideas contained in Stephen Covey's works and dispute Joe Murphy's call for a new center of gravity in the field as reinforcing the status quo. Finally, the book tackles the issue of the theory-practice gap and indicates that new and progressive theories which anticipate problems of practice are what is required to deal with this

persistent issue. The book contains many helpful exhibits in understanding the issues concerning theory and practice, as well as a glossary of terms most commonly found in postmodern discourse. This book is designed for college and university programs engaged in the preparation of educational leaders for elementary/secondary schools and college administrative positions.

Educational Management : Theory And Practice Advent Books Division Incorporated

The Early Childhood Education sector around the world is constantly changing, whether because of the unprecedented demand for ECE services globally, accelerated social change, or the introduction of pedagogical and regulatory practices. Based upon empirical inquiry, Early Childhood Education Management examines the somewhat controversial concept of operating an early childhood service as a business. It challenges the assumption that an early childhood manager does not require specialist knowledge or skill and discusses which attributes an effective manager should possess. In this book, which brings together management theory and practice, Moloney and Pettersen address core issues at the heart of the management role, including the relationship between early childhood policy and broader legislative enactments, as well as issues related to the challenges and development of management skills. The book also draws upon real-life examples from practice in order to offer insight into some of the most common topics and challenges related to management practice in Early Childhood Education, such as business acumen and entrepreneurship, recruitment and selection, financial management and budgeting, supervision, mentoring, staff development, curriculum management, collaborative working, and change management. Written by leading academics with practice experience, the book should be of great interest to researchers, academics and postgraduate students in the field of education, specifically those working in early years and education policy and management. It should also be essential reading for managers working in Early Childhood settings.

Educational Management McGraw-Hill Higher Education

Cet ouvrage porte sur les organismes éducationnels, le pouvoir, et l'autorité dans les écoles, les aspects théoriques et pratiques de la planification de l'éducation, le système éducatif nigérian, le personnel le financement de l'éducation, l'école et la communauté.

Management in Further Education Routledge

Event Management: Theory and Practice is print only. Event Management: Theory and Practice is a new text that provides coverage of the most important competency units of Certificate III and Diploma of Events in the SIT12 Tourism, Travel and Hospitality Training Package. This book takes students through the complete process of event management, starting with developing a concept,

planning, organising and managing an event. Event Management: Theory and Practice provides detailed content not featured in other event texts including the process of securing visas for international artists or profile speakers; comprehensive review of emerging areas such as environmental sustainability; and extensive legal considerations including artist and venue agreements. The glossary, review questions and accompanying workbook (available separately) provide ample opportunities for students to reinforce the presented theory. This book also includes information on jobs in event management to give a complete understanding of the industry. Scope Event Management: Theory and Practice is written for students of Certificate III and Diploma of Events in the SIT12 Tourism, Travel and Hospitality Training Package.

Educational Administration SAGE

'Researchers interested in various aspects of college leadership and management will find this book a convenient and scholarly introduction to related research in the school sector' - Further Education Development Agency, College Research Journal 'Educational management has become an important academic subject. The contributors to this volume have guaranteed its survival as such by undertaking this review in order that they and others working in the field may take account of a range of agendas and initiatives. The outcome must be a fresh stance and a new sense of direction to enable a study of educational management to meet the needs of teachers and their schools in the new millennium' - Educational Research Educational Management brings together important original contributions from leading thinkers in the field. Edited by some of the key figures in educational management today, chapters examine the following key areas: Has self-management achieved the success predicted for it?; What should be the nature of professional development for educational leaders?; to what extent can education benefit by drawing from practice in business and industry?; can theory inform management practice in education?; how can research contribute to educational improvement?; how can leaders help improve classroom practice? Educational Management is one of the major outcomes of the ESRC (Economic and Social Research Council) seminar series which aimed to redefine educational management in the light of the many developments in policy, practice, theory and research since the subject became established in the 1970s.
