Biotechnology A Laboratory Course Biotechnology A Laboratory Course
 The objectives of this Second Edition of *Biotechnology: A Laboratory Course* remain unchanged: to create a text that consists of a series of laboratory exercises that integrate molecular biology with protein biochemistry techniques while providing a continuum of experiments. The course begins with basic techniques and culminates in the utilization of previously acquired technical experience and experimental material.
Biotechnology: A Laboratory Course: Jeffrey M. Becker, Guy ...
 Start or enhance your biotechnology course today with *Biotechnology: A Laboratory Skills Course* by J. Kirk Brown. This laboratory textbook blends science background and hands-on laboratory activities with real world applications to help prepare your students to be critical thinkers as biotechnology shapes their world.

 Welcome to your first course in biotechnology! This course will emphasize its laboratory component to reflect the importance of your training in biotechnology skills. Keep in mind as you work your way through this manual the specific purposes in each exercise. They will prepare you for your first job in a biotechnology laboratory, so keep a careful record of your experience.
 Introduction to Biotechnology
 The lab course allows students to gain hands-on experience in common biotechnology industry methods such as laboratory safety, aseptic techniques, measurements and calculations, and preparation of solutions.
