On The Wings of Inspiration: Exploring Our Inner Life through Interpretive Symbols was written in collaboration by two authors: Cheryl Metrick, and Jeree Wade, MA. The book is based on a collection of drawings and poems Cheryl created from spontaneous inspiration where she says, "They fell out of my head." These inspirational poems are descriptive of the drawings. The premise of the book is not only to explore the interpretation of the art itself, but to journey into the drawings to find more personal meaning within. The authors lead the readers to take a personal inner journey to self-awareness and inner growth. Cheryl writes interpretations and feelings about each drawing in a narrative, which at times is autobiographical, as she takes her journey through the pictures. Jeree's commentary and workbook sections delve into symbolism to guide readers through an analytical process to achieve greater awareness, become mindful, and set guidelines in the continued pursuit of a purposeful and fulfilling life. Topics from the metaphysical philosophies to spirituality, humanitarianism, ecology, and energy systems are explored. The workbook sections include a wide range of themes: compassion, intention and focus, manifestation, balance, transformation, maturation, renewal, self-knowledge, self-sabotage, self-awareness, death, letting go, and the meaning of time. A guided process supports the reader to move into a place that is more peaceful and more centered to understand and implement life's lessons.

What is dowsing? It is the use of intuition, with a readout device, or scale. Dowsing is also expression of intent. Does it work? In a word, yes. In fact, it is always working, in the background, because intuition, intent, and awareness, are always on. Dowsing is paying attention to what is already there. This book gives the basics of, and how to solve problems with, dowsing. In our Western Culture, the Church was threatened by Science, and they agreed to split the unseen world and the seen world, or head and heart. In Newton and Descartes' physical world, there is no action at a distance, other than gravity. The whole is merely the sum of the parts, for we live only in a physical world. But that is only a paradigm, a limiting belief system, in one culture. Dowsing has been used for 98% of human history. For those who doubt this, spend a year in the woods, with almost nothing of civilization. Dowsing is as natural as breathing, or seeing. In the so-called civilized world we live in, there is a lot of noise, and static, which blocks the conscious sensation of dowsing. Let's use a metaphor. When I was a kid, we would buy shoes at a Department store, usually Sears, Roebuck & Co. As I recall, we had to first locate the Department store. The grocery store did not sell shoes. Then, we had to locate the shoe department. We would get to the style we wanted. Then a shoe salesman would come out, size my feet, and get 2-3 selections of shoes. I would try them on, pick what felt best, and we'd buy them. Anything physical can be used as a metaphor. For dowsing, first we get to the store- the correct state of mind, the EEG state. This must- must- be at least the Alpha EEG, of about 7-14 Hz. Then we have to go to the correct department- just as a dowser must narrow down the scope of what s/he seeks, with finely crafted questions. Then we get preliminary feedback, and work with the subconscious mind- the salesclerk- to refine what we seek. The subconscious mind goes to the superconscious, and returns with the answer. We get it, and then work with it. Dowsing critiques say it doesn't work, that it has been debunked, because it can't work. The French Academy of Sciences debunked meteorites, in the 1840's, because there were no stones in the sky. About 1908, the New York Times debunked heavier-than-air flying machines, as impossible. In the late 1890's, the head of the U.S. Patent Office proposed closing this office down, because everything that could be invented had been. In college, I was surrounded by people saying Science was the only truth. They forgot to add the all-important tagline, "for me". The Universe is far bigger than our models of it. The Subconscious mind takes in more than 60 million bits of information per second. It filters the information, based on your belief systems, and gives you what the filters allow through, as 6-8 bits of information. Which has more data to work with? Have you ever been driving, and suddenly came back to awareness, and wondered where the last 10 miles went? Or writing or reading, and suddenly you realized you were 5 pages ahead, and weren't aware of it? Who was "driving the bus", metaphorically? Science measures at most 10% of existence- the replicable, easily measured part, the material world. It is only a department in a store in the shopping district, metaphorically. I like it. But it is only one channel, on a cable provider that has billions of channels that I've been able to count. Dr. Richard Feynman noted that the observer principle, in Quantum Mechanics, is very important. What you observe is what is real, to you. What you do not observe is not real, to you. The human organism is more sensitive than any measuring device currently in existence. Lyall Watson details 35 known senses, in his book Lifetide. Dowsing, as with any intuition, can only be learned, and proven, through direct experience. This book helps beginners learn to dowse.

dowsing state is the core of the dowsing process. It is an altered state that is different from the normal waking state of the brain and is characterized by not one brain wave, but four types simultaneously. Have you ever woken with the feeling that the dream you've just had really meant something - but not been sure of the meanings behind the strange images in the dream? After a while you forget about it and continue to live your life. Millions of people also ignores the meaning of these dreams not knowing how to interpret them and their connections with their spiritual self. Are you one of them? Taking a "behind the scenes" look at dreams, this book will take you through all the basics of dream interpretation. From the dreams you should ignore to the dreams that matter, along with the most common signs or symbols found in many of our dreams. The book draws on centuries of dream interpretation and meaning and explores the ways in which our dreams relate to our fundamental needs and desires. While our dreams are often "cluttered" with signs and symbols that are very unique to us, some have symbols and meanings that can be placed in a wider, human context. We all have a sixth sense. It is our unconscious mind. When we activate it we become superhuman. We are clairvoyant, telepathic, can find lost objects, can talk to our pets, heal disease, peer into the future, re-charge crystals, and commune with the angels. In short we go beyond the confines of our 5 senses and our lives become a daily adventure. Psychic abilities are not restricted to a gifted few - we all have them and they are just waiting to be set free. This book also includes... The strange history of dowsing What science, spiritualists and dowsers believe Practical methods and tips to learn both types of dowsing A list of different uses for dowsing and suggestions of how to use them How the importance of dreams has been studied throughout history Dreams in a psychological context Which dreams matter and which dreams don't How to use dreams to "tell the future" The "rules" of dream interpretation And much, much more!
