 A stunning and unique collection of satellite images of Earth that offer an unexpected look at humanity, derived from the wildly popular Daily Overview Instagram account. Inspired by the 'Overview Effect' - a sensation that astronauts experience when given the opportunity to look down and view the Earth as a whole - the breathtaking, high-definition satellite photographs in OVERVIEW offer a new way to look at the landscape that we have shaped. More than 200 images of industry, agriculture, architecture, and nature highlight incredible patterns while also revealing a deeper story about human impact. This extraordinary photographic journey around our planet captures the sense of wonder gained from a new, aerial vantage point and creates a perspective of Earth as it has never been seen before. 'Stunning, surprising and intriguing photographs of Earth from the skies.' Guardian 'Absolutely gorgeous, yet absolutely gut-wrenching'

Wired

Pirates Have Feelings, Too! Knopf

From the Dynamike Series: It's almost Thanksgiving, and Dynamike's friends are dreaming of all the delicious foods they'll be eating. But Dynamike is depressed because he won't be celebrating with a big feast this year. Just when he thinks his Thanksgiving is ruined, Dynamike gets something to really be thankful for. It is easy to get caught up in the festivities of Thanksgiving and forget that not everyone is fortunate enough to celebrate. But Dynamike: Friendsgiving reveals how thinking about others at Thanksgiving can give everyone more to be thankful for.

"Might be just the book to bring out your inner astronomer . . .

over 250 pages of breathtaking images from the past 50 years of NASA's space exploration." —Parade Preface by Bill Nye This magnificent volume offers a rich visual tour of the planets in our solar system. More than two-hundred breathtaking photographs from the archives of NASA are paired with extended captions detailing the science behind some of our cosmic neighborhood's most extraordinary phenomena. Images of newly discovered areas of Jupiter, fiery volcanoes on Venus, and many more reveal the astronomical marvels of space in engrossing detail. Anyone with an interest in science, astronomy, and the mysteries of the universe will delight in this awe-inspiring guide to the wonders of the solar system. "As you turn through the pages, you're hit with true moments of awe, photos that remind you the power of nature extends beyond our own planet." —Houston Chronicle "Breathtaking pictures show the otherworldly magic of the solar system . . . The images are at once humbling and uplifting: Here in the black void of space is Saturn's frozen moon, Mimas, white and pitted like a galactic golf ball; here is the tiny golden orb called Io, casting a shadow in a perfect inky circle on the marbled surface of Jupiter; here is the great sun, flames spurting from its surface like plumes." —The Wall Street Journal "[A] gorgeous photographic tour of space . . . The collection is a remarkable reminder of how much has been learned about the planets over the past few decades, solving many mysteries yet introducing many more." —Publishers Weekly

As a ghost, psychologist Elizabeth Cole is symbiotically linked to her supervisor and creator of the Ghost Protector who is forbidden to acknowledge or interact with her, which prompts her to search for the truth surrounding her own existence. Original.

Overview Black Dog Publishing

Earth From Space: A Visual Tour is a book with a collection of over 180 gorgeous images compiled from instrument data of NASA and their world-class collaborators. Some of these instruments are sensitive to the visual range of the electromagnetic spectrum. Other instruments record other wavelengths such as ultraviolet and infrared. Colors are assigned to portions of data to make images that portray our Earth with visual imagery. Details of the Earth from above show forest fires, floods, hurricanes, parks, cloud formations, the great cities of the world, sleepy backwaters, reefs, oceans, glaciers, snow capped mountains, archaeological sites, and transportation highways. Our understanding is transformed as we can truly see events like algae blooms, carbon emissions, crop health, volcanic eruptions, and more. The images in this book are beautiful and genuinely artful. Images of Earth from space are shaping our current ideas, beliefs, and perspectives and pointing the way to our future.

In You Are Here, celebrated astronaut Chris Hadfield gives us the really big picture: this is our home, as seen from space. The millions of us who followed Hadfield's news-making Twitter feed from the International Space Station thought we knew what we were looking at when we first saw his photos. But we may have caught the beauty and missed the full meaning. Now, through photographs - many of which have never been shared - Hadfield unveils a fresh and insightful look at our planet. He sees astonishing detail and importance in these images, not just because he's spent months in space but because his in-depth knowledge of geology, geography and meteorology allows him to reveal the photos' mysteries. Featuring Hadfield's favourite images, You Are Here is divided by continent and represents one (idealized) orbit of the ISS. Surprising, thought-provoking and visually delightful, it opens a singular window on our planet, using

remarkable photographs to illuminate the history and consequences of human settlement, the magnificence of never-before-noticed landscapes, and the power of the natural forces shaping our world and the future of our species.

The Birth of Earth! - Fun Facts about the Forces That Shaped Planet Earth. Earth Science for Kids - Children's Earth Sciences Books Activibooks for Kids

From the producer and author of THE BLUE PLANET, this is the ultimate portrait of our planet; the perfect companion piece to a truly landmark television event. Prepare yourself for a spectacular tour of the world's many habitats, each possessing their own unique mood. From the claustrophobic darkness of the deep ocean, to the big skies of the open plains; the merciless, ever-expanding deserts to the diminishing jungles, teeming with violent life. The thread that binds them all is water - the precious element that has carved our world and which makes all life possible. Discover hidden life - animals that have yet to be extensively filmed, either through the inaccessibility of their habitat or their own elusive behaviour. Witness mass migration spectacles, bioluminescent corals and rarely seen mountain cats, all beautifully captured by the world's best nature photographers.

In this celebration of our Earth, distinguished anthologist Wendy Cooling has chosen poems to make children look, think, and ask questions. Why are trees so important? How are motorways damaging our countryside? What can we do about rubbish? What can we do to protect our Earth for the future? Strong, colourful illustrations combine to make this a gift book with a difference.

Photographs taken from space show the diversity of earth and the natural and human influences that have molded the landscape and shaped the history.

Around the World in 92 Minutes Pan Macmillan

From the record-breaking astronaut, national hero, and best-selling author of Endurance, a breathtaking collection of photos documenting his journey on the International Space Station, the vastness of space, and the unparalleled beauty of our own home planet. One's perspective shifts when one lives for an entire year—as Commander Scott Kelly, and no other American astronaut in history, has—in the isolating, grueling, and utterly unforgiving vacuum of space. Kelly's photos prove that this perspective—from 250 miles above earth—while hard-won, is also almost unspeakably beautiful. He mastered the rare art of microgravity photography. Using a Nikon D4 with a long 800mm lens and a 1.4x magnifying zoom lens, he panned the camera as the shutter

released in order to compensate for the space station's velocity: 17,500 mph relative to the earth. Kelly's artist's eye helped make him a social media sensation, and here his photos are collected alongside his own commentary, which sets the images in their proper contexts, human and cosmic. Kelly captures sunsets, moonrises, the aurora borealis, and the luminous, hazy tapestry of the Milky Way. He presents snapshots of life and work on the International Space Station, from spacewalks to selfies. But above all--or floating amid all--he takes the earth itself as his celestial muse. Here are hurricanes, wrinkled mountains, New York City shining like a galaxy--glorious photographs that are, in themselves, a passionate argument for the preservation of our planet in the face of climate change and environmental destruction.

As You've Never Seen it Before Penguin

"Fascinating . . . memorable . . . revealing . . . perhaps the best of Carl Sagan's books."—The Washington Post Book World (front page review) In *Cosmos*, the late astronomer Carl Sagan cast his gaze over the magnificent mystery of the Universe and made it accessible to millions of people around the world. Now in this stunning sequel, Carl Sagan completes his revolutionary journey through space and time. Future generations will look back on our epoch as the time when the human race finally broke into a radically new frontier—space. In *Pale Blue Dot*, Sagan traces the spellbinding history of our launch into the cosmos and assesses the future that looms before us as we move out into our own solar system and on to distant galaxies beyond. The exploration and eventual settlement of other worlds is neither a fantasy nor luxury, insists Sagan, but rather a necessary condition for the survival of the human race. "Takes readers far beyond *Cosmos* . . . Sagan sees humanity's future in the stars."—Chicago Tribune

A young pirate with a chaotic home life learns how to express his emotions in a healthy way and with safe individuals.

The Lives of a Cell Random House

After his almost fatal experience on the exoplanet Erid-34, Dr. Neil Jackson wakes up out of a 10-year coma and finds himself in a strange room on Earth. He has very little memory of what happened to him on Erid-34, but he desperately wants to remember. The doctor overseeing his condition, Dr. Sigmund Kline, tries to help him fill in those blanks in his memory. But when NASA officials demand a conference with Neil at NASA Headquarters in Washington D.C., things take a turn for the worst. This sets Neil out on an adventure where he must discover the truth about what happened to him. It is a truth he could have never foreseen.

Earth and SpacePhotographs from the Archives of NASAChronicle Books

You Are Here Chronicle Books

Unseen images of the International Space Station, untenanted and eerie: the legacy of humanity's fragile foothold in space On November 2 2020, NASA celebrates the 20th anniversary of continuous human habitation in space of the International Space Station. In *Interior Space*, American photographer Roland Miller and Italian astronaut and photographer Paolo Nespoli offer an in-depth portrait of the ISS, creating amazing unpeopled images of the interior of the ISS for the first time. As internationally acclaimed scholars of space archaeology Alice Gorman and Justin St. P. Walsh write in their essays, the ISS speaks not only of who we are and will be, but also of who we were. In 2024 the ISS will be abandoned; in 2028 it will be destroyed. This book provides us with an eerie account of what will remain in the space after our passing. Italian-born astronaut Paolo Nespoli(born 1957) spent 313 days in space. After a career in the military, he earned a M.Sc. in Aerospace Engineering, then joined the European Space Agency spending time in Europe, the US and Russia. In 2007 he flew on the Space Shuttle and then, in 2010 to 2011 and 2017, he flew again to the International Space Station with the Russian Soyuz. He retired in 2018 from the astronaut corps launching a career as an international public speaker. Chicago-born photographer Roland Miller(born 1958) taught photography at Brevard Community College in Cocoa, Florida, for 14 years, where he visited many nearby NASA launch sites. He is the author of the acclaimed book *Abandoned in Place: Preserving America's Space History*, documenting deactivated and repurposed space launch and test facilities around the US. In 2017 he started the project *Interior Space*. His work is held at the Museum of Contemporary Photography, Chicago and at the NASA Art Collection in Washington, DC.

Visions of Earth CreateSpace

Elegant, suggestive, and clarifying, Lewis Thomas's profoundly humane vision explores the world around us and examines the complex interdependence of all things. Extending beyond the usual limitations of biological science and into a vast and wondrous world of hidden relationships, this provocative book explores in personal, poetic essays to topics such as computers, germs, language, music, death, insects, and medicine. Lewis Thomas writes, "Once you have become permanently startled, as I am, by the realization that we are a social species, you tend to keep an eye out for the pieces of evidence that this is, by and large, good for us."

The Planets Earth and SpacePhotographs from the Archives of NASA

"My son 5weeks absolutely adores this book, especially loves the starfish." Ben, London. #1 BESTSELLER Amazon, incredible black and white baby book series developed by an Astronaut training designer for newborn and young baby's visual perception and brain development; to improve concentration, stimulate learning and discovery.
