Learn how to price creative work with confidence. Win more bids. Make more money. When it comes to pricing their work, far too many freelance designers and agencies merely guess what to charge their clients. As a result, profitable projects have as much to do with luck as they do anything else. In *The Psychology of Graphic Design Pricing*, you'll learn how to take luck out of the equation by calculating the cost to produce your work, understanding its market value, and extracting your client's budget. These three variables are used in a pricing spectrum, empowering you to price your work with confidence and profitability in every project opportunity. This book will teach you how to calculate your production costs, understand market value, extract your client's budget, bid with the right project price, and increase your profitability.

Esquire. Ford Motors. Burton Snowboards. The Obama Administration. While all of these brands are vastly different, they share at least one thing in common: a teeny, little bit of Aaron James Draplin. From its roots in the development of printing, graphic design has evolved as a means of identification, information, and promotion to become a profession and discipline in its own right. This authoritative documentary history begins with the poster and goes on to chart the development of word and image in brochures and magazines, advertising, corporate identity, television, and electronic media, and the impact of technical innovations such as photography and

the computer. For the revised edition, a new final chapter covers all the recent international developments in graphic design, including the role of the computer and the Internet in design innovation and globalization. In the last years of the twentieth century, at a time when "designer products" and the use of logos grew in importance, the role of graphic designers became more complex, subversive, and sometimes more politicalwitness Oliviero Toscani's notorious advertisements for Benetton. Digital technology cleared the way for an astonishing proliferation of new typefaces, and words began to take second place to typography in a whole range of magazines and books as designers asserted the primacy of their medium. Designers and companies discussed here include Neville Brody, David Carson, Design Writing Research, Edward Fella, Tibor Kalman, Jeffery Keedy, LettError, Pierre di Sciuolo, Tomato, Gerard Unger, Cornel Windlin, and a host of others. Over 800 illustrations, 30 in color.
