Interweaving social, cultural and political history, archaeology, anthropology and environmentalism, Neil Parsons and Alois Mlambo provide an engaging account of the region's varied past. Placing African voices and agency at centre stage rather than approaching the subject through a colonial lens, *A History of Southern Africa* provides an engrossing narrative of the region. This textbook is ideal for both undergraduate and postgraduate students of History and African Studies, and will provide an essential grounding for those taking courses in the history of southern Africa. Its lively and accessible approach will appeal to anyone with an interest in global history.

Africa in Crisis The Rosen Publishing Group, Inc

The whole of African history unfolds in this brilliant novel from one of the continent's major writers. The story is unified by the actions of one man, Mankunku, a "destroyer," who is born in mysterious circumstances in a banana plantation and whose identity is as variable as that of his land. This novel traces his development along with that of his unnamed country, from the precolonial era, through the horrors of European subjugation, to independence and the complexities of the postcolonial nation. Along the way, charlatans and saints, workers and bureaucrats, warriors and peacemakers are introduced in a moving mélange of laughter and terror. First published in France in 1987, *The Fire of Origins* received the 1988 Prix de la Fondation de France and the Grand Prix Littéraire d'Afrique Noire, and has been translated into Spanish, Danish, Norwegian, and Japanese. Mythical, lyrical, powerful, and surreal, it is one of the most ambitious works of fiction to come out of sub-Saharan Africa. This replaces 155652420X.

Africa has been coveted for its riches ever since the era of the Pharaohs. In past centuries, it was the lure of gold, ivory, and slaves that drew fortune-seekers, merchant-adventurers, and conquerors from afar. In modern times, the focus of attention is on oil, diamonds, and other valuable minerals. Land was another prize. The Romans relied on their colonies in northern Africa for vital grain shipments to feed the population of Rome. Arab invaders followed in their wake, eventually colonizing the entire region. More recently, foreign corporations have acquired huge tracts of land to secure food supplies needed abroad, just as the Romans did. In this vast and vivid panorama of history, Martin Meredith follows the fortunes of Africa over a period of 5,000 years. With compelling narrative, he traces the rise and fall of ancient kingdoms and empires; the spread of Christianity and Islam; the enduring quest for gold and other riches; the exploits of explorers and missionaries; and the impact of European colonization. He examines, too, the fate of modern African states and concludes with a glimpse of their future. His cast of characters includes religious leaders, mining magnates, warlords, dictators, and many other legendary figures—among them Mansa Musa, ruler of the medieval Mali empire, said to be the richest man the world has ever known. "I speak of Africa," Shakespeare wrote, "and of golden joys." This is history on an epic

scale.

"A higher education text on the history of Africa"--

African history before 1885 Routledge

The Idea of Development in Africa challenges prevailing international development discourses about the continent, by tracing the history of ideas, practices, and 'problems' of development used in Africa. In doing so, it offers an innovative approach to examining the history and culture of development through the lens of the development episteme, which has been foundational to the 'idea of Africa' in western discourses since the early 1800s. The study weaves together an historical narrative of how the idea of development emerged with an account of the policies and practices of development in colonial and postcolonial Africa. The book highlights four enduring themes in African development, including their present-day ramifications: domesticity, education, health, and industrialization. Offering a balance between historical overview and analysis of past and present case studies, Elisabeth McMahon and Corrie Decker demonstrate that Africans have always co-opted, challenged, and reformed the idea of development, even as the western-centric development episteme presumes a one-way flow of ideas and funding from the West to Africa.

The Yoruba: A New History is the first transdisciplinary study of the two-thousand-year journey of the Yoruba people, from their origins in a small corner of the Niger-Benue Confluence in present-day Nigeria to becoming one of the most populous cultural groups on the African continent.

Weaving together archaeology with linguistics, environmental science with oral traditions, and material culture with mythology, Ogundiran examines the local, regional, and even global dimensions of Yoruba history. The Yoruba: A New History offers an intriguing cultural, political, economic, intellectual, and social history from ca. 300 BC to 1840. It accounts for the events, peoples, and practices, as well as the theories of knowledge, ways of being, and social valuations that shaped the Yoruba experience at different junctures of time. The result is a new framework for understanding the Yoruba past and present.

A History of Race in Muslim West Africa, 1600-1960 Indiana University Press

There is a paradox about Africa: it remains a subject that attracts considerable attention yet rarely is there a full appreciation of its complexity. African historiography has typically consisted of writing Africa for Europe—instead of writing Africa for itself, as itself, from its own perspectives. The History of Africa redresses this by letting the perspectives of Africans themselves take center stage. Authoritative and comprehensive, this book provides a wide-ranging history of Africa from earliest prehistory to the present day—using the cultural, social, political, and economic lenses of Africa as instruments to illuminate the ordinary lives of Africans. The result is a fresh survey that includes a wealth of indigenous ideas, African concepts, and traditional outlooks that have escaped the writing of African history in the West. The new edition includes information on the Arab Spring, the rise of FrancAfrica, the presence of the Chinese in Africa, and the birth of South Sudan. The chapters go up to the present day, addressing US President Barack Obama's policies toward Africa. A new companion website provides students and scholars of Africa with access to a wealth of supporting resources for each chapter, including images, video and audio clips, and links to sites for further research. This straightforward, illustrated, and factual text allows the reader to access the major developments, personalities, and events on the African continent. This groundbreaking survey is an indispensable guide to African history.

On 21st November 2017 Robert Mugabe resigned as President of Zimbabwe after 37 years in power. A week earlier the military had seized control of the country and forced him to step down as leader of the ruling Zanu-PF party. In this revised and updated edition of his classic biography, Stephen Chan seeks to explain and interpret Mugabe in his role as a key player in the politics of Southern Africa. In this masterly portrait of one of Africa's longest-serving leaders, Mugabe's character unfolds with the ebb and flow of triumph and crisis. Mugabe's story is Zimbabwe's - from the post-independence hopes of idealism and reconciliation to electoral victory, the successful intervention in the international politics of Southern Africa and the resistance to South Africa's policy of apartheid. But a darker picture emerged early with the savage crushing of the Matabeleland rising, the elimination of political opponents, growing corruption and disastrous intervention in the Congo war, all worsened by drought and the HIV/AIDS crisis. Stephen Chan's highly revealing biography, based on close personal knowledge of Zimbabwe, depicts the emergence and eventual downfall of a ruthless and single-minded despot amassing and tightly clinging to political power. We follow the triumphant nationalist leader who reconciled all in the new multiracial Zimbabwe, degenerate into a petty tyrant consumed by hubris and self-righteousness and ultimately face an ignominious endgame at the hands of his own army.

Sowing the Mustard Seed Bloomsbury Publishing

History is a powerful aid to the understanding of the present, and those who are concerned with the escalating crisis in South Africa will find this an invaluable source book. This is the story of the evolution of a society in which race became the dominant characteristic, the primary determinant of status, wealth, and power. Cultural chauvinism of the first European colonists - primarily the Dutch - merged with economic and demographic developments to create a society in which whites relegated all blacks - free blacks, Africans, imported slaves - to a systematic pattern of subordination and oppression that foreshadowed the apartheid of the twentieth century. From the beginning of the nineteenth century the new empire-builders, the British, reinforced the racial order. In the next century and a half the industrialized South Africa would become firmly integrated into the world economy. Published originally in South Africa in 1979 and updated and expanded now, a decade later, this book by twelve South African, British, Canadian, Dutch, and American scholars is the most comprehensive history of the early years of that troubled nation. The authors put South Africa in the comparative context of other colonial systems. Their social, political, and economic history is rich with empirical data and rests on a solid base of archival research. The story they tell is a complex drama of a racial structure that has resisted hostile impulses from without and rebellion from within.
