What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. "It's unlikely that Trump has ever read Amusing Ourselves to Death, but his ascent would not have surprised Postman." -CNN Originally published in 1985, Neil Postman's groundbreaking polemic about the corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. Amusing Ourselves to Death is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can

serve our highest goals. "A brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one." -Jonathan Yardley, The Washington Post Book World

Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they

develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

During the mid-1990s, the O.J. Simpson murder trial dominated the media in the United States and were circulated throughout the world via global communications networks. The case became a

spectacle of race, gender, class and violence, bringing in elements of domestic melodrama, crime drama and legal drama. According to this fascinating new book, the Simpson case was just one example of what the author calls 'media spectacle' - a form of media culture that puts contemporary dreams, nightmares, fantasies and values on display. Through the analysis of several such media spectacles - including Elvis, The X Files, Michael Jordan, and the Bill Clinton sex scandals - Doug Kellner draws out important insights into media, journalism, the public sphere and politics in an era of new technologies. In this excellent follow up to his best selling Media Culture, Kellner's fascinating new volume delivers an informative read for students of sociology, culture and media.

This first book for young readers about Terry Fox and the Marathon of Hope, written by one of Canada's best-known writers for young adults, is a blending of fact and fiction, fully endorsed by The Terry Fox Foundation. Hundreds of thousands of young Canadians participate in the Terry Fox Run each year and this book will further enhance their knowledge of Terry's epic journey. Run introduces a national hero to a new generation of readers. In his trademark page-turning style, Eric Walters, bestselling author of Trapped in Ice and Camp X, tells the story of Winston MacDonald. In trouble again after a suspension from school and a runaway attempt, Winston is sent to spend time with his father—a journalist who hasn't been around much since his family split up a year ago. Travelling to Nova Scotia with his father, who is covering what he thinks is just a human interest story about a man trying to run across the country, Winston spends a day with Terry Fox and his best friend, Doug. Their determination to achieve what seems like an impossible goal makes a big impression on Winston, and he takes courage and inspiration from Terry's run. He is overjoyed when his father's article about the Marathon of Hope ignites public interest across the country. But when Winston discovers that his father's next article about the Marathon of Hope will characterize Terry and Doug in an unflattering way, he is furious with his father and fearful of betraying his friends. Unsure of what to do or where to turn, Winston decides it is time to make a run for it himself...

The Dark Side of the All-American Meal Houghton Mifflin Harcourt

Violent crime has been rising sharply in many American cities after two decades of decline.

Homicides jumped nearly 17 percent in 2015 in the largest 50 cities, the biggest one-year increase

since 1993. The reason is what Heather Mac Donald first identified nationally as the "Ferguson effect": Since the 2014 police shooting death of Michael Brown in Ferguson, Missouri, officers have been backing off of proactive policing, and criminals are becoming emboldened. This book expands on Mac Donald's groundbreaking and controversial reporting on the Ferguson effect and the criminal-justice system. It deconstructs the central narrative of the Black Lives Matter movement: that racist cops are the greatest threat to young black males. On the contrary, it is criminals and gangbangers who are responsible for the high black homicide death rate. The War on Cops exposes the truth about officer use of force and explodes the conceit of "mass incarceration." A rigorous analysis of data shows that crime, not race, drives police actions and prison rates. The growth of proactive policing in the 1990s, along with lengthened sentences for violent crime, saved thousands of minority lives. In fact, Mac Donald argues, no government agency is more dedicated to the proposition that "black lives matter" than today's data-driven, accountable police department. Mac Donald gives voice to the many residents of high-crime neighborhoods who want proactive policing. She warns that race-based attacks on the criminal-justice system, from the White House on down, are eroding the authority of law and putting lives at risk. This book is a call for a more honest and informed debate about policing, crime, and race.

The bestselling author of UnSelfie explains why the old markers of accomplishment (grades, test

scores) are no longer reliable predictors of success in the 21st century -- and offers 7 teachable traits that will safeguard our kids for the future. Michele Borba has been a teacher, educational consultant, and parent for 40 years -- and she's never been more worried than she is about this current generation of kids. The high-achieving students she talks with every day are more accomplished, better educated, and more privileged than ever before. They're also more stressed, unhappier, and struggling with anxiety, depression, and burnout at younger and younger ages -- "we're like pretty packages with nothing inside," said one young teen. Thrivers are different: they flourish in our fast-paced, digital-driven, often uncertain world. Why? Dr. Borba combed scientific studies on resilience, spoke to dozens of researchers/experts in the field and interviewed more than 100 young people from all walks of life, and she found something surprising: the difference between those who struggle and those who succeed comes down not to grades or test scores, but to seven character traits that set Thrivers apart (and set them up for happiness and greater accomplishment later in life). These traits--confidence, empathy, self-control, integrity, curiosity, perseverance, and optimism--will allow kids to roll with the punches and succeed in life. And the even better news: these traits can be taught to children at any age...in fact, parents and educators must do so. In Thrivers, Dr. Borba offers practical, actionable ways to develop these traits in children from preschool through high school, showing how to teach kids how to cope today so they can thrive tomorrow.
