Martin Folkes (1690-1754): Newtonian,  
Antiquary, Connoisseur is a cultural and

intellectual biography of the only  
President of both the Royal Society and  
the Society of Antiquaries. Sir Isaac  
Newton's protégé, astronomer,  
mathematician, freemason, art  
connoisseur, Voltaire's friend and  
Hogarth's patron, his was an  
intellectually vibrant world. Folkes was  
possibly the best-connected natural

philosopher and antiquary of his age, an epitome of Enlightenment sociability, and yet he was a surprisingly neglected figure, the long shadow of Newton eclipsing his brilliant disciple. A complex figure, Folkes edited Newton's posthumous works in biblical chronology, yet was a religious skeptic and one of the first members of the gentry to marry an actress. His interests were multidisciplinary, from his authorship of the first complete history of the English coinage, to works concerning ancient architecture, statistical probability, and astronomy. Rich archival material, including Folkes's travel diary, correspondence, and his library and art collections permit reconstruction through Folkes's eyes of what it was like to be a collector and patron, a Masonic

freethinker, and antiquarian and virtuoso in the days before 'science' became sub-specialised. Folkes's virtuosic sensibility and possible role in the unification of the Society of Antiquaries and the Royal Society tells against the historiographical assumption that this was the age in which the 'two cultures' of the humanities and sciences split apart, never to be reunited. In Georgian England, antiquarianism and 'science' were considered largely part of the same endeavour.

This book features the biographical accounts of ten women selected by the author not so much with any intention of bringing together the best, greatest, or most admirable, nor even the most

remarkable women Italy has produced, as with a view of securing the greatest amount of variety, in point of social position and character. Each figure of the small gallery was intended to illustrate a distinct phase of Italian social life and civilization: the canonized Saint, that most extraordinary product of the "ages of faith," highly interesting as a social, and perhaps more so still as a psychological phenomenon; the feudal Châtelaine, one of the most remarkable results of the feudal system, and affording a suggestive study of woman in man's place; the high-born and highly-educated Princess of a somewhat less rude day, whose inmost spiritual nature was so profoundly and injuriously modified by her social position; the brilliant literary denizen of "La Bohème",

etc. All these were curiously distinct manifestations of womanhood, and if any measure of success has been attained in the endeavor to represent them duly surrounded by the social environment which produced them, while they helped to fashion it, some contribution will have been made to a right understanding of woman's nature, and of the true road towards her more completely satisfactory social development. \_x000D\_ Volume 1: \_x000D\_ St. Catherine of Siena (1347-1380)\_x000D\_ Caterina Sforza (1462-1509)\_x000D\_ Vittoria Colonna (1490-1547)\_x000D\_ Volume 2: \_x000D\_ Tullia D'Aragona (c. 1510 - c. 1570)\_x000D\_ Olympia Morata (1526-1555)\_x000D\_ Isabella Andreini (1562-1604)\_x000D\_ Bianca Cappello

The experience of exiles was fundamental for shaping Italian national identity. *Risorgimento in Exile* investigates the contribution to Italian nationalism made by the numerous patriots who were forced to live in exile following failed revolutions in the Italian states. Examining the writings of such exiles, Maurizio Isabella challenges recent historiography regarding the lack of genuine liberal culture in the *Risorgimento*. He argues that these émigrés' involvement in debates with British, continental, and American intellectuals points to the emergence of

Liberalism and Romanticism as international ideologies shared by a community of patriots that stretched from Europe to Latin America.

*Risorgimento in Exile* represents the first effort to place Italian patriotism in a broad international framework, revealing the importance and originality of the Italian contribution to European Anglophilia and Philhellenism, and to transatlantic debates on federalism. In doing so, it demonstrates that the *Risorgimento* first developed as a variation upon such global trends.

The inefficiency of the Italian judicial system has contributed to reduced investments, slow growth and a difficult business environment. The enforcement of civil and commercial claims suffers

from excessive delays in court proceedings, resulting in a very large number of pending cases. The Italian authorities have over the years taken steps to remove bottlenecks and speed up judicial proceedings. While these measures are generally steps in the right direction, more can be done.

Consideration could be given, inter alia, to reviewing court fees, improving the new mandatory mediation scheme, strengthening court management, and reforming the appeal system.

LETTER XIV. The Carbonari. Of late years there has been a spirit in Italy tending towards improvement; this, perhaps, is less outwardly developed in Florence than elsewhere, yet here also it exists. Politically and materially considered, Tuscany is looked upon as the best governed and happiest Italian state, but in some respects this very circumstance has kept back its inhabitants. The foreign power that rules Lombardy exciting undisguised hatred, and the misrule of the Popes being beyond all question quite intolerable-- the people of those states are in avowed opposition to government, while in Tuscany there is little to complain of, beyond the torpedo influence of a system of things that undeviatingly tends towards the

deterioration. The reign of Leopold I. was the golden age of Florence. He was grandduke at a time when a good sovereign was the dearest wish of a people, and the notion of governing themselves was not looked upon even as desirable. The French came next, and the tendency of their government was always to destroy the nationality of any people subdued by them. But this had a certain good effect in Italy. The curse of that country is its divisions, --while the other nations of Europe, in the middle ages, became divided into feudal tenures, and possessed by nobles, who, unable to maintain their independence, at last became mere courtiers of an absolute monarch, -- Italy was divided into municipal republics, or small states, --the mutual rivalry and quarrels of

which were the fatal causes that France and Spain disputed alternately, making Italy their field of battle, and Italian met Italian in opposing fight; and Pisa was willing to abase Florence; and Bologna gloried in the misfortunes of Ferrara: -- the union of the whole o

'Islam in Europe' and 'Islamophobia' are subjects of vital global importance which currently preoccupy policy-makers and academics alike. Through the examination of various European Muslim

groups and institutions that have branched off from Islamic movements - including the Muslim Brotherhood, Hizb ut-Tahrir and Jama'at-i Islami - this book outlines the configuration of social, political and religious processes that have given rise to new kinds of European Muslim organisations. The authors offer a new perspective on these Muslim groups and seek to reclaim them from the often highly-charged public debates by placing them within the context of their origins as politicised religious movements on the one hand and their ongoing incorporation into European societal structures on the other. They also consider the relationship of these organisations to their 'parent' movements and examine the presence of Islam in European education and

higher education institutions. Taking into account the connection between Islamic movements and the perceived surge of 'Islamophobia' in Europe, this book does not debate the question of whether these groups fit into normative or cultural structures of European nation-states, but rather examines how these structures have changed through their interaction with these groups and the growing Muslim population within Europe. It does not consider political Islam as the antithesis to a refined notion of secularism, but as a form of public religion which contributes to the ever-changing structure of Europe's secular regimes. Featuring the work of more than 40 scholars from around the world, this is the comprehensive guide to Islamic movements in Europe, offering

original, definitive perspectives on Muslims and Islam in Europe today. It will be essential reading for policy-makers, political commentators and scholars alike.

The volume analyzes the long-term trajectories of change in the capitalist models of the UK, Germany, Sweden, France, Italy, Hungary, Slovakia, and the United States. The case studies identify critical junctures and key periods of change in order to show how institutions are shaped by different sets of socio-political compromises and public policy. The case studies follow a common methodology, comparing change and

linkages across six core institutional domains, thus facilitating a comparative understanding of the patterns and drivers of institutional change, as well as how liberalisation impacts countries in similar and dissimilar ways. The historical perspective of the cases highlights the transformative effects of relatively slow and incremental changes. These case studies also make an innovative contribution to examining the linkages between four levels of institutions that regulate the economy – the international, macro (national), meso, and micro. The volume reveals both a common trend toward more liberal forms of capitalism but also variations on this overarching trajectory. Markets themselves create their own dynamics, which have varied effects on

firms and other economic actors in historically diverse institutional contexts. This book was originally published as a special issue of the Journal of European Public Policy.

The Fascist regime under Mussolini regarded its youth as its best hope for the future. Young people were courted more assiduously than any other group in the society and their political socialization became a central concern of the government. Believe, Obey, Fight discusses the various tools used by the Fascist regime from 1922 to 1943 to shape the political values and environment of the young. Tracy Koon focuses on the secondary agents of

socialization, including the party, the educational establishment, youth groups, and the media of political communication. She shows that the response to this socialization ranged from apparent consent to dissent and finally to open opposition. The regime employed several methods to produce consensus among the young. Koon's analysis begins with a discussion of the rhetorical style of Mussolini's message and the key political myths manipulated by his propagandist machine: fascism as continuing revolution and social justice, the glories of ancient Rome, the hygienic function of war and violence, the religious spirit of the new creed, and the omniscience of the leader. She then describes the pre-Fascist educational system, the "most Fascist" Gentile

reforms of 1923, and the later revision of those reforms by zealous party men engaged in the Fascist regimentation of teachers and students and the militarization and politicization of curricula and textbooks. Equally important agents of socialization were the Fascist groups organized for young people from their earliest years through the university level, including the annual national competitions and forums in which members could express their ideas on a range of issues. The regime provided physical, military, sports, and political training to strengthen the new Fascist society. Fascist socialization did for a time create a superficial consensus by appealing to both the love of conformity that marks the very young and the economic fears that caused

students to conform in the hope of jobs. But Koon argues that the regime's attempt to exert totalitarian control over the young deprived them of personal identity. As time passed, the contradictions of the regime became clearer, the chasm between Fascist rhetoric and reality more obvious. In the end, the majority of young people came to believe that the regime had given them nothing to believe in, no one to obey, and nothing for which to fight. Originally published in 1985. *Dispute Between Ethiopia and Italy: Minutes of the first session, October 11th-19th, 1935* Dispute Over a Very Italian Piglet

The end of World War II marked the beginning of a new golden era in international law. Treaties and international organisations proliferated at an unprecedented rate, and many courts and tribunals were established with a view to ensuring the smooth operation of this new universe of international relations. The network of courts and tribunals that exists today is an important feature of our global society. It serves as an alternative to other, sometimes more violent, forms of

dispute settlement. The process of international adjudication is constantly evolving, sometimes in unexpected ways. Through contributions from world-renowned experts and emerging voices, this book considers the future of international courts from a diverse range of perspectives. It examines some of the regional, institutional and procedural challenges that international courts face: the rising influence of powerful states, the turn to populism, the interplay between courts, the involvement of non-state actors and third parties in international proceedings, and more. The book offers a timely discussion of these challenges, with the future of several international courts hanging in the balance and the legitimacy of international adjudication being called

constantly into question. It should also serve as a reminder of the importance of international courts for the functioning of a rules-based international order. 'The Future of International Courts' is essential reading for academics, practitioners and students who are interested in international law, including those who are interested in the role international courts play in international relations.

'Masterly' - Eric Metaxas 'Mould-breaking' - John Guy 'A little gem of a

book' - Suzannah Lipscomb From the Introduction: 'There is no such thing as "the English Reformation". A "Reformation" is a composite event which is only made visible by being framed the right way. It is like a "war": a label we put onto a particular set of events, while we decide that other - equally violent - acts are not part of that or of any "war". Sixteenth- and seventeenth-century English people knew that they were living through an age of religious upheaval, but they did not know that it was "the English Reformation", any more than the soldiers at the battle of Agincourt knew that they were fighting in "the Hundred Years' War". . . . 'Plainly these religious upheavals permanently changed England and, by extension, the many

other countries on which English culture has made its mark. There is not, however, a single master narrative of all this turmoil. How could there be? . . . The way you choose to tell the story is governed by what you think is important and what is trivial, by whether there are heroes or villains you want to celebrate or condemn, and by the legacies and lessons which you think matter. Once you have chosen your frame, it will give you the story you want. 'So this book does not tell "the story" of "the English Reformation". It tells the stories of six English Reformations, or rather six stories of religious change in sixteenth- and seventeenth-century England. The stories are parallel and overlapping, but each has a somewhat different chronological frame, cast of characters

and set of pivotal events, and has left a different legacy.'

Europe was in turmoil during the first half of the twentieth century. The political stability that emanated from nineteenth-century political liberalism began to break down, reaching climaxes in the Great War, the Spanish Civil War, and the Second World War. Revolutions in Russia and Spain threatened parliamentary governments, and the Armenian genocide that began in 1915 foreshadowed the systematic destruction of European Jews in the 1930s and 1940s. Dictators seized power and established authoritarian regimes that stymied democratic expression and censored the press. Much of the

scholarship on each of the conflicts has tended to focus on the military (male) and the civilian (female) binary. Women and children experienced every conflict during this tumultuous period as civilians, consumers, victims, exiles, and combatants. As histories of women and war suggest, there are exciting new areas of research and scholarship that resist simplistic binaries. Women were not simply civilians or victims. They were actors in the minutiae of wars, revolutions, dictatorships, and genocides. Children were present in these conflicts and not invisible, as many histories suggest. They too were actors and often politicized by propagandist literature and sectarian education through their own experiences and the politics of their families. This collection

seeks to complicate the child/ adult distinction and examine the experiences of women and children as lenses to view a more collective face of conflict. While the volume brings to attention conflicts in Europe, the editors acknowledge the global ramifications of the revolutions, wars, and genocides, as well as the multitude of individual experiences. This collection seeks to expand understanding of the personal as the political in European conflicts from 1900-1950. We believe the focus on women and children offers a diverse perspective on five tumultuous decades of European history.

Within an environment made difficult by  
 the continuing economic crisis, the  
 Italian model for crisis management and  
 resolution has helped to avoid many  
 difficulties faced by intermediaries  
 across the globe. However, the Italian  
 model for crisis management will be  
 forced to adapt to the new EU Bank

Recovery and Resolution Directive, which introduces a unified regime for such events in all EU countries. This book explores the various methods for crisis management employed in Italian finance. The authors discuss procedures used in the banking and insurance sectors, such as deposit guarantee schemes and alternative dispute resolution systems. They also explore the evolution of the administrative sanctioning systems, and the roles of tax rules and credit rating agencies in Italian finance. This book analyses the evolution of the various crisis management processes, and discusses potential goals and improvements within the context of recent measures suggested by the European Commission.

"Fascinating insights into modern urban religious practice make Orsi's collection a must-read." -- Publishers Weekly "The essays provide insight into the cultural creativity, reinterpretation of worship and religious ingenuity of city people over the last 50 years." -- Library Journal "At last, a major dissection of the great mystery in modern American life -- how religion and spirituality prospered amidst industrialization, urbanization, and rampant technological change after 1880!" -- Jon Butler, Yale University "Urban religion" strikes many as an oxymoron. How can religion thrive in the alienated, secular, fast-paced, and materialistic world of the modern, Western city? The authors in this collection believe that cities not only can

provide the settings for religious expression, but also are material to the experiences which give rise to those religious expressions. In this book, they explore the distinctly urban forms of religious experience and practice that have developed in relation to the spaces, social conditions, and history of American cities.

Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical guide to cyber law – the law affecting information and communication technology (ICT) – in Italy covers every aspect of the subject, including intellectual property rights in the ICT sector, relevant competition rules, drafting and negotiating ICT-

related contracts, electronic transactions, privacy issues, and computer crime. Lawyers who handle transnational matters will appreciate the detailed explanation of specific characteristics of practice and procedure. Following a general introduction, the book assembles its information and guidance in seven main areas of practice: the regulatory framework of the electronic communications market; software protection, legal protection of databases or chips, and other intellectual property matters; contracts with regard to software licensing and network services, with special attention to case law in this area; rules with regard to electronic evidence, regulation of electronic signatures, electronic banking, and

electronic commerce; specific laws and regulations with respect to the liability of network operators and service providers and related product liability; protection of individual persons in the context of the processing of personal data and confidentiality; and the application of substantive criminal law in the area of ICT. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business

and legal professionals alike. Lawyers representing parties with interests in Italy will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative law in this relatively new and challenging field.
