Essays on the Environment in Comics and Graphic Novels Springer

Climate Change and the Course of Global History presents the first global study by a historian to fully integrate the earth-system approach of the new climate science with the material history of humanity. Part I argues that geological, environmental, and climatic history explain the pattern and pace of biological and human evolution. Part II explores the environmental circumstances of the rise of agriculture and the state in the Early and Mid-Holocene, and presents an analysis of human health from the Paleolithic through the rise of the state, including the Neolithic Demographic Transition. Part III introduces the problem of economic growth and examines the human condition in the Late Holocene from the Bronze Age through the Black Death, assessing the relationships among human technologies, climatic change, and epidemic disease. Part IV explores the move to modernity, stressing the emerging role of human economic and energy systems as earth-system agents in the Anthropocene. Supported by climatic, demographic, and economic data with forty-nine figures and tables custom-made for this book, *A Rough Journey* provides a pathbreaking model for historians of the environment, the world, and science, among many others.

Teaching Young Adult Literature Today Rowman & Littlefield

This book studies human rights discourse across a variety of graphic novels, both fiction and non-fiction, originating in different parts of the world, from India to South Africa, Sarajevo to Vietnam, with texts on the Holocaust, the Partition of the Indian subcontinent, the Rwandan and Sarajevan genocides, the Vietnam War, comfort women in World War II and the Civil Rights movement in the USA, to mention a few. The book demonstrates the emergence of the 'universal' subject of human rights, despite the variations in contexts. It shows how war, rape, genocide, abuse, social iniquity, caste and race erode personhood in multiple ways in the graphic novel, which portrays the construction of vulnerable subjects, the cultural trauma of collectives, the crisis and necessity of witnessing, and resilience-resistance through specific representational and aesthetic strategies. It covers a large number of authors and artists: Joe Sacco, Joe Kubert, Matt Johnson-Walter Pleece, Guy Delisle, Appupen, Thi Bui, Olivier Kugler and others. Through a study of these vastly different authors and styles, the book proposes that the graphic novel as a form is perfectly suited to the 'culture' and the lingua franca of human rights due to its amenability to experimentation and the sheer range within the form. The book will appeal to scholars in comics studies, human rights studies, visual culture studies and to the general reader with an interest in these fields.

A Personal Journey through the Science Random House

The New York Times bestselling graphic memoir from actor/author/activist George Takei returns in a deluxe edition with 16 pages of bonus material! Experience the forces that shaped an American icon -- and America itself -- in this gripping tale of courage, country, loyalty, and love. George Takei has captured hearts and minds worldwide with his magnetic performances, sharp wit, and outspoken

commitment to equal rights. But long before he braved new frontiers in STAR TREK, he woke up as a four-year-old boy to find his own birth country at war with his father's -- and their entire family forced from their home into an uncertain future. In 1942, at the order of President Franklin D. Roosevelt, every person of Japanese descent on the west coast was rounded up and shipped to one of ten "relocation centers," hundreds or thousands of miles from home, where they would be held for years under armed guard. *THEY CALLED US ENEMY* is Takei's firsthand account of those years behind barbed wire, the terrors and small joys of childhood in the shadow of legalized racism, his mother's hard choices, his father's tested faith in democracy, and the way those experiences planted the seeds for his astonishing future. What does it mean to be American? Who gets to decide? George Takei joins cowriters Justin Eisinger & Steven Scott and artist Harmony Becker for the journey of a lifetime.

A Green Critique Taylor & Francis

ONE OF BARACK OBAMA'S FAVORITE BOOKS OF THE YEAR "The best science-fiction nonfiction novel I've ever read." —Jonathan Lethem "If I could get policymakers, and citizens, everywhere to read just one book this year, it would be Kim Stanley Robinson's *The Ministry for the Future*." —Ezra Klein (Vox) *The Ministry for the Future* is a masterpiece of the imagination, using fictional eyewitness accounts to tell the story of how climate change will affect us all. Its setting is not a desolate, postapocalyptic world, but a future that is almost upon us. Chosen by Barack Obama as one of his favorite books of the year, this extraordinary novel from visionary science fiction writer Kim Stanley Robinson will change the way you think about the climate crisis. "One hopes that this book is read widely—that Robinson's audience, already large, grows by an order of magnitude. Because the point of his books is to fire the imagination."—New York Review of Books "If there's any book that hit me hard this year, it was Kim Stanley Robinson's *The Ministry for the Future*, a sweeping epic about climate change and humanity's efforts to try and turn the tide before it's too late." —Polygon (Best of the Year) "Masterly." —New Yorker "[*The Ministry for the Future*] struck like a mallet hitting a gong, reverberating through the year ... it's terrifying, unrelenting, but ultimately hopeful. Robinson is the SF writer of my lifetime, and this stands as some of his best work. It's my book of the year." —Locus "Science-fiction visionary Kim Stanley Robinson makes the case for quantitative easing our way out of planetary doom." —Bloomberg Green

Art Hilmo was a teenage boy in Norway when the Nazis invaded and began to take the Jewish families to concentration camps. Knowing their lives were at stake, Art's family decided they would risk everything to help these poor Jewish people.

Global Perspectives on Eco-Aesthetics and Eco-Ethics Rowman & Littlefield

You've finally reached the pivotal moment in your life to get clean and sober. I welcome you to join me as I share my quest for addiction recovery and sobriety. This book is hopeful and encouraging. It is a must read for the fellow addict that deserves a new chapter in life. I wrote this book with the burning desire and a passion for reaching out to fellow addicts as a resource for them to possibly utilize some of my experiences and methods for recovery and relapse prevention. The book

encompasses my life journey from my early teen years into adulthood as an addict, which details some of the painful aspects that encouraged me to turn to substance abuse as a coping mechanism. This book also alludes to my experience with the recovery process which I share many of the self-researched and time-tested techniques that helped me cultivate my successful rehabilitation process. Addiction exerts a long and powerful influence on the brain that manifests in three distinct ways: craving for the object of addiction, loss of control over its use, and continuing involvement with it despite adverse consequences. While overcoming addiction is possible, the process is often long, slow, and complicated. The word "addiction" is derived from a Latin term for "enslaved by" or "bound to." Anyone who has struggled to overcome an addiction - or has tried to help someone else to do so - understands why, and ultimately, we can understand that addiction is a "dis-ease". From my experience, addiction is also a disease of isolation. The question of whether addiction is a disease or not has perplexed clinicians and scholars and researchers for decades. At one point, addiction was easily called the disease. At other points in time, there was considerable debate about how to classify these phenomena. I think it's best to talk about the disease of addiction. The word "addiction" is derived from a Latin term for "enslaved by" or "bound to." Anyone who has struggled to overcome an addiction - or has tried to help someone else to do so - understands why, and ultimately, we can understand that addiction is a "dis-ease". From my experience, addiction is also a disease of isolation. The question of whether addiction is a disease or not has perplexed clinicians and scholars and researchers for decades. At one point, addiction was easily called the disease. At other points in time, there was considerable debate about how to classify these phenomena. I think it's best to talk about the disease of addiction. My story is like so many others who chose to foolishly abuse alcohol and drugs...most of us were unaware that we had these addictions that are conveniently labeled as a "disease." However, the fact is that each one of us is a unique individual with our own story to tell. Usually, the suffering alcoholic/ addict hits a point called "rock bottom" in their lives where they choose to get better or turn for the worse. When this happens, life-changing events usually transpire to test the person's character and integrity. Hitting "rock bottom" was my personal alarm clock for realizing I had a serious substance abuse problem. There was a defining moment in my life that turned a page, sending me in a new direction. Making the transition from being actively addicted to being in recovery is a complex physical and psychological process. There is a lot to learn in recovery and we have to make a lot of changes internally and externally. Writing this book has given me a wholesome and hopeful perspective on life and the world we live in. I find that I spend more time embraced in bold prayer and meditation which grants me the influence to believe in miracles for others. I trust that there are great people in this world that contribute to making a significant difference, consequently making the world a better place for all of us to live in. Composing this book was my contribution to 'pay it forward' in a positive way. I am honored.

Climate Changed Routledge

"I Smell of Cigarettes and Cheap Memories" is a lyrical journey through a whiskey-soaked heart torn by both the bittersweet triumphs and failures of past loves, both romantic and otherwise. Each poem envelops a story of its own with a beginning, middle and end, allowing the reader to envision themselves in a space and time where the words become a reality. It sends the mind down an emotional road full of both beer-spewing laughter and gut-wrenching heartache. Brumagin is able to

connect and relate to the most basic instincts and desires of human nature, most importantly what it means to gain and lose, and to genuinely let oneself feel the weight of those losses.

Reimagining the Relationship between Science Education and Climate Change Politics

Springer

Simcha Guterman's, *Leaves from Fire*, is a firsthand account written with the deep sense of comprehension he was documenting the fate of his people. Knowing full well that his life was in danger, Simcha chronicled the occurrences of the Holocaust on long scraps of paper, as they happened right before his eyes. The events described take place in Poland, during the first years of World War II. The author stuffed long paper scraps, written in Yiddish, into bottles and hid in them in different places. One of these bottles was discovered after the war. Simcha Guterman's work has been published and translated into eight different languages, receiving high praise from critics. The book's evocative illustrations were drawn by Yaakov Guterman, the author's son.

101 Rules of Thumb for Sustainable Buildings and Cities Createspace Independent Publishing Platform

The emergence of modern sciences in the seventeenth century profoundly renewed our understanding of nature. For the last three centuries new ideas of nature have been continually developed by theology, politics, economics, and science, especially the sciences of the material world. The situation is even more unstable today, now that we have entered an ecological mutation of unprecedented scale. Some call it the Anthropocene, but it is best described as a new climatic regime. And a new regime it certainly is, since the many unexpected connections between human activity and the natural world oblige every one of us to reopen the earlier notions of nature and redistribute what had been packed inside. So the question now arises: what will replace the old ways of looking at nature? This book explores a potential candidate proposed by James Lovelock when he chose the name 'Gaia' for the fragile, complex system through which living phenomena modify the Earth. The fact that he was immediately misunderstood proves simply that his readers have tried to fit this new notion into an older frame, transforming Gaia into a single organism, a kind of giant thermostat, some sort of New Age goddess, or even divine Providence. In this series of lectures on 'natural religion,' Bruno Latour argues that the complex and ambiguous figure of Gaia offers, on the contrary, an ideal way to disentangle the ethical, political, theological, and scientific aspects of the now obsolete notion of nature. He lays the groundwork for a future collaboration among scientists, theologians, activists, and artists as they, and we, begin to adjust to the new climatic regime.

Acclaim: "The language is understated, but quietly beautiful, and I find myself invested in Jabonkah as she's portrayed on the page, not only because of what happens to her, but because of her view of the world, sometimes sweet and sometimes shrewd, and always strong." Rebecca, agent "The story is compelling and the writing is extremely strong-some of the metaphors are wonderfully original. Moreover, the author manages to capture the child's voice perfectly." Valerie, professor Description: Jabonkah Sackey's only desire in life was to be like her mother and to be left alone. However, being born deep in the African bush in 1948, her desires didn't really matter. Cursed with an abusive father, Jabonkah was saddled with the plans he had for her. Instead of being a "stupid bush woman" like her mother, she was going to learn to obey. But after repeatedly disappointing and rebelling

against her father, he sets forth on a rampage targeting her mother and nearly beats her to death. After stepping in to save her mother and scalding her father with boiling water in the skirmish, Jabonkah's fate is unfortunately sealed. She is sent to the Society as punishment, where women from her own tribe perform the ritual of female circumcision. Six weeks later, Jabonkah returns home to the continued beatings until she is eventually disowned and sent away to live with a missionary by the name of Mother Stevens. Unfortunately, it's with Mother Stevens that her real struggle begins. Will Jabonkah escape the oppression and misery that is ruling her life, or will she succumb to her depression? Set against the harsh setting of mid-century Africa, *Driving the Birds* takes readers on a journey from small villages in Liberia to African missions, and eventually the United States. With this particular backdrop, Jabonkah's story brings many issues to light that affect countless women around the world. By documenting the horrible genital mutilation that she suffers in detail, *Driving the Birds* aims to bring about further awareness to an issue that is still prevalent today. Though the subject matter can be intense and discouraging at times, Jabonkah uses her faith and an uncommon personal resiliency to keep the story from setting into a despondent manner. With true personal freedom as her goal, Jabonkah is able to overcome numerous obstacles and a lifetime of hardships in route to achieving her dreams and ensuring her happiness. *Driving the Birds* by Russell Traughber is the uplifting true story of one woman's courageous journey from a small village in Liberia to the freedom that America offers. With unmistakable charm, unwavering determination, and a truly unique worldview, Jabonkah enthralls readers with each passing chapter. Her personal journey and repeated injustices are equal parts heartbreaking and infuriating. From repeated abuses at the hands of others and the subjection to female genital mutilation, Jabonkah's plight provides a window to the sufferings of less fortunate women around the world. However, where parts of her story enrage and discourage, it's her spirit and determination that ultimately leave readers feeling like they have taken part in Jabonkah's triumphs as well.

Hitting Rock Bottom Orbit

This book draws on recent developments across a range of perspectives including psychoanalysis, narrative studies, social practice theory, posthumanism and trans-species psychology, to establish a radical psychosocial alternative to mainstream understanding of 'environmental problems'. Only by addressing the psychological and social structures maintaining unsustainable societies might we glimpse the possibility of genuinely sustainable future. The challenges posed by the reality of human-caused 'environmental problems' are unprecedented. Understanding how we respond to knowledge of these problems is vital if we are to have a hope of meeting this challenge. Psychology and the social sciences have been drafted in to further this understanding, and inform interventions encouraging sustainable behaviour. However, to date, much of psychology has appeared happy to tinker with individual behaviour change, or encourage minor modifications in the social environment aimed at 'nudging' individual behaviour. As the ecological crisis deepens, it is increasingly recognised that mainstream understandings and interventions are inadequate to the collective threat posed by climate change and related ecological crises.

Climate Changed A Personal Journey through the Science Abrams

Ecological Crisis, Sustainability and the Psychosocial Subject New Society Publishers

In recent years, 'environmental collapse' has become an important way of framing and imagining environmental change and destruction, referencing issues such as climate change, species extinction and deteriorating ecosystems. Given its pervasiveness across disciplines and spheres, this edited volume articulates environmental collapse as a discursive phenomenon worthy of sustained critical attention. Building upon contemporary conversations in the fields of archaeology and the natural sciences, this volume coalesces, explores and critically evaluates the diverse array of literatures and imaginaries that constitute environmental collapse. The volume is divided into three sections— Doc- Collapse, Pop Collapse and Craft Collapse —that independently explore distinct modes of representing, and implicit attitudes toward, environmental collapse from the lenses of diverse fields of study including climate science and policy, cinema and photo journalism. Bringing together a broad range of topics and authors, this volume will be of great interest to scholars of environmental communication and environmental humanities.

Journey Into Climate CreateSpace

The Longest Journey is a bildungsroman by E. M. Forster, first published in 1907. It is the second of Forster's six published novels, following *Where Angels Fear to Tread* (1905) and preceding *A Room With A View* (1908) and *Howards End* (1910). It has a reputation for being the least known of Forster's novels, but was also the author's personal favourite and one of his most autobiographical. It is the only one of Forster's novels not to have received a film or television adaptation.

A Modern-day Journey to Oz Abrams

A call to action from Jane Fonda, one of the most inspiring activists of our time, urging us to wake up to the looming disaster of climate change and equipping us with the tools we need to join her in protest "This is the last possible moment in history when changing course can mean saving lives and species on an unimaginable scale. It's too late for moderation." In the fall of 2019, frustrated with the obvious inaction of politicians and inspired by Greta Thunberg, Naomi Klein, and student climate strikers, Jane Fonda moved to Washington, D.C., to lead weekly climate change demonstrations on Capitol Hill. On October 11, she launched Fire Drill Fridays, and has since led thousands of people in nonviolent civil disobedience, risking arrest to protest for action. In *What Can I Do?*, Fonda weaves her deeply personal journey as an activist alongside conversations with and speeches by leading climate scientists and inspiring community organizers, and dives deep into the issues, such as water, migration, and human rights, to emphasize what is at stake. Most significantly, Fonda equips us all with the tools we need to join her in protest, so that everyone can work to combat the climate crisis. No stranger to protest, Fonda's life has been famously shaped by activism. And now she is once again galvanizing the public to take to the streets. Many are already aware of the looming disaster of climate change and realize that a moral responsibility rests on our shoulders. In 2019, we

saw atmospheric concentrations of greenhouse gases hit the highest level ever recorded in human history, and our window of opportunity to act is quickly closing. We are facing a climate crisis, but we're also facing an empathy crisis and an inequality crisis; the surge of protests over police violence against black Americans has once again highlighted the links between racism and environmental degradation in our country. It isn't only earth's life-support systems that are unraveling. So too is our social fabric. This is going to take an all-out war on drilling and fracking and deregulation and racism and misogyny and colonialism and despair all at the same time. As Annie Leonard, executive director of Greenpeace USA and Fonda's partner in developing Fire Drill Fridays, has declared, "Change is inevitable; by design, or by disaster." Together, we can commandeer change for the positive—but it will require collective actions taken by social movements on an unprecedented scale. The problems we face now require every one of us to join the fight. The fight for not only our immediate future, but for the future of generations to come. 100% of the author's net proceeds from *What Can I Do?* have gone to Greenpeace [Leaves from Fire](#) Createspace Independent Publishing Platform

Exploring image and imagination in conjunction with natural environments, the animal, and the human, this collection of essays turns the ecocritical and ecocompositional gaze upon comic studies. The comic form has a long tradition of representing environmental rhetoric. Through discussions of comics including *A.D.: New Orleans After the Deluge*, *We3*, *Concrete*, and *Black Orchid*, these essays bring the rich work of ecological criticism into dialogue with the multi-faceted landscape of comics,

graphic novels, web-comics, cartoons, and animation. The contributors ask not only how nature and environment are portrayed in these texts but also how these textual forms inform how we come to know nature and environment—or what we understand those terms to represent. Interdisciplinary in approach, this collection welcomes diverse approaches that integrate not only ecocriticism and comics studies, but animal studies, posthumanism, ecofeminism, queer ecology, semiotics, visual rhetoric and communication, ecoseeing, image-text studies, space and spatial theories, writing studies, media ecology, ecomedia, and other methodological approaches.

A Transnational Ecocritical Analysis Flatiron Books

From the desolate Arctic to the lush green Mekong Delta, go on a journey around the world to explore different cultures and climate change impact from a personal and local perspective.

Bloomsbury Publishing

Citizen Science Fiction argues that science-fiction literature and media can engage and empower individuals to become active and critical participants in citizen science such that they can collaborate meaningfully in the scientific and technological communities, institutions, and industries that deeply shape their everyday lives.
