Teaching and Learning Foreign Languages provides a comprehensive history of language teaching and learning in the UK from its earliest beginnings to the year 2000. McLelland offers the first history of the social context of foreign language education in Britain, as well as an overview of changing approaches, methods and techniques in language teaching and learning. The important impact of classroom-external factors on developments in language teaching and learning is also taken into account, particularly regarding the policies and public examination requirements of the 20th century. Beginning with a chronological overview of language teaching and learning in Britain, McLelland explores which languages were learned when, why and by whom, before examining the social history of language teaching and learning in greater detail, addressing topics including the status that language learning and teaching have held in society. McLelland also provides a history of how languages have been taught, contrasting historical developments with current orthodoxies of language teaching. Experiences outside school are discussed with reference

to examples from adult education, teach-yourself courses and military language learning. Providing an accessible, authoritative history of language education in Britain, Teaching and Learning Foreign Languages will appeal to academics and postgraduate students engaged in the history of education and language learning across the world. The book will also be of interest to teacher educators, trainee and practising teachers, policymakers and curriculum developers.

Research shows that learning a second language boosts problem-solving, critical thinking, and listening skills, in addition to improving memory, concentration, and the ability to multitask. Children proficient in other languages also show signs of enhanced creativity and mental flexibility. There is a "critical period" or "window of opportunity" when children learn languages best. Studies have shown that this is when children are between birth and six years old. The younger children

are, the easier they will learn a second language. As they get older that ability diminishes. These easy and fun flashcards aim to help parents as a useful educational tool for kids to learn a new language. All images include the words in both English and the second language in clear, bold text. Suitable for toddlers on their own or in groups, these books are a child's perfect introduction to exploring new languages.

Few people have garnered so much enduring interest as Sir Richard Burton. A true polymath, Burton is best known today for his translations of the Kama Sutra and Arabian Nights. Yet, Africa stood at the center of his adult life. The Burton-Speke expedition (1856-59) that put Lake Tanganyika on the map led to years of controversy over the source of the White Nile. From 1861 to 1864 Burton served as British consul in Fernando Po and traveled widely between Ghana and Angola. He wrote prodigiously and contributed some of the first detailed ethnographic accounts of Africa's peoples. In many ways, however, Africa proved to be Burton's undoing. Injuries and sickness sapped his strength, he made enemies in high places, and, ironically, even the discovery of Lake Tanganyika worked to his disadvantage. Increasingly frustrated and bitter, he turned to alcohol as a frequent remedy. In this fascinating story of the relationship between a man and a continent, geographer James L. Newman provides an intimate portrait of Burton through careful examination of his journals and biographers' rich analyses. Delving deepest into Burton's later life and travels, Newman pinpoints the thematic mainstays of his career as a diplomat and explorer, namely his strong advocacy of aggressive imperial policies and his belief that race explained crucial human differences. Historians and scholars of the golden age of empire, as well as armchair adventurers, will not only discover what defined this famously enigmatic figure, but venture, themselves, into the heart of mid-nineteenth-century Africa.

In the 19th century, education became accessible to much wider circles of society in a great number and variety of schools and the teaching of grammar came to be obligatory from 1870/72 with the advent of general education. Whereas these general trends of the 19th century are well-known to scholars working in different disciplines of social history, and the history of education in particular, it is still true that major sections of the evidence are largely uncollected. This is especially so for school books: there is virtually a gap between the 18th century and the present grammatical tradition. This bibliography lists some 1930 works on English grammar published in the 19th century, mainly in Britain and the US, half of which are accompanied by short descriptions of their physical make-up, content and affiliation.

The volume investigates the different alignment patterns in Indo-Aryan and shows that the variation of alignment patterns in Indo-Aryan goes beyond the opposition between accusativity and ergativity. The book includes a thorough discussion of the concepts and terminology relating to alignment patterns. The study draws extensively on new language data from Indo-Aryan. It includes discussions of examples taken from Hindi, Sanskrit, Apabhramsa, Asamiya, Bangla, Oriya, the Bihari languages, Nepali, Kashmiri, Sindhi, Siraiki, Poguli, Gujarati, Punjabi, Marwari, Harauti, the Hindi varieties, and Shina. The volume offers a comprehensive overview of various alignment patterns in Indo-Aryan based on a wide range of data. By focusing on lesser known Indo-Aryan languages, the study questions the central position of Hindi-Urdu in the research on ergativity. Each language is treated in its own right, with a focus on language-specific data and analyses, rather than relying on a notional format that starts with pre-established linguistic concepts. In accordance with this methodology, much attention is paid to "indirect" connections between ergative constructions and other syntactic and semantic patterns in the various languages.
