We live in an era rife with cultural conflict. The 21st century is by no means free of wars, terrorism, riots, famine, nor epidemics. We may attempt to solve the challenges of our times by uniting the humanistic disciplines of philosophy, science, and technology. Our modern reality requires a fundamental understanding of the problems beleaguering our existence. Science and literature are key tools for gaining this insight. The wisdom accumulated throughout the centuries by scientists, philosophers, and writers is a solid foundation on which modern man can build the future.
