JOCELYN JORDAN

Dare to Lead World Bank Publications

Sometimes life throws you a curveball. Andrew and Rachel Wilson know what it means to live a life they never expected. As the parents of two children with special needs, their story mingles deep pain with deep joy in unexpected places. With raw honesty, they share about the challenges they face on a daily basis—all the while teaching what it means to weep, worship, wait, and hope in the Lord. Offering encouragement rooted in God's Word, this book will help you cling to Jesus and fight for joy when faced with a life you never expected.

A History of ALA Policy on Intellectual Freedom American Library Association

A Times Literary Supplement's Book of the Year 2020 A New Statesman's Best Book of 2020 A Bloomberg's Best Book of 2020 A Guardian Best Book About Ideas of 2020 The world-renowned philosopher and author of the bestselling *Justice* explores the central question of our time: What has become of the common good? These are dangerous times for democracy. We live in an age of winners and losers, where the odds are stacked in favor of the already fortunate. Stalled social mobility and entrenched inequality give the lie to the American credo that "you can make it if you try". The consequence is a brew of anger and frustration that has fueled populist protest and extreme polarization, and led to deep distrust of both government and our fellow citizens--leaving us morally unprepared to face the profound challenges of our time. World-renowned philosopher Michael J. Sandel argues that to overcome the crises that are upending our world, we must rethink the attitudes toward success and failure that have accompanied globalization and rising inequality. Sandel shows the hubris a meritocracy generates among the winners and the harsh judgement it imposes on those left behind, and traces the dire consequences across a wide swath of American life. He offers an alternative way of thinking about success--more attentive to the role of luck in human affairs, more conducive to an ethic of humility and solidarity, and more affirming of the dignity of work. *The Tyranny of Merit* points us toward a hopeful vision of a new politics of the common good.

Surviving the 21st Century Routledge

"In the US, in Europe, and throughout the world, globalization, in tandem with technological progress, has left a massive number of people behind, feeling dispossessed, disenfranchised, and angry. Leading the charge of "hyperglobalization" during the second half of the last century, and enforcing the Western framework of austerity in the developing world has been the International Monetary Fund. Along with the World Bank and WTO, many consider the IMF one of the most consequential institutions to have pushed the world economy blindly towards excessive globalization, while not adequately considering its powerful negative consequences. In October 2017, however, the IMF convened with some of the world's most celebrated economists and experts on trade and globalization to have an honest discussion on the most pressing concerns the world

faces today as a result of globalization, and how to address the extensive challenges it has created. Edited by chief economist Maurice Obstfeld and senior economist Luis Catao of the IMF, the book brings together a team of respected senior economists with the most promising younger scholars to address five major themes: how globalization affects economic growth and social welfare; potential political implications of an honest discussion of globalization, and that "free trade may not be politically viable"; free trade's role in global inequality; how workers adjust or not when they're dislocated by globalization; and how trade policy influences the way countries develop their economies and societies. The book could represent a historic milestone at which the world's top economists and policymakers have an unprecedented, honest debate about the real costs and consequences of globalization"--

Here We Are Crossway

Who are We?

The Bluest Eye Routledge

From a leading political thinker, this book is both an invaluable playbook for meeting our current moment and a stirring reflection on the future of democracy itself. The COVID-19 pandemic has demonstrated some of the strengths of our society, including the rapid development of vaccines. But the pandemic has also exposed its glaring weaknesses, such as the failure of our government to develop and quickly implement strategies for tracing and containing outbreaks as well as widespread public distrust of government prompted by often confusing and conflicting choices—to mask, or not to mask. Even worse is that over half a million deaths and the extensive economic devastation could have been avoided if the government had been prepared to undertake comprehensive, contextually-sensitive policies to stop the spread of the disease. In *Democracy in the Time of Coronavirus*, leading political thinker Danielle Allen untangles the US government's COVID-19 victories and failures to offer a plan for creating a more resilient democratic polity—one that can better respond to both the present pandemic and future crises. Looking to history, Allen also identifies the challenges faced by democracies in other times that required strong government action. In an analysis spanning from ancient Greece to the Reconstruction Amendments and the present day, Allen argues for the relative effectiveness of collaborative federalism over authoritarian compulsion and for the unifying power of a common cause. But for democracy to endure, we—as participatory citizens—must commit to that cause: a just and equal social contract and support for good governance.

The Challenges We Face Prometheus Books

Students and staff from KCL's Social Sciences BA programme turn the research lens back on their own world and together explore the many challenges of 'trying to do things differently' in Higher Education. In doing so, they grapple with fundamental questions in education such as: how to meaningfully foreground democracy, partnership, and emotional care; the role and limits of free speech; and how to deconstruct enduring inequality and marginalisation. In a period of considerable change and challenge for education, there is surely no better time to be critically analysing the principles guiding our universities through the lens of real-life practice. "In a period when university

arrangements are being rethought in the wake of COVID-19 and the resurgence of Black Lives Matter, this compelling text is both timely and forward looking. 'We're trying to do things differently' successfully brings together first year undergraduates and lecturers to research, analyse and document how students and staff co-create meaningful educational experiences. The authors offer a nuanced picture of the centrality of relationships and recognition to the degree course. It shows how the students foreground love, kindness and social justice, rather than curriculum and outcomes, while being alert to the politics of difference and absence in higher education classrooms. The book draws on well-worn and innovative writing styles to produce analyses and arguments that are eye-opening, persuasive and raise difficult questions for future educational practices. This book is a must for anyone interested in championing excellence and social justice in higher education." Ann Phoenix, Professor of Psychosocial Studies, UCL Institute of Education "This is a book with a difference. It is based on critical scholarship and draws on reflexive analysis but - and this is the important and unique part - it is a book written mainly by university students about how to enact meaningful relationships in the academy. It takes as its substantive focus one new undergraduate programme but the agenda is about change, social justice and the hard work of real inclusion. This book stands as a wake-up call to all of us who care deeply about socially just education and democracy in our institutions of higher education. It is also a wonderful example of how to write something that really matters!" - Meg Maguire, Professor of Sociology of Education, King's College London

21 Lessons for the 21st Century Princeton University Press

Renowned political scientist Ian Bremmer draws lessons from global challenges of the past 100 years—including the pandemic—to show how we can respond to three great crises unfolding over the next decade. In this revelatory, unnerving, and ultimately hopeful book, Bremmer details how domestic and international conflicts leave us unprepared for a trio of looming crises—global health emergencies, transformative climate change, and the AI revolution. Today, Americans cannot reach consensus on any significant political issue, and US and Chinese leaders behave as if they're locked in a new Cold War. We are squandering opportunities to meet the challenges that will soon confront us all. In coming years, humanity will face viruses deadlier and more infectious than Covid. Intensifying climate change will put tens of millions of refugees in flight and require us to reimagine how we live our daily lives. Most dangerous of all, new technologies will reshape the geopolitical order, disrupting our livelihoods and destabilizing our societies faster than we can grasp and address their implications. The good news? Some farsighted political leaders, business decision-makers, and individual citizens are already collaborating to tackle all these crises. The question that should keep us awake is whether they will work well and quickly enough to limit the fallout—and, most importantly, whether we can use these crises to innovate our way toward a better world. Drawing on strategies both time-honored and cutting-edge, from the Marshall Plan to the Green New Deal, *The Power of Crisis* provides a roadmap for surviving—even thriving in—the 21st century. Bremmer shows governments, corporations, and every concerned citizen how we can use these coming crises to create the worldwide prosperity and opportunity that 20th-century globalism promised but failed to deliver.

Who are We? Lee & Low Books

Turn any student into a bookworm with a few easy and practical strategies Donalyn Miller says she has yet to meet a child she can't turn into a reader. No matter how far behind Miller's students might be when they reach her 6th grade classroom, they end up reading an average of 40 to 50 books a year. Miller's unconventional approach dispenses with drills and worksheets that make reading a chore. Instead, she helps students navigate the world of literature and gives them time to read books they pick out themselves. Her love of books and teaching is both infectious and inspiring. In the book, you'll find: Hands-on strategies for managing and improving your own school library Tactics for helping students walk on their own two feet and continue the reading habit after they've finished with your class Data from student surveys and end-of-year feedback that proves how well the Miller Method works The Book Whisperer includes a dynamite list of recommended "kid lit" that helps parents and teachers find the books that students really like to read.

'We're trying to do things differently' Celadon Books

Why do we still tolerate stereotypes and discrimination based on age? This bold account of the history and present-day realities of ageism by a nationally recognized gerontologist and speaker uncovers ageism's roots, impact, and how each of us can create a new reality of elderhood. *Ageism Unmasked* shifts the lens, enabling us to see that we tolerate, and sometimes actively promote, attitudes and behaviors toward differently aged people that we would reject and condemn if applied to any other group. It peels back the layers to expose how cultural norms and unconscious prejudices have seeped into our lives, silently shaping our treatment of others based on their age and our own misconceptions about aging—and about ourselves. Offering an all-inclusive approach, Dr. Tracey Gendron reveals the biases behind our false understanding of aging, sharing powerful opportunities for personal growth along with strategies to help create an anti-ageist society. *Ageism Unmasked* will help readers let go of our desperate need to stay young... exposing how we personally, systematically, structurally, and institutionally stigmatize being old. *Ageism Unmasked* will help readers appreciate both the challenges and opportunities of how we all age... showing how ageism is prejudice towards both younger and older people. *Ageism Unmasked* will help readers reset our expectations for getting old... providing the tools to anticipate and experience elderhood as a time of renewed meaning and purpose, empowering each of us to create our own definition of successful aging. *Ageism Unmasked* continues Dr. Gendron's transformative work inspiring people of all ages to embrace aging as our universal and lifelong process of developing over time — biologically, psychologically, socially, and spiritually.

Front Desk (Front Desk #1) (Scholastic Gold) Simon and Schuster

Restorative justice is spreading like wildfire across the globe. How can we explain this burst of energy? This anthology makes the bold claim that restorative justice is a vibrant social justice movement. It is more than a great idea gone viral, more than the extension of the legal system, and more than enacting new legislation. Beginning in 2015, the contributors of this volume took part in a series of dialogues sponsored by the Zehr Institute for Restorative Justice, exploring the contours of the restorative justice movement. Each one writes from the burgeoning edges of their own context, inviting readers to consider the fidelity and integrity of the movement's growth. As a cadre, the authors highlight new locations of restorative justice application: race, pedagogy, ecology, youth organizing, community violence reduction, and more. These diverse voices put forward a fast-paced,

hard-hitting glimpse into the pulse of restorative justice today and what it may look like tomorrow. *Why Weren't We Taught This at School?* Scholastic Inc.

#1 NEW YORK TIMES BESTSELLER • In *Sapiens*, he explored our past. In *Homo Deus*, he looked to our future. Now, one of the most innovative thinkers on the planet turns to the present to make sense of today's most pressing issues. "Fascinating . . . a crucial global conversation about how to take on the problems of the twenty-first century."—Bill Gates, *The New York Times Book Review*
NAMED ONE OF THE BEST BOOKS OF THE YEAR BY FINANCIAL TIMES AND PAMELA PAUL, KQED How do computers and robots change the meaning of being human? How do we deal with the epidemic of fake news? Are nations and religions still relevant? What should we teach our children? Yuval Noah Harari's *21 Lessons for the 21st Century* is a probing and visionary investigation into today's most urgent issues as we move into the uncharted territory of the future. As technology advances faster than our understanding of it, hacking becomes a tactic of war, and the world feels more polarized than ever, Harari addresses the challenge of navigating life in the face of constant and disorienting change and raises the important questions we need to ask ourselves in order to survive. In twenty-one accessible chapters that are both provocative and profound, Harari builds on the ideas explored in his previous books, untangling political, technological, social, and existential issues and offering advice on how to prepare for a very different future from the world we now live in: How can we retain freedom of choice when Big Data is watching us? What will the future workforce look like, and how should we ready ourselves for it? How should we deal with the threat of terrorism? Why is liberal democracy in crisis? Harari's unique ability to make sense of where we have come from and where we are going has captured the imaginations of millions of readers. Here he invites us to consider values, meaning, and personal engagement in a world full of noise and uncertainty. When we are deluged with irrelevant information, clarity is power. Presenting complex contemporary challenges clearly and accessibly, *21 Lessons for the 21st Century* is essential reading. "If there were such a thing as a required instruction manual for politicians and thought leaders, Israeli historian Yuval Noah Harari's *21 Lessons for the 21st Century* would deserve serious consideration. In this collection of provocative essays, Harari . . . tackles a daunting array of issues, endeavoring to answer a persistent question: 'What is happening in the world today, and what is the deep meaning of these events?'"—BookPage (top pick)

I'll Build You a Bookcase One World

The book explores the central question facing humanity today: how can we best survive the ten great existential challenges that are now coming together to confront us? Besides describing these challenges from the latest scientific perspectives, it also outlines and integrates the solutions, both at global and individual level and concludes optimistically. This book brings together in one easy-to-read work the principal issues facing humanity. It is written for the two next generations who will have to deal with the compounding risks they inherit, and which flow from overpopulation, resource pressures and human nature. The author examines ten intersecting areas of activity (mass extinction, resource depletion, WMD, climate change, universal toxicity, food crises, population and urban expansion, pandemic disease, dangerous new technologies and self-delusion) which pose manifest risks to civilization and, potentially, to our species' long-term future. This isn't a book just about problems. It is also about solutions. Every chapter concludes with clear conclusions and

consensus advice on what needs to be done at global level—but it also empowers individuals with what they can do for themselves to make a difference. Unlike other books, it offers integrated solutions across the areas of greatest risk. It explains why *Homo sapiens* is no longer an appropriate name for our species, and what should be done about it.

Listening to the Movement Springer

#1 NEW YORK TIMES BESTSELLER • Brené Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Now, based on new research conducted with leaders, change makers, and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Don't miss the five-part HBO Max docuseries *Brené Brown: Atlas of the Heart!* **NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG** Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, "One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It's learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It's why we're here." Whether you've read *Daring Greatly* and *Rising Strong* or you're new to Brené Brown's work, this book is for anyone who wants to step up and into brave leadership.

Diversity in America Centre for Public Policy Research

"Shows how humans have brought us to the brink and how humanity can find solutions. I urge people to read with humility and the daring to act." —Harpal Singh, former Chair, Save the Children, India, and former Vice Chair, Save the Children International In conversations with people all over the world, from government officials and business leaders to taxi drivers and schoolteachers, Blair Sheppard, global leader for strategy and leadership at PwC, discovered they all had surprisingly similar concerns. In this prescient and pragmatic book, he and his team sum up these concerns in

what they call the ADAPT framework: Asymmetry of wealth; Disruption wrought by the unexpected and often problematic consequences of technology; Age disparities--stresses caused by very young or very old populations in developed and emerging countries; Polarization as a symptom of the breakdown in global and national consensus; and loss of Trust in the institutions that underpin and stabilize society. These concerns are in turn precipitating four crises: a crisis of prosperity, a crisis of technology, a crisis of institutional legitimacy, and a crisis of leadership. Sheppard and his team analyze the complex roots of these crises--but they also offer solutions, albeit often seemingly counterintuitive ones. For example, in an era of globalization, we need to place a much greater emphasis on developing self-sustaining local economies. And as technology permeates our lives, we need computer scientists and engineers conversant with sociology and psychology and poets who can code. The authors argue persuasively that we have only a decade to make headway on these problems. But if we tackle them now, thoughtfully, imaginatively, creatively, and energetically, in ten years we could be looking at a dawn instead of darkness.

Democracy in the Time of Coronavirus Practical Inspiration Publishing

Latin American countries are in the midst of a demographic transition and, as a consequence, a population-aging process. Over the next few decades, the number of children will decline relative to the number of older adults. Population aging is the result of a slow but sustained reduction in mortality rates, given increases in life expectancy and fertility. These trends reflect welcome long-term improvements in welfare and in economic and social development. But this process also entails policy challenges: many public institutions—including education, health, and pension systems and labor market regulations—are designed for a different demographic context and will need to be adapted. When *We're Sixty-Four* discusses public policies aimed at overcoming the two main challenges facing Latin American countries concerning the changing demographics. On one hand, older populations demand more fiscal resources for social services, such as health, long-term care, and pensions. On the other, population aging produces shifts in the proportion of the population that is working age, which may affect long-term economic growth. Aging societies risk losing dynamism, being exposed to higher dependency rates, and experiencing lower savings rates. Nonetheless, in the interim, Latin American countries have a demographic opportunity: a temporary decline in dependency rates creates a period in which the share of the working-age population, with its associated saving capacity, is at its highest levels. This constitutes a great opportunity in the short term because the higher savings may result in increases in capital endowment per worker and productivity. For that to happen, it is necessary to generate institutional, financial, and fiscal conditions that promote larger savings and investment, accelerating per capita economic growth in a sustainable way.

God Doesn't; We Do Farrar, Straus and Giroux

NATIONAL BESTSELLER • From the acclaimed Nobel Prize winner—a powerful examination of our obsession with beauty and conformity that asks questions about race, class, and gender with characteristic subtlety and grace. In Morrison's acclaimed first novel, *Pecola Breedlove*—an 11-year-old Black girl in an America whose love for its blond, blue-eyed children can devastate all others—prays for her eyes to turn blue: so that she will be beautiful, so that people will look at her, so that her world will be different. This is the story of the nightmare at the heart of her yearning, and

the tragedy of its fulfillment. Here, Morrison's writing is "so precise, so faithful to speech and so charged with pain and wonder that the novel becomes poetry" (The New York Times).

All Boys Aren't Blue Random House

Inside Out and Back Again meets *Millicent Min*, *Girl Genius* in this timely, hopeful middle-grade novel with a contemporary Chinese twist. Winner of the Asian / Pacific American Award for Children's Literature!* "Many readers will recognize themselves or their neighbors in these pages." -- Kirkus Reviews, starred review Mia Tang has a lot of secrets. Number 1: She lives in a motel, not a big house. Every day, while her immigrant parents clean the rooms, ten-year-old Mia manages the front desk of the Calivista Motel and tends to its guests. Number 2: Her parents hide immigrants. And if the mean motel owner, Mr. Yao, finds out they've been letting them stay in the empty rooms for free, the Tangs will be doomed. Number 3: She wants to be a writer. But how can she when her mom thinks she should stick to math because English is not her first language? It will take all of Mia's courage, kindness, and hard work to get through this year. Will she be able to hold on to her job, help the immigrants and guests, escape Mr. Yao, and go for her dreams? We Dare You Routledge

DIV The 40 Days to Starting Over: No More Sheets Challenge is an essential tool and companion piece to the ground-breaking and empowering book, *No More Sheets*. Many believers today are bound by the sheets of their past drug addiction, emotional bondage, sexual issues, abuse, and other life-shattering troubles. Dr. Juanita Bynum provides an easy-to-follow guide for believers struggling to live in God's perfect will. Through devotions, meditation, and journaling, you are led through a process to cast off the sheets that are entangling you and lead a fuller, more productive life serving the King of kings. This journal is a 40-day journey to find your identity. By the time you complete Day 40, you will have met the person you lost so long ago. You will have become reacquainted with who you really are, and you are going to like who you see! /div

Ten Years to Midnight National Academies Press

Does God exist? Does He do anything in this world? Famous authors like Richard Dawkins suggest strongly that it is very unlikely, but how unlikely is it? *God Doesn't; We Do* brings James A. Lindsay's mathematical expertise to the question and is able to put the matter under a microscope only available through an understanding of abstract mathematics, which he makes accessible to any reader. Because of that, this book will change the conversation about the existence of God. The central theme of this book, though, points out that even if there were a God, we have no reason to believe He does anything at all in this world. Thus the responsibility is on us, as it always has been, to make our world what it will be. From the back cover: Our world is one that is full of difficult challenges, and many people still turn to God for solutions or credit Him with ones that they find. The time for that kind of superstition is long passed. *God Doesn't; We Do* seeks to address the topic on philosophical grounds, making appeals to a scientific mindset and evidence-based decision making in fields where religion has dominated for centuries, including morality, politics, and even spirituality. The title really says it all—*God Doesn't; We Do: Only Humans Can Solve Human Challenges*.

The Life We Never Expected Routledge

This book is concerned to explore the changing role of the Parole Board across the range of its responsibilities, including the prediction of risk and deciding on the release (or continued detention) of the growing number of recalled prisoners and of those subject to indeterminate sentences. In doing so it aims to rectify the lack of attention that has been given by lawyers, academics and practitioners to back door sentencing (where the real length of a sentence is decided by those who take the decision to release) compared to front door sentencing' (decisions taken by judges or

magistrates in court). Particular attention is given in this book to the important changes made to the role and working of the Parole Board as a result of the impact of the early release scheme of the Criminal Justice Act 2005, with the Parole Board now deciding in Panels concerned with determinate sentence prisoners, lifers and recalled prisoners. A wide range of significant issues, and case law, has arisen as a result of these changes, which the contributors to this book, leading authorities in the field, aim to explore.
