SHELDON JENNINGS

A Dictionary of the Latin Inscriptions

Routledge

Amigas y Amantes (Friends and Lovers)

explores the experiences of sexually nonconforming Latinas in the creation and maintenance of families. It is based on forty-two in-depth ethnographic interviews with women who identify as lesbian, bisexual, or queer (LBQ). Additionally, it draws from fourteen months of participant observation at LBQ Latina events that

Katie L. Acosta conducted in 2007 and 2008 in a major northeast city. With this data, Acosta examines how LBQ Latinas manage loving relationships with the families who raised them, and with their partners, their children, and their friends. Acosta investigates how sexually nonconforming Latinas negotiate cultural

expectations, combat compulsory heterosexuality, and reconcile tensions with their families. She offers a new way of thinking about the emotion work involved in everyday lives, which highlights the informal, sometimes invisible, labor required in preserving family ties. Acosta contends that the work LBQ Latinas take on to preserve connections with biological families, lovers, and children results in a unique way of doing family. Paying particular attention to the negotiations that LBQ Latinas undertake in an effort to maintain familial order, *Amigas y Amantes* explores how they understand femininity, how they negotiate their religious faiths, how they face the unique challenges of being in interracial/interethnic relationships, and how they raise their children while integrating their families of origin.

Sobre la base de una amplia casuística, demuestra estructuralmente las interrelaciones dialécticas entre la libido y

el instinto de muerte y hace notar hasta qué punto este último es un rasgo fundamental de nuestra cultura. Por primera vez -aun cuando en la literatura de todos los tiempos haya sido tema primordial- la problemática de la separación de los amantes como una fenomenología de la muerte es presentada científicamente en toda su amplitud.

From the fifteenth century to the beginning of the nineteenth century, devotional music played a fundamental role in the Iberian world. Songs in the vernacular, usually referred to by the generic name of 'villancico', but including forms as varied as madrigals, ensaladas, tonos, cantatas or even oratorios, were regularly performed at many religious feasts in major churches, royal and private chapels, convents and in monasteries. These compositions appear to have progressively fulfilled or supplemented the role occupied by the Latin motet in other countries and, as they were often composed anew for each celebration, the surviving sources vastly outnumber those

of Latin compositions; they can be counted in tens of thousands. The close relationship with secular genres, both musical, literary and performative, turned these compositions into a major vehicle for dissemination of vernacular styles throughout the Iberian world. This model of musical production was also cultivated in Portugal and rapidly exported to the Spanish and Portuguese colonies in America and Asia. In many cases, the villancico repertory represents the oldest surviving source of music produced in these regions, thus affording it a primary role in the construction of national identities. The sixteen essays in this volume explore the development of devotional music in the Iberian world in this period, providing the first broad-based survey of this important genre.

Historia de los Amantes de Teruel [J. D. Martínez de Marcilla and J. de Segura] con los documentos justificativos y observaciones críticas del autor Rowman & Littlefield

A sad and alcoholic man in search of "a woman to live and to die with, to love and to grow old with," and her, a girl who feels invaded by "the other one," the new

woman in her father's life: an ugly woman who finds any means to feel beautiful. Once again, Rosa Montero shows the luminous and selfish side of the soul through stories with a common ground: the complexity of human relationships. Those who have had lovers and/or enemies will identify with these stories, which are not only for enjoying but also to reflect upon.

"Si vous manque l'imagination de ce que peuvent être les amantes dont parle ce Dictionnaire, il vous suffit d'y rechercher le terme. N'hésitez pas en recopier la définition comme je le fais ici : Les amantes sont celles qui, éprouvant un violent désir les unes pour les autres, vivent/aiment dans des peuples, suivant les vers de Sappho, "en beauté je chanterai mes amantes". Il serait difficile de faire plus clair, plus concis et plus élégant. Quelque chose pourtant vous

chiffonne (vous constatez d'ailleurs que le mot "chiffon" est absent de ce dictionnaire) : la définition que vous venez de lire est subtilement circulaire et pleinement plurielle. Littré, Larousse, Robert ne procèdent pas ainsi : lexicographes positifs, ils nous enseignent entre autres choses positives, qu'une amante est une femme attachée à un homme par des sentiments tendres ; qu'au pluriel, le terme, dès lors nécessairement masculin (les amants) désigne un couple s'aimant d'amour réciproque. Or, les amantes de Wittig et Zeig vivent non en couples, mais en formation immédiatement politique (des peuples) et plurielle. Enfin, les amantes ne sont pas des femmes, et encore moins des femmes qui aiment des femmes. — Comment ça !? les amantes ne sont pas des femmes ?! Un livre rigoureusement logique (c'est-à-dire poétique et ironique) et d'une ingéniosité délectable." Anne F. Garéttta

Under the Franco regime (1939-1976), films produced in Spain were of poor quality, promoted the regime's agenda, or were heavily censored. After the dictator's death, the Spanish film industry transitioned into a new era, one in which artists were able to more freely express themselves and tackle subjects that had been previously stifled. Today, films produced in Spain are among the most highly regarded in world cinema. The Encyclopedia of Contemporary Spanish Films features nearly 300 entries on the written by a host of international scholars and film critics. Beginning with movies released after Franco's death, this volume documents four decades of films, directors, actresses and actors of Spanish cinema. Offering a comprehensive survey of films, the entries address such topics as art, culture, society and politics. Each includes comprehensive production details and provides brief suggestions for further reading. Through its examination of the

films of the post-Franco period, this volume offers readers valuable insights into Spanish history, politics, and culture. An indispensable guide to one of the great world cinemas, *The Encyclopedia of Contemporary Spanish Films* will be of interest to students, academics, and the general public alike.

Mathematics is a universal language that not only humans use it but is also used by chemical elements and molecules that follow mathematical models, many physical phenomena are develop conform to mathematical principles such as the winds and waves of the sea, geomorphology, plant morphology, animal anatomy and movements of the stars, planets, satellites and comets follow mathematical principles. The man did not invent the mathematics because this one is much older than him, but he learned to interpret it and to use it to its own benefit. Nowadays computers are used to perform the most complex calculations. However, until about 50 years ago, mathematicians did their calculations by hand, using pencil

and paper. To learn math it is necessary to do calculations by hand and mental. Therefore, this gridbook is a stimulus for you to make calculations by hand, in the style of the old mathematicians like Pythagoras, Archimedes, Newton or Einstein. It does not matter if you only calculate sums and subtractions, or multiply and divide... or you go further and solve quadratic equations, derivations, integrals... One of the most important and useful things that everyone should learn is to CALCULATE!-----La Matemática es un idioma universal que no solo los humanos lo utilizan, sino que también es utilizada por los elementos y moléculas químicas siguen modelos matemáticos, muchos fenómenos físicos se ajustan a principios matemáticos tales como los vientos y las olas del mar, la geomorfología, la morfología vegetal, la anatomía animal y los movimientos de los astros, planetas, satélites y cometas siguen principios matemáticos. El hombre no inventó la matemática porque esta es mucho más antigua que él, pero aprendió a interpretarla y a utilizarla en beneficio propio. Hoy en día se utilizan

computadoras para realizar los cálculos más complejos. Sin embargo, hasta hace unos 50 años, los matemáticos hacían sus cálculos a mano, con lápiz y papel. Para aprender matemáticas es necesario hacer cálculos a mano y mentales. Por eso, este cuaderno es un estímulo para que realices cálculos a mano, a la usanza de los antiguos matemáticos como Pitágoras, Arquímedes, Newton o Einstein. No importa si solo calculas sumas y restas, o multiplicas y divides... o vas más allá y resuelves ecuaciones cuadráticas, derivaciones, integrales... Una de las cosas más importantes y útiles que todo el mundo debe aprender es a CALCULAR!
