This exciting new textbook provides exceptional coverage of the essential topics taught in a modern operations management course. Its highly current coverage includes contemporary and relevant service theory and applications. Appropriate manufacturing applications and theory are included where relevant. The book's modern/strategic approach addresses OM from a cross-functional perspective, which views operations as linked to all other functional areas of an organization, such as marketing and finance. The strategic approach takes

into consideration the integration of technology and how it changes the way a firm operates. Recognition of this current trend is the main differentiating factor for this Collier/Evans text. The book provides equal coverage of manufacturing and services theory and applications, while placing an emphasis on the integration of the value chain.

Los cambios producidos en la etapa curricular del Bachillerato en España con la entrada en vigor de la nueva legislación, han supuesto para los docentes tener que redactar nuevas programaciones didácticas acordes con esta situación. Dada mi experiencia docente como Coordinador del Área de Economía en un Instituto de Enseñanza Secundaria, presento la siguiente programación de la materia optativa de 'Fundamentos de Administración y Gestión' de Segundo Curso de Bachillerato. Junto a ella, y a modo de ejemplo práctico, presento un proyecto empresarial que realicé para el Curso Superior de Administración de Empresas (modalidad a distancia) de la Universidad de Barcelona/Formación

Continuada 'Les Heures'/Fundación 'Bosch i Gimpera' el año 1999, que puede servir de ayuda a la hora de proponer modelos para realizar proyectos de creación de empresas en el marco del desarrollo de la materia de 'Fundamentos de Administración y Gestión'.

La obra subraya las limitaciones del modelo financiero de empresa, basado

en la continua creación de valor para los accionistas y que ha generado efectos socioeconómicos negativos—recuérdese, por ejemplo, el caso Enron—. Como alternativa, se presenta el modelo stakeholder—también denominado comunitario, pluralista o estratégico—, orientado hacia la creación de riqueza para todas las partes interesadas en la organización empresarial, enlazando con el concepto de ciudadanía empresarial y la responsabilidad social de las compañías.

En el escenario actual, los requerimientos de diversos conocimientos en materia financiera por parte del sector empresarial son cada vez mayores, debido a los cambios acontecidos en el contexto mundial que han instaurado nuevas reglas en el orden económico y en los mercados financieros. Es así como la toma de decisiones financieras en la empresa moderna cumple rol primordial, en virtud

de su posterior impacto financiero. Las empresas, que se desempeñan en un contexto de alta volatilidad de los mercados y de riesgos crecientes, deben dominar los instrumentos disponibles en el sistema financiero para la correcta estructuración de estrategias tendientes a la maximización de los beneficios y a la minimización de los diferentes riesgos. La importancia que representan las operaciones de gestión financiera internacional es la principal causa por la cual los gerentes financieros ahora deben ocuparse de asumir sus respectivas responsabilidades, obligando a las instituciones empresariales a un grado de flexibilidad para poder sobrevivir como un medio expuesto a los cambios permanentes. En la medida en que los fondos sean asignados en una

forma equivocada, el crecimiento de la economía se volverá muy lento y en el caso de que se esté atravesando por una época de escasez económica esto será causante del deterioro de toda la empresa en general. CONTENIDO:

Generalidades de la gestión financiera. Valoración financiera. Herramientas financieras. Estructura financiera y apalancamiento. Gestión del capital de trabajo. Inversiones a largo plazo. Financiamiento a largo plazo, costo de capital y dividendos. Sistema financiero.

En la actualidad las empresas necesitan desarrollar una planeación estratégica que considere las demandas de los consumidores, las estrategias de las

empresas para consolidar su presencia, la tecnología, las variaciones de precios de las materias primas y el embate de las empresas multinacionales. Debido a estas variables en los consumidores de productos, las regulaciones de funcionamiento de las empresas por parte de los gobiernos, las condiciones económicas y su impacto; las variaciones de precios de los diferentes insumos, el avance tecnológico, las reestructuras de las empresas (fusiones, adquisiciones, alianzas estratégicas, etc.), hacen necesario que las empresas desarrollen planes financieros que permitan sobrevivir en este entorno cambiante. La planeación financiera que las empresas deben formular incluye esta serie de variables y su impacto en el funcionamiento de las empresas, para

así establecer los objetivos de manera adecuada y viable que habrá de conseguir la empresa, desarrollar las estrategias y planear para lograr lo que la empresa desea.
