The authors are three recent graduates from Imperial College London who have all secured their first choice AFP jobs in a highly competitive programme in London. During their time in preparing for the interview process, they found that resources were limited in the information the resources conveyed and guidance was based on information passed down from colleagues. Hence, the aim of this book is to not only explain the application process but also provides prospective applicants with a useful workbook presenting several mock scenarios to work through. The interview forms the biggest proportion of the marks allocated to a candidate application and hence is the key determinant in securing a job.

With competition to get into Oxbridge now so fierce, this book goes beyond standard application technique to focus on long-term development of intellectual potential including insight into the power

of positive decision-making; how to practise independent and critical thinking skills; and how you can develop extra-curricular knowledge in genuine and impressive ways to stand out from the crowd. The book includes practical and insider knowledge that can't be found elsewhere - like how to strategically choose your college to boost your chances of admission, and how to interpret and respond to interview questions in a way that demonstrates your intellectual curiosity and academic potential. You'll find sample personal statements; examples of interview questions for all subjects; practical advice on fees and funding; and how to manage parents and peers. There is also a chapter dedicated to International Students. Online supporting resources for this book include a table including collect selectors for Oxford and Cambridge.

What makes a good doctor? How will you contribute to our university? Why medicine? What did you learn from your work experience? The ability to provide compelling answers in the medicine interview to questions like these is the difference between being offered a place and being rejected. The Medicine Interview book is an up-to-date (for 2013-2014 applicants) review of the most common questions, with full

answers and pointers on what the interviewers are looking for. This book contains over 300 pages of questions, with points to get across and full examples on answering the questions. Example questions: What makes you a good doctor? To answer this question, you need to know what qualities are necessary for a doctor to have. Most medical schools have a list of qualities they expect doctors, and therefore medical students to have. This can usually be found on their school of medicine website or in the prospectus so it is worth having a look through that list. When answering personality-based questions such as this, rather than just listing qualities, pick two or three and provide evidence that you possess these skills. "First and foremost I believe I would be a good doctor because I have a strong interest in both science and people. I have had an interest in science early on at school, and it was this interest that led to me studying Chemistry and Biology at A level. During Human Biology lessons I found I always wanted to know the reason why things went wrong in the body during disease, and it was this questioning that really fired my interest in the human body. Since I have been old enough to have a job, I have always had a job which involved lots of interaction with the public, especially children. Through both paid and volunteer work I have worked with people of all ages, through my work at a Care home, a nursery nurse assistant, a math's and science tutor, as a waitress and a retail assistant. The aspect I always enjoyed the most was talking to people. I feel my passion for people and for science, twinned with my good communication skills, provide an excellent foundation, which if built upon appropriately would make me a good

doctor." What person(s) has had the biggest positive impact on you? This can be a personal question, however, it is a good opportunity to appreciate someone who has either inspired you through their words or actions as a role model, or someone who has directly contributed to your schooling or extra-curricular activities. Highlight the things you have learnt from them or how they have had an impact on your life. Finally, talk about how you have taken it on board or how this impact will develop you as a person. "My coach at my football club, Ridgeway Rovers FC has been one of the most influential people in my life so far. Over the last 2 years playing under his guidance, he has not only helped me improve as a footballer, but also instilled in me some of what he describes as the key values to succeeding in life. This includes hard work and dedication to your craft, making sure you are early to the things you need to be on time to, and finally having the confidence in yourself to succeed in the task ahead of you. These are some of the things which I have tried to apply not only to my sporting life, but more importantly to my personal and academic life and have helped me through much of my A levels so far." Topics covered by The Medicine Interview Book: • Medical Based questions • Ethical Based questions • About the University • Personal qualities about you based questions • Industry based questions • Work experience and education based questions • Industry based questions • Your view on becoming a doctor based questions • NHS 2013 changes based questions *Menschen verstehen und lenken* World Scientific Publishing Company Fast alle Frauen verhüten irgendwann in ihrem Leben mit der Pille. As a new physician, you face numerous questions: How do you decide what type of medicine to practice? How should you prepare for your residency interview? Where do you want to settle after your training? Dr. Rashed Hasan, a pediatrician, knows that it's not always easy to answer that question. He offers advice that can help you decide what's right for you, answering the questions above and also providing insights on determining the right time to buy a home; negotiating contracts with hospitals; building a sound financial life; deciding whether to open your own practice or join a group; and navigating the tax code to maximize earnings. He includes practical information for new and established physicians on a variety of topics, such as improving leadership skills, maintaining health, responding to malpractice claims, and preparing for retirement. Hasan also explores the ramifications of recent changes to the health care system, including the Affordable Care Act. While it isn't perfect, the medical profession can be everything you dreamed it would be when you learn how to build your future today.

Wüssten wir nicht alle gerne, was andere

Menschen wirklich denken, fühlen oder planen? Wie wir sie zu etwas überreden oder beeinflussen können? Wie wir sofort erkennen können, ob sie besorgt oder zufrieden sind? Und wünschen wir uns nicht auch, dass sie uns als jemanden wahrnehmen, der Selbstsicherheit, Autorität und Empathie ausstrahlt? Menschen kommunizieren ständig nonverbal: durch Körpersprache und Gesichtsausdrücke, Tonlage und Aussprache, die Art, wie sie Gefühle zeigen oder sich kleiden, aber auch durch die bewussten und unbewussten Verhaltensweisen und Einstellungen. In diesem Buch zeigt uns der Bestsellerautor und

Körperspracheexperte Joe Navarro, wie wir diese universelle Sprache verstehen und anwenden können.
