South Asian Migration in the Gulf Taylor & Francis

The Annual Review of Comparative and International Education covers significant developments in the field of comparative and international education. This 2020 edition begins with a collection of discussion essays about comparative education trends and directions written by both professional and scholarly leaders.

Facets of Security in the United Arab Emirates IGI Global

Human history has seen many settlements transformed or built entirely by expatriate work forces and foreigners arriving from various places. Recent migration patterns in the Gulf have led to emerging 'airport societies' on unprecedented scales. Most guest workers, both labourers and mid to high-income groups, perceive their stay as a temporary opportunity to earn suitable income or gain experience. This timely book analyses the essential characteristics of this unique urban phenomenon substantiated by concrete examples and empirical research. Both authors have lived and worked in the Gulf including Qatar, Bahrain and the United Arab Emirates during various periods between 2006 and 2014. They explore Gulf cities from macro and interconnected perspectives rather than focusing solely on singular aspects within the built environment. As academic architects specialised in urbanism and the complex dynamics between people and places the authors build new bridges for understanding demographic and social changes impacting urban transformations in the Gulf.

Regional Integration and Migration Governance in the Global South Routledge

Even though blockchain technology was originally created as a ledger system for bitcoin to operate on, using it for areas other than cryptocurrency has become increasingly popular as of late. The transparency and security provided by blockchain technology is challenging innovation in a variety of businesses and is being applied in fields that include accounting and finance, supply chain management, and education. With the ability to perform such tasks as tracking fraud and securing the distribution of medical records, this technology is key to the advancement of many industries. The Research Anthology on Blockchain Technology in Business, Healthcare, Education, and Government is a vital reference source that examines the latest scholarly material on trends, techniques, and uses of blockchain technology applications in a variety of industries, and how this technology can further transparency and security. Highlighting a range of topics such as cryptography, smart contracts, and decentralized blockchain, this multi-volume book is ideally designed for academics, researchers, industry leaders, managers, healthcare professionals, IT consultants, engineers, programmers, practitioners, government officials, policymakers, and students.

Retail Therapy Routledge

No part of the world is currently as much affected by migration and displacement as the Arab States. The region accounts for 5% of the global population but 32% of the global population of refugees

and 38% of the global population of people internally displaced by conflict. Although migration offers opportunities, humanitarian crises have slowed down the pace of education development in the region relative to other regions, undermining the prospects of this and future generations.

[Executive summary, ed]

Routledge Handbook on China-Middle East Relations World Bank Publications

Science, Technology, Innovation, and Economic Growth in Arab Countries explores fresh approaches to STI policy formulation and implementation in the region, with applications to developing countries elsewhere. Developing useful contexts for studying Arab policies about science, technology, and innovation requires trustworthy data and judgment. Omar Bizri brings together both in this book. Data from sources such as the World Bank, UNESCO, the International Telecommunication Union, Nature, Science and recent surveys and policy formulation initiatives anchor this study among national initiatives that focus on essential needs, including safe water and food production, renewable energy utilization, and job and enterprise creation. For those eager to understand the challenges of STI capacity building, this book explores the many connections between technological change and economic growth. Presents and analyzes data about past, current and proposed efforts aimed at STI capacity building in Arab countries Emphasizes demand-driven policies for promoting rapid infrastructure and endogenous STI capacity building, as well as job creation Explores ways to enhance STI capacity building efforts through community-based and national initiatives Includes data from sources such as the World Bank, UNESCO, the International Telecommunication Union, Nature, Science and recent surveys

Routledge Handbook of Persian Gulf Politics Bloomsbury Publishing

The Routledge Handbook of Persian Gulf Politics provides a comprehensive and up-to-date analysis of Persian Gulf politics, history, economics, and society. The volume begins its examination of Ottoman rule in the Arabian Peninsula, exploring other dimensions of the region's history up until and after independence in the 1960s and 1970s. Featuring scholars from a range of disciplines, the book demonstrates how the Persian Gulf's current, complex politics is a product of interwoven dynamics rooted in historical developments and memories, profound social, cultural, and economic changes underway since the 1980s and the 1990s, and inter-state and international relations among both regional actors and between them and the rest of the world. The book comprises a total of 36 individual chapters divided into the following six sections: Historical Context Society and Culture Economic Development Domestic Politics Regional Security Dynamics The Persian Gulf and the World Examining the Persian Gulf's increasing importance in regional politics, diplomacy, economics, and security issues, the volume is a valuable resource for scholars, students, and policy makers interested in political science, history, Gulf studies, and the Middle East.

Taylor & Francis

This collection brings together legal scholars and Christian theologians for an interdisciplinary conversation responding to the challenges of global migration. Gathering 14 leading scholars from both law and Christian theology, the book covers legal perspectives, theological perspectives, and key concepts in migration studies. In Part 1, scholars of migration law and policy discuss the legal

landscape of migration at both the domestic and international level. In Part 2, Christian theologians, ethicists, and biblical scholars draw on the resources of the Christian tradition to think about migration. In Part 3, each chapter is co-authored by a scholar of law and a scholar of Christian theology, who bring their respective resources and perspectives into conversation on key themes within migration studies. The work provides a truly interdisciplinary introduction to the topic of migration for those who are new to the subject; an opportunity for immigration lawyers and legal scholars to engage Christian theology; an opportunity for pastors and Christian theologians to engage law; and new insights on key frameworks for scholars who are already committed to the study of migration.

Asianization of Migrant Workers in the Gulf Countries IGI Global

Combining visual and literary analyses and original ethnographic studies as part of a more general political reflection, *Migration in the Making of Gulf Space* examines the role of migrants and non-citizens in the processes of settling in the Arab States of the Gulf region. The contributions underscore the aspirational character of the Gulf as a place where migrant recognition can be attained while also reflecting on practices of exclusion. The book is the result of an interdisciplinary dialogue among scholars and includes an original contribution by the acclaimed author of the novel *Temporary People*, Deepak Unnikrishnan.

Interdisciplinary Approaches to Human Rights Routledge

International migration for temporary employment is key to South Asia's development path, in terms of both jobs and remittance flows. Overseas markets are a critical source of employment for South Asian economies that may not be able to absorb workers sufficiently or quickly enough into the domestic labor market. Migrant workers typically experience wage gains of at least three times their earnings back home, in addition to acquiring new skills and accumulating savings that can be used to start up entrepreneurial activities upon returning home. Remittances sent by migrants while abroad also boost household consumption and support macroeconomic stability in countries of origin. However, multiple challenges exist that prevent migration from achieving its full development potential. These challenges include high monetary costs, information gaps on employment opportunities in destination countries, a lack of protection while abroad, and high concentrations of migrants in few sectors and destinations. These often prevent the poorest from migrating overseas and may place those who actually migrate in situations of considerable vulnerability. Building on rigorous analytics, this book highlights policy actions that can be taken at all stages of the migration life cycle, including after return, to minimize the risks and maximize the benefits of migration for migrants themselves, their families, and the home economy. The book provides policy options to address information gaps on employment opportunities overseas at the departure stage, to prepare migrants adequately for their experience overseas, to diversify destinations and occupations abroad, and to maximize the benefits of return migration.

India Migration Report 2018 Springer Nature

This Handbook captures the salient features of Middle Eastern economies and critically examines the public policy responses required to address the challenges and opportunities across the region. Bringing together wide-ranging perspectives from carefully selected and renowned subject specialists, the collection fills a gap in this relatively young and growing academic field. Combining

discussion of theory and empirical evidence, the book maps out the evolution of Middle East economics as a field within area studies and applied development economics. Presented in six thematic sections, the book enables the reader to gain a comprehensive understanding of the region's main economic themes and issues: • Growth and development in comparative perspectives • Labour force and human development • Natural resources, resource curse and trade • Poverty, inequality and social policy • Institutions and transition to democracy • Corruption, conflict and refugees Providing an overview of the principal economic problems, policies and performances relating to the countries in the Middle East and North Africa region, this collection will be a key resource for upper-level undergraduates, graduates and scholars with an interest in Middle East economics, applied development economics, development studies and area studies.

Strategies for Cultural Assimilation of Immigrants and Their Children: Social, Economic, and Political Considerations Routledge

When immigrants leave their home country to live in a host country that has a different culture, the acculturation process begins. There is subtle cultural, social, and political pressure on immigrants to adopt the cultural values of the host nation. The acculturation process occurs over time. Exposure to a new culture is often stressful, as one is exposed to new values, beliefs, and behaviors that may be different from their home culture. *Strategies for Cultural Assimilation of Immigrants and Their Children: Social, Economic, and Political Considerations* increases awareness of the cultural assimilation process among parents, children, employers, and educators. This book discusses internal conflicts and promotes harmony and understanding. Covering topics such as civic literacy, mental health, and identity formations, this premier reference source is an excellent resource for sociologists, psychologists, government officials, educators and administrators of both K-12 and higher education, students of higher education, librarians, researchers, and academicians.

International Business Research Springer

Five billion people, two-thirds of the world's mega-cities, one-third of the global economy, two-thirds of global economic growth, thirty of the Fortune 100, six of the ten largest banks, eight of the ten largest armies, five nuclear powers, massive technological innovation, the newest crop of top-ranked universities. Asia is also the world's most ethnically, linguistically and culturally diverse region of the planet, eluding any remotely meaningful generalization beyond the geographic label itself. Even for Asians, Asia is dizzying to navigate. Whether you gauge by demography, geography, economy or any other metric, Asia is already the present - and it is certainly the future. It is for this reason that we cannot afford to continue to get Asia so wrong. *The Future Is Asian* accurately shows Asia from the inside-out, telling the story of how this mega-region is coming together and reshaping the entire planet in the process.

The South Asia to Gulf Migration Governance Complex Springer

This report analyzes labor migration trends in Asia and puts them in the context of demographic and policy trends. It provides an overview of the population trends in different Asian countries and looks at policy settings in several sending and destination countries of labor migrants.

Building Partnerships for Effectively Managing Labor Migration: Lessons from Asian countries Routledge

'Food Insecurity and Revolution in the Middle East and North Africa' studies the political economy of

agrarian transformation in the eponymous regions. Examining Egypt and Tunisia in detail as case studies, it critiques the dominant tropes of food security offered by the international financial institutions and promotes the importance of small-scale family farming in developing sustainable food sovereignty. Egypt and Tunisia are located in the context of the broader Middle East and broader processes of war, environmental transformation and economic reform. The book contributes to uncovering the historical backdrop and contemporary pressures in the Middle East and North Africa for the uprisings of 2010 and 2011. It also explores the continued failure of post-uprising counter-revolutionary governments to directly address issues of rural development that put the position and role of small farmers centre stage.

Global Governance and Muslim Organizations Bloomsbury Publishing

Long established as the leading textbook on migration and used by students and scholars alike all over the world, this fully revised and updated sixth edition continues to offer an authoritative and cutting-edge account of migration flows, why they occur, and their consequences for both origin and destination societies. International migration is one of the most emotive issues of our times, reforging societies around the world and shaping debates on security, national identity and sovereignty in profound ways. The expert authors of this book provide a truly global and interdisciplinary introduction to this perennially important topic, with chapters covering all of the world's regions and spanning the nineteenth century to the present day. Exploring the significance of migration in relation to recent events and emerging trends, from the policies of the European Union to the Great Recession, this text helps to shed light on the often large gap between the rhetoric and realities of migration. For students of migration studies in disciplines as wide ranging as politics, sociology, geography, area studies, anthropology and history this is an indispensable guide, whether already familiar with the subject matter or approaching the topic for the first time. New to this Edition: - Charts the contemporary politics of migration, including the latest statistical data, summary of policy developments and shifts toward anti-immigrant politics and Islamophobia - A brand new chapter on Categories of Migration used to describe migrants and analyse migration, including a discussion on the topical issue of 'climate refugees' - Extended discussion of the impacts of migration and development in origin countries in a new separate chapter at the end of the book - Improved coverage of migration trends in the former Soviet Union and Eastern Europe and Central Asia - Offers a better balance between Western and non-Western regions and perspectives on migration - Draws on up-to-date global data on migration and migration policies - A 'Migration Policy Toolbox', providing a comprehensive overview of different types of migration policies - A new glossary with definitions of key terms in migration, which are also highlighted throughout the text Accompanying online resources for this title can be found at bloomsburyonlineresources.com/the-age-of-migration-6th-edition. These resources are designed to support teaching and learning when using this textbook and are available at no extra cost. The Age of Migration is published by Bloomsbury Academic. In the United States and its dependencies, Canada, Mexico and the Philippines, it is distributed under licence by Guildford Press.

Routledge Handbook of Citizenship in the Middle East and North Africa Oxford University Press

Drawing on contributions from nine prominent scholars, the book reflects on global aspects of research in work, employment, leadership, management, and business. It follows current trends in

global business research and recommends directions for closing the gaps between theory and practice for the benefit of executives in multinational corporations, academics, and international transients. Work and employment remain important and a core part of life, giving not only a sense of purpose, routine and meaning, but also independence and the ability to connect and contribute to the lives of others and society. Leadership styles and management behaviors in earlier multi-country studies did not demonstrate significant associative patterns regarding interpersonal leadership in different countries, and the use of mainstream single-country leadership meta-categories was invalidated. Thus, future studies of leadership should focus on investigating interpersonal leadership across national borders in combination with contemporary trends such as distance leadership, global virtual teams, and intersectionality. As more and more people seek employment across borders, various types of sojourners, specifically millions of low status international workers, with some few exceptions, have largely been ignored by scholars who study international mobility. This failure adds to the research - practice gap between scholars who investigate, and the practitioners who manage, sojourners of all status levels. This book will appeal to scholars in leadership, management, international business, cultural studies and to practicing managers. The chapters in this book were originally published in *International Studies of Management & Organization*.

Global education monitoring report, 2019 BRILL

The United Arab Emirates (UAE) has elaborated its own philosophy of security. Driven by emergencies and increasing risks, both in the region and globally, Emirati authorities have developed a sense of anticipation as well as an agility to react promptly to new threats through the ability to assess the risks in any given situation. War and the avatars of conflict are a constant reality in the Middle East. Transnational threats, including the regional context, the war in Yemen, insecurity in the Levant and tensions with Iran affect the overall stability of the Peninsula and consequently that of the UAE. Owing to the inclusion of the UAE in the networks of globalization, non-traditional security issues are not relegated to the background. Issues such as COVID-19, immigration, cybersecurity and human trafficking need to be addressed domestically as well as globally. This volume offers a comprehensive and multifaceted examination of the traditional and non-traditional security measures present in the UAE that allow the country to remain politically stable in an otherwise volatile region, and aims to offer a comprehensive overview of all forms of security in the UAE.

Understanding Global Migration Academic Press

The book traces India's Saudi Policy and locates the current state of bilateral relations and the challenges it faces. It argues that during the Cold War the relations were largely shaped by the Pakistan factor which in turn inhibited both sides from exploring the importance and value of one another. As a result, the relations were largely transactional and marginal. The end of the Cold War coincided with two interesting developments, namely, significant growth in India's economic power and influence and the de-hyphenation of Pakistan from its Middle East policy. This resulted in greater political engagements between India and Saudi Arabia and was strengthened by the growing energy trade ties. For long expatriate population and haj have been the backbone of the relations, and they have been new instruments as India looks to enhance its engagements with the Kingdom through investments opportunities, political contacts, shared security concerns and strategic

cooperation. India's Saudi policy, however, face many challenges most importantly the regional instability, the Iran factor, low oil price and the international dynamics. The book will be the first comprehensive work on the India-Saudi relations. Though targeting a wider audience, it will be academically grounded and based on primary sources collected from India and Saudi Arabia. Asian Migrant Workers in the Arab Gulf States Asian Migrant Workers in the Arab Gulf States This topical volume deals with the major challenges of migration in the Global South and their governance, which are traditionally much less considered than migration to industrialized countries and its consequences. It is written in view of the intergovernmental agreement of the Global Compact for Safe, Orderly and Regular Migration, negotiated under the auspices of the United
