In this section, we learn about ionic formula writing. The following video (part one of two) is approximately 30 minutes long. While viewing the video, take notes about important concepts presented. Pause the video if necessary to write down observations. Be sure to answer the video quiz questions at the end of the video. Ionic Formula

Writing 3. Locate the data table and the Ion Formula Chart. 4. From the cation and anion cards, locate ion cards for the first two combining ions listed in the first column of the data table. The first two, for example, are the aluminum cation and chloride anion. www.myips.org The first time seeing formulas and names of ionic compounds can be confusing. However, upon further investigation, there are actually simplistic formulated steps to do so. Discover a

systematic method of writing formulas for ionic compounds without the need to experimentally determine each formula using cation and anion cards. Putting Ions in Their Hands - Flinn Scientific Use this hands-on kit to make the abstract concept of "atoms" become more visual and real for students. The activities in this kit utilize colored chips as models for atoms and molecules. Students count and manipulate the "atom" chips until all atoms in the equation are conserved and then write

the final equation on the provided data sheets. Balancing Equations—Super Value Kit - Flinn Scientific A chemical formula is an easy way to tell what atoms are present in a compound. Use the "Atom Key" to find the chemical symbol for each element.
