LYONS CLARK

Global Springer Nature

Between 1995 and the present day, the world has undergone significant advances in international law, norms, and institutions. Progress was particularly intense in the fields of global environment, human security, cultural diversity, and human rights. This book reveals the key role played by the European Union, Japan, and Canada in this process.

Straightforward MacMillan

A thrill-seeking Harvard linguistics professor and an ultrasecret branch of the Catholic Church go head-to-head in a race to uncover the secrets of the lost city of Atlantis. The ruins of the technologically-advanced, eerily-enigmatic ancient civilization promise their discoverer fame, fortune, and power... but hold earth-shattering secrets about the origin of man. While world-famous linguist and archaeologist, Thomas Lourds, is shooting a film that dramatizes his flamboyant life and scientific achievements, satellites spot impossibly ancient ruins along the Spanish coast. Lourds knows exactly what it means: the Lost Continent of Atlantis has been found. The race is on, and Lourds' challengers will do anything to get there first. Whoever controls the Lost Continent will control the world. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Straightforward Pre-Intermediate Springer

This original and panoramic book proposes that the underlying forces of demography and globalisation will shortly reverse three multi-decade global trends – it will raise inflation and interest rates, but lead to a pullback in inequality. “Whatever the future holds”, the authors argue, “it will be nothing like the past”. Deflationary headwinds over the last three decades have been primarily due to an enormous surge in the world’s available labour supply, owing to very favourable demographic trends and the entry of China and Eastern Europe into the world’s trading system. This book demonstrates how these demographic trends are on the point of reversing sharply, coinciding with a retreat from globalisation. The result? Ageing can be expected to raise inflation and interest rates, bringing a slew of problems for an over-indebted world economy, but is also anticipated to increase the share of labour, so that inequality falls. Covering many social and political factors, as well as those that are more purely macroeconomic, the authors address topics including ageing, dementia, inequality, populism, retirement and debt finance, among others. This book will be of interest and understandable to anyone with an interest on where the world’s economy may be going.

This booklet is intended to provide an introduction for non-specialists or new-comers to the subject of copyright and related rights. It explains in layman's terms the fundamentals underpinning copyright law and practice. It describes the different types of rights which copyright and related rights law protects, as well as the limitations on those rights. And finally it briefly covers transfer of copyright and provisions for enforcement.

China and the Global Business Revolution Springer

This book tells the story of China's emergence as a major economic power and the huge impact this will have on world business. Over the last five years Peter Nolan has conducted a major investigation into Chinese industry, its economic structure, and the opportunities for growth in the future. As one of just four world experts invited by the Chinese Government to consult on their application to join the World Trade Organisation he has worked closely with the heads of Chinese industry and with many foreign multinationals operating in China. China and the Global Economy is an executive summary of the opportunities for business in one of the largest markets in the world, by one passionate about its possibilities for the future.

Global MacMillan

This book provides a uniquely comprehensive explanation of the 2008-2009 global financial crisis and resulting scholarly research in the context of building an agenda for reform. With the clarity provided by almost a decade of hindsight and a careful eye toward planning for prevention, Elson guides readers through both historical fact and scholarly interpretation, highlighting areas where careful critique of and changes in the international financial architecture and the mainstream macroeconomic paradigm can promote greater financial stability in the future. Given the great public concern over growing income and wealth inequality, the book examines their links to the increased financialization of the economy, both prior to and since the crisis. Finally, the book identifies a number of lessons that need to be recognized if adequate and effective reforms are to be introduced to avoid a financial crisis of similar magnitude in the future. Comprehensive enough for university students and sufficiently innovative for financial policymakers, this book will appeal to a wide range of readers interested in understanding not just where the crisis has brought us, but what key economists have said about it and how we can strengthen our financial system oversight to deal with the continuing challenges of globalization.

Is peace an aberration? The bestselling author of Paris 1919 offers a provocative view of war as an essential component of humanity. NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY THE NEW YORK TIMES BOOK REVIEW AND THE EAST HAMPTON STAR “Margaret MacMillan has produced another seminal work. . . . She is right that we must, more than ever, think about war. And she has shown us how in this brilliant, elegantly written book.”—H.R. McMaster, author of *Dereliction of Duty and Battlegrounds: The Fight to Defend the Free World* The instinct to fight may be innate in human nature, but war—organized violence—comes with organized society. War has shaped humanity's history, its social and political institutions, its values and ideas. Our very language, our public spaces, our private memories, and some of our greatest cultural treasures reflect the glory and the misery of war. War is an uncomfortable and challenging subject not least because it brings out both the vilest and the noblest aspects of humanity. Margaret MacMillan looks at the ways in which war

has influenced human society and how, in turn, changes in political organization, technology, or ideologies have affected how and why we fight. War: How Conflict Shaped Us explores such much-debated and controversial questions as: When did war first start? Does human nature doom us to fight one another? Why has war been described as the most organized of all human activities? Why are warriors almost always men? Is war ever within our control? Drawing on lessons from wars throughout the past, from classical history to the present day, MacMillan reveals the many faces of war—the way it has determined our past, our future, our views of the world, and our very conception of ourselves.

The Global Covenant is a ground-breaking work by one of the leading scholars in international relations that rejuvenates the classical international society approach, and brings it into contact with the new era of world politics. It investigates the most important international issues of our time, including peace and security, war and intervention, human rights, failed states, territories and boundaries, and democracy. It draws on a family of closely related disciplines: diplomatic and

military history, international legal studies, and international political theory. It addresses basic methodological questions and presents the elements of a human sciences approach to the study of world politics. It contemplates the future of international society in the 21st century. The Global Covenant concludes by justifying the pluralist society of sovereign states as one that respects human diversity and upholds human freedom.
