*Classics of Philosophy, 2/e*, is the most comprehensive anthology of writings in Western philosophy in print. Spanning 2500 years of thought, it is ideal for introduction to philosophy and history of philosophy courses that are structured chronologically. More than seventy works by forty-two philosophers as well as fragments from the Pre-Socratics are included, offering students and general readers alike an extensive and economical collection of the major works of the Western tradition. This anthology contains the most important writings from Thales to Rawls; seventeen of these are complete works, while the others are judiciously abridged so that little of value to the student is lost. Unabridged works include such classics as Plato's *The Apology*,

Descartes's *Meditations on First Philosophy*, Leibniz's *The Monadology*, Hume's *An Enquiry Concerning Human Understanding*, Kant's *Foundation for the Metaphysics of Morals*, Mill's *Utilitarianism*, Russell's *A Free Man's Worship*, Sartre's *Existentialism and Humanism*, and Rawls's "Justice as Fairness." A lucid introduction, including a brief biographical sketch, accompanies each of the featured philosophers. *Classics of Philosophy, 2/e*, provides an extensive view of the most significant stages of growth in Western philosophy, including its birth with the Pre-Socratics as well as its contemporary developments. This book argues that neither deliberative democracy nor paternalism is a plausible solution to what is called the problem of political rhetoric. Further, the problem, while contingent, is likely to be intractable; thus, the response should not be to attempt more political solutions, but to adopt individual principles of epistemic caution.

most widely read and cited ethics textbook in psychology, has emerged with a broadened scope extending across the mental health and behavioral science fields. The revised volume considers many of the ethical questions and dilemmas that mental health professionals encounter in their everyday practice, research, and teaching. The book has been completely updated and is now also relevant for counselors, marriage and family therapists, social workers, and psychiatrists, and includes the ethics codes of those groups as appendices. Providing both a critical assessment and elucidation of key topics in the APA's guidelines, this comprehensive volume takes a practical approach to ethics and offers constructive means for both preventing problems, recognizing, approaching, and resolving ethical predicaments. Written in a highly readable and accessible style, this new edition retains the key features which have contributed to its popularity, including hundreds of case studies that provide illustrative guidance on a wide variety of topics, including fee setting, advertising for clients, research ethics, sexual

attraction, how to confront observed unethical conduct in others, and confidentiality, among others. *Ethics in Psychology and the Mental Health Professions* will be important reading for practitioners and students-in training.
