DICKSON SAGE

Reading for pleasure Heinemann Educational Books

This best-selling text provides a scheme which enables the beginning researcher to organize and evaluate the research that they read and to plan and implement small scale research projects of their own. The authors also give structured, practical guidance on the development of a research question, techniques of data collection, qualitative and quantitative forms of analysis, and the writing and dissemination of research.

Teaching Children to Read : an Evidence-based Assessment of the Scientific Research Literature on Reading and Its Implications for Reading Instruction John Wiley & Sons

The Handbook of Research on Teaching Literacy Through the Communicative and Visual Arts, a comprehensive overview of research on this topic, extends conceptualizations of literacy to include all of the communicative arts (reading, writing, speaking, listening, viewing) and the visual arts of drama, dance, film, art, video, and computer technology.

Interactive Approaches to Second Language Reading Routledge

This volume encompasses the range of research questions on language-related problems that arise in language teaching, learning and assessment. The [150] chapters are written by experts in the field who each offer their insights into current and future directions of research, and who suggest several highly relevant research questions. Topics include, but are not limited to: language skills teaching, language skills assessment and testing, measurement, feedback, discourse analysis, pragmatics, semantics, language learning through technology, CALL, MALL, ESP, EAP, ERPP, TBLT, materials development, genre analysis, needs analysis, corpus, content-based language teaching, language teaching and learning strategies, individual differences, research methods, classroom research, form-focused instruction, age effects, literacy, proficiency, and teacher education and teacher development. The book serves as a reference and offers inspiration to researchers and students in language education. An important skill in reviewing the research literature is following a study's "plan of attack." Broadly, this means that before accepting and acting upon the findings, one considers a) the research question (Is it clear and focused? Measurable?), b) the subjects examined, the methods deployed, and the measures chosen (Do they fit the study's goal and have the potential to yield useful results?), and c) the analysis of the data (Do the data lead to the discussion presented? Has the author reasonably interpreted results to reach the conclusion?). Mohebbi and Coombe's book, *Research Questions in Language Education and Applied Linguistics: A Reference Guide*, helps budding researchers take the first step and develop a solid research question. As the field of language education evolves, we need continual research to improve our instructional and assessment practices and our understanding of the learners' language learning processes. This book with its remarkable 150 topics and 10 times the number of potential research questions provides a wealth of ideas that will help early career researchers conduct studies that move our field forward and grow our knowledge base. Deborah J. Short, Ph.D., Director, Academic Language Research &

Training, Past President, TESOL International Association (2021-22) As a teacher in graduate programs in TESOL I frequently come across the frustration of students at centering their research interests on a particular topic and developing research questions which are worth pursuing so as to make a contribution to the field. This frustration stems from the fact that our field is so vast and interrelated, that it is often impossible to properly address all that interests them. Hence, I wholeheartedly welcome this most relevant and innovative addition to the research literature in the field of TESOL and Applied Linguistics. Coombe and Mohebbi have created a real tour de force that stands to inform budding researchers in the field for many years to come. Additionally, the cutting-edge depiction of the field and all it has to offer will no doubt update the research agendas of many seasoned researchers around the world. The 150 chapters are organized in a most powerful, yet, deceptively simple way offering a positioning within the topic, suggesting questions that might direct inquiry and offering a basic set of bibliographic tools to start the reader in the path towards research. What is more, the nine sections in which the chapters are organized leave no area of the field unexplored. Dr. Gabriel Díaz Maggioli, Academic Advisor, Institute of Education, Universidad ORT del Uruguay, President, IATEFL

A Reference Guide Routledge

Cultivating motivation is crucial to a language learner's success - and therefore crucial for the language teacher and researcher to understand. This fully revised edition of a groundbreaking work reflects the dramatic changes the field of motivation research has undergone in recent years, including the impact of language globalisation and various dynamic and relational research methodologies, and offers ways in which this research can be put to practical use in the classroom and in research. Key new features and material: · A brand new chapter on current socio-dynamic and complex systems perspectives · New approaches to motivating students based on the L2 Motivational Self System · Illustrative summaries of qualitative and mixed methods studies · Samples of new self-related motivation measures Providing a clear and comprehensive theory-driven account of motivation, *Teaching and Researching Motivation* examines how theoretical insights can be used in everyday teaching practice, and offers practical tips. The final section provides a range of useful resources, including relevant websites, key reference works and tried and tested example questionnaires. Written in an accessible style and illustrated with concrete examples, it is an invaluable resource for teachers and researchers alike.

This best-selling text provides a scheme which enables the beginning researcher to organize and evaluate the research that they read and to plan and implement small scale research projects of their own. The authors also give structured, practical guidance on the development of a research question, techniques of data collection, qualitative and quantitative forms of analysis, and the writing and dissemination of research.

Preventing Reading Difficulties in Young Children Routledge

Over the past thirty years, the field of language learning strategies has generated a massive amount of interest and research in applied linguistics. *Teaching and Researching Language Learning*

Strategies redraws the landscape of language learning strategies at just the right time. In this book Rebecca Oxford charts the field systematically and coherently for the benefit of language learning practitioners, students, and researchers. Offering practical, innovative suggestions for assessing, teaching, and researching language learning strategies, she provides examples of strategies and tactics from all levels, from beginners to distinguished-level learners, as well as a new taxonomy of strategies for language learning. In demonstrating why self-regulated learning strategies are necessary for language proficiency, Oxford integrates socio-cultural, cognitive, and affective dimensions, and argues convincingly for the need for conceptual cross-fertilization. Providing clear and concise explanations of the advantages and limitations of the different approaches, this book is full of practical value and theoretical insights. The book is designed to guide the reader with the use of a range of features, including: - key quotes and concept boxes - preview questions and chapter overviews - glossary and end-of-chapter further readings - sources and resources section

Teaching & Researching: Computer-Assisted Language Learning Guilford Publications

This book provides information culled from classroom research, including some from teacher researchers, for those engaged in creating educational settings that support children's development of language and literacy. The book contains the following chapters: (1) "Observing Carlos: One Day of Language Use in School" (Mary M. Kitagawa); (2) "What Teachers and Children Do in a Language Rich Classroom" (Nancy G. Platt); (3) "Comments from a Teacher Researcher" (Vera E. Milz); (4) "Involving Teachers in Classroom Research" (Marie M. Clay); (5) "Observing Readers and Writers: A Teacher and a Researcher Learn Together" (Myna L. Matlin and Robert C. Wortman); (6) "A Teacher's Experience with Change" (Vida Louise Welsh); (7) "Teacher as Learner: Implications for Staff Development" (Angela M. Jaggar); (8) "Integrating the Curriculum for Teacher Preparation" (Charlotte S. Huck); (9) "Teacher Research and Decision Making: An Administrator's View" (Donald S. Monroe); (10) "Using Research to Create a Supportive Literacy Climate" (Gay Su Pinnell); (11) "Teacher Support Groups: Why and How" (Dorothy J. Watson and Margaret T. Stevenson); and (12) "Language Development: Issues, Insights, and Implementation" (Kenneth S. Goodman). A 25-page suggested reading list, "Whole Language Theory, Practice, and Assessment" (Angela M. Jaggar and Kathy T. Harwood) is appended. (MS)

Re-Interrogating Education Guilford Press

Now in its second edition, *Teaching and Researching Language Learning Strategies: Self-Regulation in Context* charts the field systematically and coherently for the benefit of language learning practitioners, students, and researchers. This volume carries on the author's tradition of linking theoretical insights with readability and practical utility and offers an enhanced Strategic Self-Regulation Model. It is enriched by many new features, such as the first-ever major content analysis of published learning strategy definitions, leading to a long-awaited, encompassing strategy definition that, to a significant degree, brings order out of chaos in the strategy field. Rebecca L. Oxford provides an intensive discussion of self-regulation, agency, and related factors as the "soul of learning strategies." She ushers the strategy field into the twenty-first century with the first in-depth treatment of strategies and complexity theory. A major section is devoted to applications of learning strategies in all language skill areas and in grammar and vocabulary. The last chapter presents innovations for strategy instruction, such as ways to deepen and differentiate strategy instruction to

meet individual needs; a useful, scenario-based emotion regulation questionnaire; insights on new research methods; and results of two strategy instruction meta-analyses. This revised edition includes in-depth questions, tasks, and projects for readers in every chapter. This is the ideal textbook for upper-level undergraduate and graduate courses in TESOL, ELT, education, linguistics, and psychology.

Applying Research in Reading Instruction for Adults Taylor & Francis

This book focuses on the effects of L1 cognitive resources on L2 reading e.g. the effects of L1 reading ability, the ability in L1 mental-structure building, L1 cognitive use in L2 reading, and other related cognitive mechanisms and capacities of EFL learners in China. It integrated test-based and product-oriented as well as VPA-based (verbal protocol analysis) and process-oriented experiments to address the problems of reading in a second language. This book provides several theoretical, methodological and pedagogical insights, including the multidimensional nature of L2 reading and Vygotskian sociocultural theory as a suitable L2 reading framework, combined approaches on L2 studies, and the rewarding active use of L1 cognitive resources in L2 learning.

Teachers and Research Routledge

Now in its second edition, *Teaching and Researching Language Learning Strategies: Self-Regulation in Context* charts the field systematically and coherently for the benefit of language learning practitioners, students, and researchers. This volume carries on the author's tradition of linking theoretical insights with readability and practical utility and offers an enhanced Strategic Self-Regulation Model. It is enriched by many new features, such as the first-ever major content analysis of published learning strategy definitions, leading to a long-awaited, encompassing strategy definition that, to a significant degree, brings order out of chaos in the strategy field. This is the ideal textbook for upper-level undergraduate and graduate courses in TESOL, ELT, education, linguistics, and psychology.

A Handbook Routledge

Teaching and Researching Reading was first written to help language professionals understand the complex nature of reading. Now in a thoroughly updated and improved second edition, the book expands connections from research on reading to instructional practices and teacher-initiated action research. Offering an updated overview of reading theory, it summarises key ideas and issues in first and second language contexts. In addition to providing insightful research analyses, Grabe and Stoller offer practical advice for practitioners and researchers, including evidence-based teaching ideas and a multi-step iterative process for conducting meaningful action research on reading-related topics. The volume outlines 29 projects for teacher adaptation and use, as well as numerous

new or substantially expanded resource materials that can be used for both action research and classroom instruction. Learning aids featured throughout the volume include · key concept boxes and a glossary of key terms · quote boxes highlighting critical issues in the field · resource lists of relevant journals, books and websites Fully revised throughout, with a range of new exemplary L1 and L2 research studies and an entirely new chapter on the move from research implications to instructional applications, this second edition of *Teaching and Researching Listening* is an invaluable resource for teacher trainers, practicing teachers, materials writers and researchers alike.

Teaching and Researching: Reading Applied Linguistics in Action

Language and culture are concepts increasingly found at the heart of developments in applied linguistics and related fields. Taken together, they can provide interesting and useful insights into the nature of language acquisition and expression. In this volume, Joan Kelly Hall gives a perspective on the nature of language and culture looking at how the use of language in real-world situations helps us understand how language is used to construct our social and cultural worlds. The conceptual maps on the nature of language, culture and learning provided in this text help orient readers to some current theoretical and practical activities taking place in applied linguistics. They also help them begin to chart their own explorations in the teaching and researching of language and culture. Routledge

Emphasis is on English as a second language.

Bringing Reading Research to Life Pearson Education

Information literacy involves a combination of reading, writing, and critical thinking. Librarians in an academic library, while not directly responsible for teaching those skills, are involved in making such literacy part of the students' learning process. Broussard approaches the misconceptions about the relationship between libraries as a source of information literacy, and offers suggestions on providing students support when working on research papers.

Self-Regulation in Context, Second Edition Routledge

Reading for pleasure urgently requires a higher profile to raise attainment and increase children's engagement as self-motivated and socially interactive readers. *Building Communities of Engaged Readers* highlights the concept of 'Reading Teachers' who are not only knowledgeable about texts for children, but are aware of their own reading identities and prepared to share their enthusiasm and understanding of what being a reader means. Sharing the processes of reading with young readers is an innovative approach to developing new generations of readers. Examining the interplay between the 'will and the skill' to read, the book distinctively details a reading for pleasure pedagogy and demonstrates that reader engagement is strongly influenced by relationships between children, teachers, families and communities. Importantly it provides compelling evidence that reciprocal reading communities in school encompass: a shared concept of what it means to be a reader in the 21st century; considerable teacher and child knowledge of children's literature and other texts; pedagogic practices which acknowledge and develop diverse reader identities; spontaneous 'inside-text talk' on the part of all members; a shift in the focus of control and new social spaces that encourage choice and children's rights as readers. Written by experts in the literacy field and illustrated throughout with examples from the project schools, it is essential reading for all those concerned with improving young people's enjoyment of and attainment in

reading.

Doing Research/Reading Research Routledge

Grounded in a strong evidence base, this indispensable practitioner guide and text has given thousands of teachers tools to support the literacy growth of beginning and struggling readers in grades K-2. The interactive strategies approach (ISA) is organized around core instructional goals related to enhancing word learning and comprehension of text. The book provides guidance for assessment and instruction in whole-class, small-group, and one-to-one settings, using the curricular materials teachers already have. Purchasers get access to a companion website where they can download and print 26 reproducible forms in a convenient 8 1/2" x 11" size. Of special value, the website also features nearly 200 pages of additional printable forms, handouts, and picture sorts that supplement the book's content. New to This Edition *Incorporates the latest research on literacy development and on the ISA. *Describes connections to the Common Core State Standards (CCSS). *Explains how to use the ISA with English learners. *Chapter on fluency. *Expanded coverage of morphological knowledge. *Companion website with downloadable reproducible tools and extensive supplemental materials. See also *Comprehensive Reading Intervention in Grades 3-8*, by Lynn M. Gelzheiser, Donna M. Scanlon, Laura Hallgren-Flynn, and Peggy Connors, which presents the Interactive Strategies Approach--Extended (ISA-X) for intermediate and middle grade struggling readers.

Teaching and Researching Language Learning Strategies Routledge

Teaching and Researching Listening provides a focused, state-of-the-art treatment of the linguistic, psycholinguistic and pragmatic processes that are involved in oral language use, and shows how these processes influence listening in a range of practical contexts. Through understanding the interaction between these processes, language educators and researchers can develop more robust research methods and more effective classroom language teaching approaches. In this fully revised and updated second edition, the book: examines a full range of teaching methods and research initiatives related to listening gives definitions of key concepts in neurolinguistics and psycholinguistics provides a clear agenda for implementing listening strategies and designing tests offers an abundance of resources for immediate use for teaching and research Featuring insightful quotes and concept boxes, chapter overviews and summaries to guide the reader, *Teaching and Researching Listening* will engage and inform teachers, teacher trainers and researchers investigating communicative language use.

Doing Research/Reading Research Routledge

Now in its third edition, *Teaching and Researching Reading* charts the field of reading (first and second language) systematically and coherently for the benefit of language teaching practitioners, students, and researchers. This volume provides background on how reading works and how reading differs for second language learners. The volume includes reading-curriculum principles, evidence-based teaching ideas, and a multi-step iterative process for conducting meaningful action research on reading-related topics. The volume outlines 14 projects for teacher adaptation and use, as well as numerous new and substantially expanded resource materials that can be used for both action research and classroom instruction.

The Interactive Strategies Approach National Academies Press

What does research tell us about how teachers can most effectively help young students learn to read? In *Research-Based Methods of Reading Instruction, Grades K-3*, Sharon Vaughn and Sylvia Linan-Thompson explore the research on reading, providing a comprehensive overview of the five core instructional areas and how each affects student achievement: *Phonemic awareness *Phonics and Word Study *Fluency *Vocabulary *Comprehension The authors include dozens of reading activities and lesson plans that teachers can use immediately, all of which have worked in actual classrooms and are grounded in solid research. A glossary and annotated resource lists will help you better understand key reading concepts and find reliable resources, including relevant Web sites. Whether your students have special needs or show no apparent learning difficulties, this book will expand your repertoire of teaching strategies and help you put students on the road to literacy.
