 Essay from the year 2014 in the subject History - Africa, grade: 2.1, University of Central Lancashire, course: Modern World History, language: English, abstract: The Great Trek of the Dutch descended Afrikaner population which began in 1838 has been described by historians such as J. Du Plessis as being one of the strangest and most moving spectacles in history; with well-to-do farmers... packing their families, and household goods into an unwieldy ox-wagon, driving their flocks and herds before them, and trekking away to the unknown. Narratives of this period of history as depicted by Afrikaner

historians tend to portray the voortrekkers as united protagonists placed in a just and unfortunate situation. An exemplary figure of this form of historiography was Gustav Schoeman Preller and his works provided recognition of Afrikaner historical importance. He continued on and made the plea of: 'Let us be serious about accepting a written Afrikaans'. His works, particularly the 1920 book *Piet Retief* depicted the Voortrekker leader Retief and the Voortrekkers as heroes and raised the Great Trek as a definitive moment in nineteenth century nationalism. This draws upon the theory that the Great Trek was used as a means to preserve Afrikaner culture and was set upon as a form of cultural nationalism. This essay will discuss the extent to which this was the cause for the Great Trek, along with raising other reasons for why the trek began.

The Great Trek North London, Black

A thrilling *Star Trek: The Original Series* adventure featuring Captain James T. Kirk and the USS Enterprise in a strange battle for dilithium crystals against the Klingons. Dilithium. In crystalline form, the most valuable mineral in the galaxy. It powers the Federation's starships...and the Klingon Empire's battlecruisers. Now on a small, out-of-the-way planet named Direidi, the greatest fortune in dilithium crystals ever seen has been found. Under the terms of the Organian Peace Treaty, the planet will go to the side best able to develop the planet and its resources. Each side will contest the prize with the prime of its fleet. For the Federation—Captain James T. Kirk and the Starship Enterprise. For the Klingons—Captain Kaden vestai-Oparai and the Fire Blossom. Only the Direidians are writing their own script for this contest—script that propels the crew of the Starship Enterprise into their strangest adventure yet!

 "This is the dramatic story of the scramble by the European powers, and in particular England, for power and influence in Africa during the 19th century. Though the author ranges over much of the huge continent, the principal focus of Anthony Nutting's narrative is South Africa, where the struggle was sharpest and the stakes highest." "The Dutch had been in Africa since the late 16th century and the Portuguese, with their missionary settlements, long before. The British did not arrive till the period of the Napoleonic Wars, when the possibility of a hostile French presence at the Cape was not one England could lightly overlook, for Holland had joined France in declaring war against her. On June 11th, 1795, nine English men-of-war anchored in False Bay and landed a small force of redcoats with an order signed by Holland's refugee king, bidding the Dutch garrison to allow them to occupy the Cape. Thus began the long period of British hegemony in South Africa."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

By the #1 New York Times bestselling author of Killers of the Flower Moon, a powerful true story of adventure and obsession in the Antarctic, lavishly illustrated with color photographs Henry Worsley was a devoted husband and father and a decorated British special forces officer who believed in honor and sacrifice. He was also a man obsessed. He spent his life idolizing Ernest Shackleton, the nineteenth-century polar explorer, who tried to become the first person to reach the South Pole, and later sought to cross Antarctica on foot. Shackleton never completed his journeys, but he repeatedly rescued his men from certain death, and emerged as one of the greatest leaders in history. Worsley felt an overpowering connection to those expeditions. He was related to one of Shackleton's men, Frank Worsley, and spent a fortune collecting artifacts from their epic treks across the continent. He modeled his military command on Shackleton's legendary skills and was determined to measure his own powers of endurance against them. He would succeed where Shackleton had failed, in the most brutal landscape in the world. In 2008, Worsley set out across Antarctica with two other descendants of Shackleton's crew, battling the freezing, desolate landscape, life-threatening physical exhaustion, and hidden crevasses. Yet when he returned home he felt compelled to go back. On November 13, 2015, at age 55, Worsley bid farewell to his family and embarked on his most perilous quest: to walk across Antarctica alone. David Grann tells Worsley's remarkable story with the intensity and power that have led him to be called "simply the best narrative nonfiction writer working today." Illustrated with more than fifty stunning photographs from Worsley's and Shackleton's journeys, *The White Darkness* is both a gorgeous keepsake volume and a spellbinding story of courage, love, and a man pushing himself to the extremes of human capacity.

A Pictorial History of the Great Trek
 London : S. Low, Marston, Searle and Rivington

It is impossible to separate the Great Trek from events which took place as far back as the Portuguese explorers because those events shaped the backdrop to the causes of the Great Trek. Most writers have specialized in the trek itself whereas Binckes has adopted a broader approach that studies the impact of the earlier white incursions and migrations on southern Africa, to create a better understanding of the trek and its causes.

"After climbing a great hill, one only finds that there are many more hills to climb." -- Nelson Mandela
 The end of Apartheid and the beginning of democracy in South Africa demands a new kind of history. For the first time accounts of the 'Great Trek' of the Boer farmers and the African nationalists' mfecane are brought together and clarifies the confusing and contentious debate on the mfecane. Includes anecdotes and stories. The end of Apartheid and the beginning of democracy in South Africa demands a new kind of history. This deeply original approach to the making of modern South Africa will transform current thinking on the subject. The mass migration of the Boer farmers from Cape Colony to escape British domination in 1835-36 - the Great Trek - has always been a potent icon of African nationalism and identity. For African nationalists, the Mfecane - the vast movement of the Black populations in the interior following the emergence of a new Zulu kingdom as a major military force in the early 19th century - offers an equally powerful symbol of the making of a nation. With their parallel and contested visions of populations on the move to establish new states, these two stories became part of divided South Africa's separate mythologies, treated as unconnected events taking place in separate universes.

For the first time, in this groundbreaking book, accounts of both migrations are brought together and examined: the histories of all the movements of people and their leaders in the 19th century are told. In uniting these separate visions of African and Afrikaner history, Norman Etherington provides a fascinating picture of a major turning point in South African history, and points the way for a new kind of South African history for the future. Norman Etherington has published widely on Rider Haggard, South Africa, Southern

African history and politics and has spent long periods travelling and working in South Africa. He lives in Australia where he is Professor of History at the University of Western Australia.
