You've Never Seen What You've Always Needed to Know - Until Now Invisible forces are at work. They push and shove on everything you buy or sell. They affect every concept you want to take to market, all the suppliers you'll deal with, and every customer you'll ever see. To be successful, you need to understand them. See them in detail in ways not possible with other methods. Hypernomics: Using Hidden Dimensions to Solve Unseen Problems discovers that markets behave according to previously unknown laws set by the buyers and sellers within them. It reveals those rules and how to detect, describe, and deploy them to your advantage. It doesn't change economics so much as reveal it. It's like a microscope looking at pond water, a telescope tilted to the sky, sonar scanning the bottom of the ocean. Hypernomics lets you see into markets in ways you can't with the unaided eye. Sailors never navigate without a map. You shouldn't either, since your ship could wind up on the rocks. Hypernomics gives you the means to create market maps that show you where they have openings and how to fill them by giving customers what they want, don't have, and can afford. It finds their thresholds and limits and responses to every possible feature in any product you can offer. The interactions Hypernomics describes have been with us since the dawn of humanity. Now you can finally see them and enjoy the advantages your competitors do not have. Validated by 13

published papers, multiple awards, a patent, and customers such as NASA, Lockheed Martin, Virgin Galactic, and a restaurant down the street, only Hypernomics gives you the ability to solve problems as varied as How could a restaurant increase revenue by 25% by rearranging seating? How do you find, describe, and capitalize on open spaces in your market? What happens when an NFL player decreases his forty-yard dash time by a quarter of a second? If you tried to exceed a market's limitations, how could you lose \$1B? How do markets change over time? Know what you need to. Discover Hypernomics.

EDITORIAL: Gott zum Gruße zur nunmehr vierten Ausgabe von POETTSCHEKES POST aus dem intergalaktischen Raum. Die Welt ist alldieweil im Krisenmodus; während die Menschheit auch außerhalb unseres Planeten weitergehende Existenzmöglichkeiten erschließt. Der 1. FC Bayern München hat zum wiederholten Mal das Triple geholt - bestehend aus Gewinn der dt. Meisterschaft; DFB-Pokal und Championsleague. Geld regiert, wie es scheint den Fußball. Ist doch der FCB bis dato der finanzstärkste deutsche Fußballclub. Wobei zu sagen bleibt: Paris St. Germain, der Bayern CL-Endspielgegner, hat international die meisten Moneten. So scheint ein bisschen sportlicher Ehrgeiz angestachelt gewesen zu sein, welchen die Bayern unter dem alles diktierenden Motto MIA SAN MIA, erfolgreich für sich entschieden. Das CL-Endspiel endete in Lissabon 1:0, wie wir alle wissen ... Was wir auch alle wissen, oder wissen sollten, ist, dass in unserem global-apokalyptischen Szenario durch Volkes Stimme demnächst tiefgreifende Änderungen auf dem Plan stehen: ANGELA MERKEL dankt bei der nächsten Bundestagswahl ab - soviel ist sicher. Wird der Chaot DONALD TRUMP bei der US-Wahl im November das Zepter zu Ungunsten von JOE BIDEN in der Hand behalten? ALLE FRAGEN FORDERN ANTWORTEN (Tork Poetttschke). BESSER EIN GERUPFTES HUHN, ALS ÜBERHAUBT KEINE FEDERN ... Lassen Sie sich, lieber LeserIN, von POETTSCHEKES POST erneut dazu verleiten, den Blick über den Tellerrand zu wenden, sich von interessanten, zeitlos schönen Themen verführen. Von Fußball bis Weltuntergang! Was bleibt? Kleiner Scherz am Rande: "In einem kleinen Dorf gab es nur eine Kneipe und der Wirt war weit und breit der stärkste Mann. Er war so stark, dass sich bisher niemand gefunden hatte, der ihm das

Wasser hätte reichen können. Deshalb hingte er in seiner Kneipe ein Schild auf, auf dem jedem eine Prämie von 1000 EURO angeboten wurde, der stärker wäre als der Wirt. Eines Tages kam ein schwächlicher Mann in die Kneipe. Er las das Schild und bot dem Wirt an, seine Kräfte mit ihm zu messen. Der Wirt war einverstanden und holte eine Zitrone, quetschte sie aus, bis nur noch ein trockenes Etwas zurückblieb, und sprach zu dem Gast: "Wenn es Ihnen gelingt, auch nur einen Tropfen Saft aus dieser Zitrone zu quetschen, gehört Ihnen das Geld." Der Gast nahm die Zitrone, und drückte sie ohne sichtbare Anstrengung zusammen, und es kamen mehrere Tropfen Saft heraus. Als er sie losließ, zerfiel die Zitrone zu Staub. "Donnerwetter!", sagte der Wirt und überreichte ihm die 1000 EURO, "aber sagen Sie, sind Sie Ringer oder Gewichtheber oder so was?" "Nein, ich arbeite beim Finanzamt!" Hihi. Danke, dass Sie POETTSCHEKES POST lesen ...

. . . a gratifying collection of informed and engaging contributions. John A. Tessensohn, *European Intellectual Property Review* The importance of intellectual property rights is now well established as a vital component in the success of firms and nations. The diverse contributors to this volume, drawn from the fields of law, business and economics, clarify and analyze the problems and promise of IP policy from a global perspective. They discuss both developed and emerging nations and advance the understanding of this increasingly important topic. The articles address issues from an interdisciplinary focus with an emphasis on current topical issues. Topics addressed include intellectual rights protection in emerging nations such as China, an exploration of a specific cross-national intellectual property perspective, strategies for protecting intellectual property rights, and a guide to understanding emerging and non-western legal systems. A mix of theoretical and practical observations helps the reader navigate the increasingly international topic of intellectual property as well as offers strategies for optimal utilization of intellectual property assets. The volume serves well both as a solution-oriented book and as a tool for facilitating further discussion and analysis in the classroom. Scholars and students in law, business and economics, as well as business practitioners interested in a global perspective on IP policy, will enjoy this book.

The global automotive industry faces the most influential changes since the revolutionary introduction of mass production a century ago. Latecomer firms from Asia are challenging the western incumbents. They can change the rules of the game in the industry by leapfrogging several steps in their development process. This study seeks to contribute to the discussion of latecomer firms by gaining insights into the catch up processes of five automotive companies in the passenger car segment, namely BYD (PRC), Chery (PRC), Geely (PRC), Tata Motors (India) and Mahindra & Mahindra (India). Based on learning theories and the core processes of car manufacturers, the author develops a catch up framework in order to compare automotive latecomers. The Korean manufacturer Hyundai serves as an example for a successful catch up, and provides a contextual framing for catch up processes in the automotive sector. An analysis of empirical data provides evidence for the evaluation of the catch up status of the five challenger firms. The author emphasizes the influence of institutional settings in China and India and the role of business groups that can act as facilitators for the catch up process. Finally, the study clusters the catch up strategies of the five observed companies in order to compare their approach.

Providing a comprehensive overview of hot stamping (also known as 'press hardening'), this book examines all essential aspects of this innovative metal forming method, and explores its various uses. It investigates hot stamping from both technological and business perspectives, and outlines potential future developments. Individual chapters explore topics such as the history of hot stamping, the state of the art, materials and processes employed, and how hot stamping is currently being used in the automotive industry to create ultra-high-strength steel components. Drawing on experience and expertise gathered from academia and industry worldwide, the book offers an accessible resource for a broad readership including students, researchers, vehicle manufacturers and metal forming companies.

The aim of this new book series (Diatoms: Biology and Applications) is to provide a comprehensive and reliable source of information on diatom biology and applications. The first book of the series, *Diatoms Fundamentals & Applications*, is wide ranging, starting with the contributions of amateurs and the beauty of

diatoms, to details of how their shells are made, how they bend light to their advantage and ours, and major aspects of their biochemistry (photosynthesis and iron metabolism). The book then delves into the ecology of diatoms living in a wide range of habitats, and look at those few that can kill or harm us. The book concludes with a wide range of applications of diatoms, in forensics, manufacturing, medicine, biofuel and agriculture. The contributors are leading international experts on diatoms. This book is for a wide audience researchers, academics, students, and teachers of biology and related disciplines, written to both act as an introduction to diatoms and to present some of the most advanced research on them.

In this global era, Central Asia must be understood in both geo-economic and geopolitical terms. The region's natural resources compel the attention of rivalrous great powers and ambitious internal factions. The local regimes are caught between the need

for international collaborations to valorize these riches and the need to maintain control over them in the interest of state sovereignty. Russia and China dominate the horizon, with other global players close behind; meanwhile, neighboring countries are fractious and unstable with real potential for contagion. This pathbreaking introduction to Central Asia in contemporary international economic and political context answers the needs of both academic and professional audiences and is suitable for course adoption.

Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.
