Understanding Human Rights Oxford University Press
 In the media, Southeastern Europe (SEE) is repeatedly portrayed as an area characterized by the exclusion of the "Other". There is no doubt that xenophobia, racism, homophobia, anti-Semitism, and anti-Ziganism are deeply rooted within every European society, as is evident in the rise of hostile atmospheres towards Muslims in Denmark, Germany, and Sweden. Recurrent debates in Germany on so-called "poverty- and social welfare-migrants" from Bulgaria, Kosovo, and Romania, as well as anti-Islam movements like Patriotic Europeans against Islamization of the Occident (PEGIDA) are illustrating examples. Focusing on Southeastern Europe, this volume will make a nuanced contribution to these ongoing debates. Volume contributions are composed as empirical case studies on diverse forms of othering in different national contexts and settings of SEE and bare actual insights for further comparisons; some of them also seek to compare or analyze transnational aspects. In methodological terms, these contributions take a multilayer perspective

addressing a variety of different academic schools and approaches including historiographic perspectives, remembrance history, poststructuralist discourse analysis, intersectional feminist and queer research, network analysis, studies on social movements, quantitative approaches, societal comparison, and anthropology. The editors managed to gather a broad variety of contributors from different disciplines both from the region of Southeastern Europe and Germany. Therefore, this volume is a multi-perspective contribution to answer the question on manifestations of othering in SEE. Especially in the light of the refugee crisis, the texts presented in this volume are relevant for the whole of Europe.

Dred Scott and the Problem of Constitutional Evil, first published in 2006, concerns what is entailed by pledging allegiance to a constitutional text and tradition saturated with concessions to evil. The Constitution of the United States was originally understood as an effort to mediate controversies between persons who disputed fundamental values, and did not offer a vision of the good society. In order to form a 'more perfect union' with slaveholders, late-eighteenth-century citizens fashioned a

constitution that plainly compelled some injustices and was silent or ambiguous on other questions of fundamental right. This constitutional relationship could survive only as long as a bisectional consensus was required to resolve all constitutional questions not settled in 1787. Dred Scott challenges persons committed to human freedom to determine whether antislavery northerners should have provided more accommodations for slavery than were constitutionally strictly necessary or risked the enormous destruction of life and property that preceded Lincoln's new birth of freedom.

The right to a fair trial is a fundamental element of legal systems. Guaranteed by national constitutions and the European Convention on Human Rights, it ensures the effectiveness of law against arbitrary acts of the authorities. The reports which appear in this volume were presented in Brno, at a seminar on European constitutional heritage, in which judges from constitutional courts and other equivalent bodies from approximately 20 countries participated. They show the convergence of approaches, in Europe and on other continents, and the universal nature of rights protected by a fair trial.

"THE CODE OF LEKE DUKAGJINI is a great cultural treasure, comparable to the chapters of The Old Testament." "It provides deep insights into the ancient society of the Albanians, their somber dignity & their magnificent sense of honor."--David Binder, *The New York Times*. "This legal system was established & passed on to future generations as a common law by Leke Dukagjini, a co-fighter of the legendary Skenderbeg." "The 'Besa' or the 'word of honor' as stated in THE CODE OF LEKE DUKAGJINI which means peace & protection to those whom it is given, has become today an important fighting tool in the political struggle of Kosovo's Albanians against Serb oppression."--Victor Meier, *The Frankfurter Allgemeine Zeitung*. "The legal Code of the Albanians known by them for a thousand years, is one of the most original in the history of mankind. Among the basic pillars of this code are the equality of men before the code & the non-abuse of justice." "The entire essence of the legal code of the Albanians is an unparalleled rigorous respect for this basic principle: non-violation of the dignity of a man- his honor, home, & life."--Ismail Kadare, Albanian writer.

Freedom of speech is central to the liberal democratic tradition. It touches on every aspect of our social and political system and receives explicit and implicit protection in every modern democratic constitution. It is frequently referred to in public discourse and has inspired a wealth of legal and philosophical literature. The liberty to speak freely is often questioned; what is the relationship between this freedom and other rights and values, how far does this freedom extend, and how is it applied to contemporary challenges? The *Oxford Handbook on Freedom of Speech* seeks to answer these and other pressing questions. It provides a critical analysis of the foundations, rationales, and ideas that underpin freedom of speech as a political idea, and as a principle of positive constitutional law. In doing so, it examines freedom of speech in a variety of national and supra-national settings from an international perspective. Compiled by a team of renowned experts in the field, this handbook features original essays by leading scholars and theorists exploring the history, legal framework and controversies surrounding this tenet of the democratic constitution.

The second edition of the *Criminal Law Sourcebook* has been significantly expanded in order to provide law students with a comprehensive selection of key materials drawn from law reports, statutes, Law Commission Consultation Papers and Reports, and Home Office publications. The materials reflect the

range of topics taught on the vast majority of undergraduate and CPE criminal law modules, and provide a platform from which the reader can embark upon a more critical evaluation of both theory and doctrine. Extensive extracts are included from a number of recent landmark rulings, including decisions by the House of Lords in *B v DPP* (defence of mistake), *R v Smith* (objective test for the defence of provocation), *R v Hinks* (whether the recipient of a gift can be a thief), and *R v Powell and Daniels*; *R v English* (scope of accessory liability for murder), and the Court of Appeal's ruling in *In Re A* (conjoined twins). Recent statutory initiatives that have been incorporated include the Protection from Harassment Act 1997, the Criminal Justice (Terrorism and Conspiracy) Act 1998, and the Sexual Offences (Amendment) Act 2000. The impact of the Human Rights Act 1998, in so far as it relates to substantive criminal law, is also covered. Substantial extracts are provided from all relevant Law Commission and Home Office law reform publications. In addition to the draft Criminal Code Bill, materials have been selected dealing with reform of sexual offences, consent, conspiracy to defraud, deception offences, offences against the person, accessory liability and involuntary manslaughter.

Song Translation: Lyrics in Contexts grew out of a project dedicated to the translation of song lyrics. The book aligns itself with the tradition of descriptive translation studies. Its authors, scholars from Finland, Great Britain, Greece, Italy, Norway and Sweden, all deal with the translation of song lyrics in a great variety of different contexts, including music and performance settings, (inter)cultural perspectives, and historical backgrounds. On the one hand, the analyses demonstrate the breadth and diversity of the concept of translation itself, on the other they show how different contexts set up conditions that shape translational practices and products in different ways. The book is intended for translation studies scholars as well as for musicologists, students of language and/or music and practicing translators; in short, anybody interested in this creative and fascinating field of translational practice.

In the last decade, Islamophobia in Western societies, where Muslims constitute the minority, has been studied extensively. However, Islamophobia is not restricted to the geography of the West, but rather constitutes a global phenomenon. It affects Muslim societies just as much, due to various historical, economic, political, cultural and social reasons. Islamophobia in Muslim Majority Societies constitutes a first attempt to open a debate about the understudied phenomenon of Islamophobia in Muslim majority societies. An interdisciplinary study, it focuses on socio-political and historical aspects of Islamophobia in Muslim majority societies. This volume will appeal to students, scholars and general readers who are interested in Racism Studies, Islamophobia Studies, the Middle East and North Africa (MENA) region, Islam and Politics.

This volume explores the various strategies, mechanisms and processes that influence rule of law dynamics across borders and the national/international divide, illuminating the diverse paths of influence. It shows to what extent, and how, rule of law dynamics have changed in recent years, especially at the transnational and international levels of government. To explore these interactive dynamics, the volume adopts an interdisciplinary approach, bringing together the normative perspective of law with the analytical perspective of social sciences. The volume contributes to several fields, including studies of rule of law, law and development, and good governance; democratization;

globalization studies; neo-institutionalism and judicial studies; international law, transnational governance and the emerging literature on judicial reforms in authoritarian regimes; and comparative law (Islamic, African, Asian, Latin American legal systems).

From Dawn till Dusk embraces the conceptual challenges often associated with Bioethics by taking the reader on a journey that embodies the circle of life and what it means to be human. The beginning and the end of life have always been an impossible riddle to humans. Bioethics does not aspire to unveil utter truths regarding the purpose of our existence; on the contrary, its task is to settle controversial issues that arise within this finite, very fragile and vulnerable life, yet a life we still have to live. This book discusses thorny ethical issues that transcend time and are related to the dawn and the dusk of life: abortion and infanticide, genetic engineering, human reproductive cloning, the fear of death, rational suicide, and the right to die. The book's highest aspiration, though, is to both provide the reader with an opportunity to see the world from different perspectives and to showcase the irresistible charms of bioethical debates. "This book brings contemporary issues in bioethics into conversation with different philosophical views, both ancient and modern. The result is a rewarding and very readable discussion on a range of important questions about life and death." Peter Singer, Princeton University & University of Melbourne "Evangelos D. Protopapadakis' book is a philosophically rich discussion of major topics in bioethics about issues of life and death. The work is original and important. I believe the author is correct to argue that the central issues of bioethics at its core in these areas should be understood as moral in nature and should not be framed as principally legal or scientific." Tom L. Beauchamp, Georgetown University "Bioethics is - in philosophical terms - a new field. But it builds on centuries of thought on the human condition, the meaning of life, and the fundamental ethical question: What should we do? Evangelos D. Protopapadakis' masterful volume traces modern bioethical debates, with all their increasing scientific complexity, back through ancient and modern philosophical thought. The result is a sparkling and engaging journey through the history of ideas and the current ethical challenges at the beginning and end of life." Julian Savulescu, Uehiro Chair in Practical Ethics, University of Oxford "As the Head of the Greek Unit of the Chair, but also as an ethicist and a bioethicist, Professor Protopapadakis has never been weary to contribute to philosophically nuanced bioethical debates. This inspiring book is the manifestation of his attitude towards Bioethics." Amnon Carmi, Holder of the UNESCO Chair in Bioethics (Haifa) "This book presents important connections between current positions and classical approaches in ethics, written in a lively way." Hans-Werner Ingensiep, Universität Duisburg-Essen "Evangelos Protopapadakis' book provides nuanced insights describing the complex ethical problems which clinicians and society must address. This creative analysis incorporates ancient and contemporary historical examples to illuminate the disparate arguments used to justify conflicting philosophical responses." Susan M. Miller MD, MPH Princeton University Press

Strengthening the rule of law has become a key factor for the transition to democracy and the protection of human rights. Though its significance has materialized in international standard setting, the question of implementation is largely unexplored. This book describes judicial independence as a central aspect of the rule of law in different stages of transition to democracy. The collection of state-specific studies explores the legal situation of judiciaries in twenty states from North America, over Western, Central and South-Eastern Europe to post-Soviet states and engages in a comparative legal analysis. Through a detailed account of the current situation it takes stocks, considers advances in and shortcomings of judicial reform and offers advice for future strategies. The book shows that the implementation of judicial independence requires continuous efforts, not only in countries in transition but also in established democracies which are confronted with ever new challenges.

Liquidated damages and extensions of time are complex subjects, frequently forming the basis of contract claims made under the standard building and civil engineering contracts. Previous editions of Liquidated Damages and Extensions of Time are highly regarded as a guide for both construction industry professionals and lawyers to this complex area. The law on time and damages continues to develop with an increasing flow of judgments from the courts. Alongside this, the standard forms of contract have also developed over time to reflect prevailing approaches to contractual relationships. Against this background a third edition will be welcomed by construction professionals and lawyers alike. Retaining the overall approach of the previous editions, the author clarifies, in a highly readable but legally rigorous way, the many misunderstandings on time and damages which abound in the construction industry. The third edition takes account of a large volume of new case law since the previous edition was published over ten years ago, includes a new chapter on delay analysis and features significantly expanded chapters on penalty clauses, the effects of conditions precedent and time-bars, and the complexities of causation.

This book considers local autonomy, measured as a multidimensional concept, from a cross-country comparative perspective, and examines how variations can be explained and what their consequences are. It fills a gap in the literature by providing a comprehensive study of the different components of local autonomy across a large number of countries, over time. It offers a theoretically saturated concept to measure local autonomy and applies it to 39 countries, including all 28 EU member states together with Albania, Georgia, Iceland, Liechtenstein, Macedonia, Moldova, Norway, Serbia, Switzerland Turkey and Ukraine, over a period of 25 years (1990-2014).

The contract for lease of goods is well known in practical life. Short-time leases of cars, to both businesses and consumers, are perhaps the most striking example, but contracts for temporary use of another person's goods in exchange for rent are common for a wide range of products, like industrial equipment, office machines, leisure boats, sports gear, etc. Long-term leases are often chosen as an alternative to other forms of acquisition of goods ("financial leases"). This book presents a set of Principles of European law on lease contracts within the framework of the Study Group on a European Civil Code. The Principles are closely co-ordinated with other parts of what will become the Draft Common Frame of Reference for European contract law, prepared for the European Commission by several pan-European research teams co-operating in a network of excellence under the sixth Research Framework Programme. The Principles are accompanied by explanatory comments and comparative notes containing information on lease law for 27 European countries as well as on relevant international instruments. Thus, the book is a source to knowledge on existing law, in addition to being a contribution to the analysis of the interplay between general contract law and the law of specific contracts as well as to the discussion of future European private law.
