Perspective of Security and Development in North East India

India's Northeast has long been riven by protracted armed conflicts for secession and movements for other forms of autonomy. This book shows how the conflicts in the region have gradually shifted towards inter-ethnic feuds, rendered more vicious by the ongoing multiplication of ethnicities in an already heterogeneous region. It further traces the intricate contours of the conflicts and the attempts of the dominant groups to establish their hegemonies against the consent of the smaller groups, as well as questions the efficacy of the state's interventions. The volume also engages with the recurrent demands for political autonomy, and the resultant conundrum that hobbles the region's economic and political development processes. Lucid, topical and thorough in analysis, this book will be useful to scholars and researchers in political science, sociology, development studies and peace & conflict studies, particularly those concerned with Northeast India.

Insurgency in North-east India Atlantic Publishers & Dist Northeast India comprises of seven states – Assam, Arunachal Pradesh, Manipur, Meghalaya, Mizoram, Nagaland and Tripura. This region has been the theatre of insurgency and ethnic-based armed conflicts for more than half a century making the region one of South Asia's most disturbed areas. The instability in Northeast India is characterized by two distinct factors – ethnic clashes among the indigenous groups and political movement against the Union Government. The conflicting dynamics in the Northeast ranges from insurgency for secession to insurgency for autonomy, from terrorism to ethnic clashes, to problems of continuous inflow of migrants and the fight over resources. Moreover, vested interests and inter tribal and inter factional rivalry have led militant groups to continually clash among themselves, plunging the region in a vicious cycle of militancy, social violence and lack of economic growth. These armed conflicts have given impetus to small arms proliferation, narcotics trade and a parallel economy. The democratic deficits and how the Central Government and the states have addressed these concerns are of interest. The location of the region, politically and geographically, has a fundamental bearing on it and its people who aspire for different goals and how they try to reach these goals. The region shares borders with four countries: Myanmar,

Bhutan, Bangladesh and Tibet/China and is connected to the Indian mainland by a narrow stretch of land. This adds to the trans – border ramifications to the conflicts. To address these issues CSA with the help of Centre for Northeast Studies and Policy Research, Guwahati engaged a few experts who have contributed papers which were presented at the Seminar in New Delhi in July 2010 and the same stand published through this book.

Since the British withdrew from the subcontinent, nations in the region have been at war with each other. But instead of fighting long-drawn-out wars like that between Iran and Iraq, nations of South Asia have sponsored guerrilla armies and armed, trained and equipped them to harass, bleed or embarrass their rivals. The four wars in the region's post-colonial era were also born out of sponsored guerrilla wars. In 1948 and 1965, Pakistan first tried to have its way in Kashmir by sponsoring irregulars on a large scale and then followed it up with unsuccessful military campaigns aimed at ensuring the state's secession from India. In 1962, China attacked India not so much over a disputed border or India's much publicized Forward Policy but essentially in response to what it felt was a joint Indo-US covert effort in Tibet. In 1971 India rounded off its successful sponsorship of the Bengali guerrilla struggle in erstwhile East Pakistan by a speedy military campaign that resulted in the break up of Pakistan. *Insurgent Crossfire* examines the origins of sponsored insurgencies and how they have shaped South Asia's tense diplomatic environment. Having done that, it studies the major sponsored guerrilla campaigns in

South Asia and then seeks a detailed case study of the phenomenon by focusing on the far eastern slice of the subcontinent. The author argues that this region, with its multitude of tribes and battling ethnicities, has been the most durable theatre of insurgent crossfire – in which nations like India, Pakistan, Bangladesh and China (a major actor in South Asian politics) have backed insurgencies against each other. *Insurgent North-eastern Region of India* Lancer Publishers Since the 1950s, China and India have been locked in a monumental battle for geopolitical supremacy. Chinese interest in the ethnic insurgencies in northeastern India, the still unresolved issue of the McMahon Line, the border established by the British imperial government, and competition for strategic access to the Indian Ocean have given rise to tense gamesmanship, political intrigue, and rivalry between the two Asian giants. Former Far Eastern Economic Review correspondent Bertil Lintner has drawn from his extensive personal interviews with insurgency leaders and civilians in remote tribal areas in northeastern India, newly declassified intelligence reports, and his many years of firsthand experience in Asia to chronicle this ongoing struggle. His history of the "Great Game East" is the first significant account of a regional conflict which has led to open warfare on several occasions, most notably the Sino-India border war of 1962, and will have a major impact on global affairs in the decades ahead. *Terrorism in India's North-east* Technical Publications Even After Fifty Years, India's Northeast Continues To Draw National Attention For All The Many Reasons. The Intensification Of Ethnic Differences Poses Significant Security Challenges For India. Taking A Holistic Approach, The Book Examines The Roots Of The Turmoil In The Region, The Inadequate Economic Development As A Contributing Factor As Well As The Regional Implications Of The Protracted Violence And Instability. ;;The Book Also Highlights The Role Of External Forces In Accentuating The Situation And The Linkages That Some Of The Militant Groups In This Region Have Managed To Forge And Thrive On. The Book May Be Found Useful For Policy Makers And Scholars Interested In This Region Of Northeast Region Of India.;;Us\$ 35 *Development Dynamics in North East India* Taylor & Francis State vs. Society in Northeast India: History, Politics and the Everyday looks at a state as an entity that does not operate strictly as a rational, legal and administrative organization. State

in the Northeast region is very much shaped by the social, economic and political practices on the ground. Using archival and ethnographic evidences, the book questions notions of region and border as fixed spaces. A state, in the process of governing society, produces itself through formal and informal practices on the ground, and the book argues that Northeast India is a

significant site for studying this. It engages with conceptual, theoretical and methodological challenges thrown up by the political experiences of ordinary people in the Northeast. The book discusses everyday legal discourse, official public memory, development discourse, cases of becoming marginalized,

resistance and ways of networking with the authorities. The objective is to understand the various ways in which state and society engage with each other; and to look at layers of historical interconnections that inform much of contemporary Northeast politics. The book will especially be of interest to scholars in politics, history, sociology and anthropology.
